

The Farm and Fireside.

Time to Prune Grapevines. It is now a conceded point with most grape growers that the best time to prune is just as soon in autumn as the leaves have fallen.

HOW TO PRUNE Is a matter about which grape growers are not united, but all agree that the vine, native of this country, requires more room to develop itself than those of Europe, and hence when pruning, nine out of ten operators now leave canes of seven to nine buds long, where once the practice was to leave only three.

There is one rule, however, that must be followed in all pruning, and that is to leave two inches or more of wood beyond the last bud, otherwise a warm wet spell followed by severe cold is almost sure to injure the bud.

Starving the Orchard.

It is the theory and practice of some orchardists to starve their fruit trees, under the impression that it makes them healthy and productive.

The theory looks plausible. It is said growth must be checked in time to ripen the wood, so that it may not be injured by the cold frosts of winter.

It is so with our orchard trees. Let them have all the food that their many fibrous roots will take up, and that their leaves can digest, and you need not fear the result.

It is so with our orchard trees. Let them have all the food that their many fibrous roots will take up, and that their leaves can digest, and you need not fear the result.

Young orchards may be cultivated in corn or potatoes for the first three or four years, then sow in clover for two or three years; in the meantime dress with plaster, ashes, and superphosphate, with such and so much stable manure, from time to time, as can be spared from other field and garden crops.

Protect Your Eyesight. Milton's blindness was the result of over-work and dyspepsia. One of the most eminent American divines having for some time been compelled to forego the pleasure of reading has spent thousands of dollars in valueless and lost years of time in consequence of getting up several hours before day and studying by artificial light.

Never read or sew directly in front of the light of a window, or door. Two much light creates a glare and pains and confuses the sight.

Never read or sew directly in front of the light of a window, or door. Two much light creates a glare and pains and confuses the sight.

Never read or sew directly in front of the light of a window, or door. Two much light creates a glare and pains and confuses the sight.

Never read or sew directly in front of the light of a window, or door. Two much light creates a glare and pains and confuses the sight.

New Advertisements.

WALTHAM WATCHES.

THE EXTENSIVE use of these watches for the last 45 years by Railway Conductors, Engineers and Expressmen, the most exacting watch-wearers, has thoroughly demonstrated their accuracy, reliability and accuracy of the Waltham Watch. To satisfy that class in all these respects, is to decide the question as to the real value of these time-keepers.

Among the many improvements we would particularly mention the use of a centre-pinion of peculiar construction, to prevent damage to the train by the breakage of a main-spring, a original with the American Watch Company, who having had the refusal of all other watch-makers to make such a watch, we were obliged to make it ourselves.

Robbins & Appleton, General Agents for American Watch Co., 182 Broadway, New York.

UNCLE JOSE'S Trunk Full of Fun. A PORTFOLIO of first class Wit and Humor, containing the most original and amusing stories, anecdotes, jokes, riddles, puzzles, and conundrums.

Ayer's Cathartic Pills,

For all the purposes of a Laxative Medicine.

Perhaps no one medicine is so universally adopted into use, in any form of constipation, as Ayer's Cathartic Pills. The obvious reason for this is, that it is more reliable and more effective than any other cathartic.

It is a safe and reliable medicine, and is adapted to all ages and conditions in all climates. It is a safe and reliable medicine, and is adapted to all ages and conditions in all climates.
