Medical Meeting. The semi-annual gathering of the Medical said and allem spectator. As the parent ap-Licuality of the county took place on the 7th proached to the unpleasant duty, the box startof June at Brooklyn. The clouds were portenof June at Brooklyn. The clouds were portentous of rain in the morning, and in the course of the forenoon dispensed some gental showers, most grateful to the husbandman whose thirsty meadows were giving promise of only scanty returns in barvest time. It rained quite hard lost his vantage ground. Nearer and nearer the about the time to start for the meeting, but irate father approached, and as he came within most of the Doctors thought a little clear rain arm's reach of the little fugitive, who was ready water would do them no harm and accordingly to fall from exhaustion, the boy quickly faced headed their faithful equine colaborers toward about, dropped upon the ground, and with an the quiet inland village nestled among the hills indescribable cast of countenance, exclaimed: where Drs. A. and C. were waiting to welcome them. A few however as they saw the big drops it ?" This "changing of the subject" was so coming thick and fast, shook their heads and extremely ludicrous that the father laughed too timorous to start concluded to stay at home predicting that the meeting would be a failure. exhibited, and the rod was not used. The afternoon however proved very pleasant and the attendance was quite large, being The Lady's Friend. members present from Montrose, Great Bend,

Susquehanna Depot, Gibson, Clifford, Hopbot-

up by a case of discipline, in which the party against whom charges had been preferred, hav-ing a second time failed to appear before the society, there seemed to be no alternative but to adopt the resolution of the State Medical Society at its last annual meeting, viz: "That Dr. John W. Cobb be expelled from this Society, for unprofessional conduct in advertising."

The membership of the society has so increas ed as to entitle a representation by four dele gates in the State Society and that number were elected to attend the meeting at Williams port on the 14th of June, inst.

Besides a good meeting, the brethren had pleasant social visit together, and all started for their homes at a seasonable hour hoping to reassemble at New Milford on the first Wednesday of Janurary, 1872.

Starrucca. speaks as follows of Starruccs:

Mr. Dittor:—The village of Starrucca, where I am spending a portion of my time, lies in a narrow but fertile valley, among the mountains of Wayne Co., Penn. Being until recently an inland borough, its resources have never been fully developed

A branch of the York & Erie Railroad, called A branch of the York & Eric Railroad, called the Jefferson Road, runing through here now from Carbondale to Susqdehanna, has, put new fife and hope in the people, and everything appears to be moving now with zeal and energy. The Starrucca creek, running through the valley, empties itself into the Susquehanna river, near Susquehanna Depot. The scenery along the valley is wild, romantic and grand. Tanneries, Mills of different kinds, and manutacture and the susquehanna and manutacture. neries, Mills of different kinds, and manutacturing establishments are located all along the valley. At this village there is in successful operation a very large tanuery owned by Mr. C. P.

Strong. He employs about 50 hands, and turns off two hundred and fifty thousand dollars worth of leather yearly. Mr. Strong is a thorough business man, and engaged in every good work to make the world move and society better. He has given us the site and one thous. good work to make the world move and society better. He has given us the site and one thousand dollars towards the new church we are building here. This is really a very rough country. We meet hills mountains, stones and rocks, everywhere; but we have a very social, intelligent and glorious people. One singular feature of the country is the many lakes that lie imbeded among the mountains, and on the hills with good tertile land all around them. In the town of Preston, and adjoining the borough, there are seventeen lakes, covering on an average about fifty acres of land. Large quantities if sha are caught from these lakes every week. Messrs. Turner & Underwood have a fishery here where they breed trout. They have now on hand about twenty thousand, great and small.

ed by an address at 101, o'clock a. m. District.

In behalf of the grief-stricken community, paralyzed by the repetition of the disaster at Avondale, we appeal to you for substantial aid. Of the 65 miners who entered the shaft at this place on Saturday morning, 43 have been taken out alive, but many of whom caunot long survive. Those who have already died will be buried to-day. They leave behind them 12 widows and 36 fatherless children. In their behind we ask your charity. Six months' enforced idigness has made the community poor. Those who histed they have given during the winter, until their benefactions have exhausted their ability. Many are still on the verge of starvation, and now, just as renewed labor has begun to effect the heart, we are streken down by this awful calamity. Will you give us your mite to relieve the widow and sharerless; All contributions may be sent to Theodore Strong, President of the Pirst National Bank, at Pittaton.

Committee.—O. F. Gaines, B. Biven, W. J.

boards, that they may know what the law re-

quires of them:

It shall be the duty of the board of directors to publish an annual statement of the amount of moneys received and expended, and the amount due from collectors, and setting forth all the financial operations of the district, by one or more publications in one or more newspapers of the county in which they reside. If there is an amount of the collected, or any amount due to the district it is to be stated as "amount of — yet due" at the foot of receipts, and so carried out, and if there is an amount of debt yet due by the district, it is to be stated as "smount ver-due for—" and be carried out at the foot due by the district, it is to be stated as "smount yet-due for—" and so carried out at the foot of expenditures; in order, in both cases, to balance the account in accordance with the facts. If there was a building tax, and a house or houses rected during the year, the amount of the building tax and of the portion of it expended in the year for this purpose, is to be stated in the same way, and with the balance on hand, or the next for this purpose, if any, under proper heads "receipts" and "expenditures for building" as in case of ordinary school tax and expenditure.

"Pennsylvania School Journal." It is very important that Directors and Teachers should understand what they can of the School Work in our State, as well as to seek information concerning the arrangement and instruction sultable for schools. Valuable suggestions are contained in each number of the School Journal, and, as it is the direct organ of The School Department, it is of value to every one connected with our Schools; teachers especially should seek this or some other means of information in School economy as it has a direct bearing upon Grade of Certificate and success in the School room.

Arrangements are made so that I can secure The Journal for teachers at \$1.25 a year. The twentieth volume commences with the July number, and I will forward subscriptions for those wishing on the receipt of the above sum. Good works on teaching by Page, Wickersham Hart, &c., can be obtained of Booksellers.

Written by one who cured himself, and sent free on fecciving a post-paid directed envelope. Address, NATHAN MAYFAIR, Brooklyn, N. T.

Brooklyn, May 17, 1871.

A Chapter of Facts.

Epace is valuable in a newspaper, and it is therefore proposed in this advertisement to condense a variety of facts, important to the public, into a small compana.

These facts refer to Hostetter's Stomach Bitters—what that celebrated medicing is, and what it will do. In the first place, then, the article is a stimulant, tonic and the terative, consisting of a combination of an absolutely pure spirituous agent with the most valuable medicinal vegetable substances that Botanie research has placed a vegetable substances that Botante research mass piaces the disposal of the chemist and the physician. These ingredients are compounded with great care, and is such proportions as to produce a preparation which invigorates without exciting the general system, and tones, regulates and controls the stomach, the bowels, the liver,

and the minor secretive organs

What this great restorative will do must be gathered what this great restorative will do must be gathered from what it has done. The case of dyspepsia, or any other form of indigestion, in which it has been persist-ently administered without effecting a radical cure, is yet to be heard from, and the same may be said of bil-ious disorders, intermittent fever, nervous affections, general dobility, constitution, sick hessfache, mental disabilities to which the feeble are so subject. It puridesall the fluids of the body, including the blood, and the gentic stimules which it imparts to the nervous sys-tem is not succeeded by the slightest reaction. This is a chapter of fact which readers, for their own sakes, ould mark and remember.

Dr. C. P. BROWN'S

YOUNG AMERICAN LINIMENT

In effering this Liniment to the public, as we do in fall confidence, that it must superceds all others now in use, as an internal remedy, for the cure of all diseases in the search of that class of medicines, we can wardy assent, without the least fear of contradiction, that it stands unrivated in the list of medical compounds externally applied for the cure of disease. Feeling therefore that it is unnecessary to paid a remedy so eminently wonderful in its effects, so mysteriously infallible in its powers of relief, causing the deaf to hear, the blind to see, the nervous, drawn and crippied rhemmite to waik erect and rejoice again in the power and vigor of manbood, this preparation is offered to the public on its own merita, and thims no volcamic origin or essential oils of the Arabi an deserts; but on the contrary is what its importa, and is a zire combination of the power of North American products.

This notice is to inform all deliers in proprietary medicines, that we have emblished a Depot in Busquehanns county as Routrose. Pa., for the tabe of Dr. C. F. Bowe's Young American Liniment, and that Mr. A. BALDWIN is our spent for that purpose.

WARD, SOUTHERLAND & CO., 120 William Street, New York

WILBUR'S EUREKA MOWER, DIRECT DRAFT.

MANUFACTURED by Wilbur's Eureka Mower Mand Resper Manufacturing Company, Pough-tecpair, N. Y. Description,
The Eurela Hower has nothing in common with other
schines, except the use of the ordinary cutting appaatus.

The wheels are large and set directly back of the ends of the cutter bar, which is consequently directly in front of the entire-bar, which is consequently directly in front of the matchine.

The cutter bar is either Four Five or Six Feet long, can be set to cut any required height, and is raised by the driver to pass obstructions with perfect case. Define matchine has no bevel genring, spur gear being used throughout. It has all the advantagers of spinned bar without its objectionable features, and readily adapts itself to the neacewances of the ground.

It gives us pleasure to be able to state, that where the Eurika has been used it is rapidly superseding the awk wardly arranged side cut machines, and we are well aware that its growing popularity has excited much opposition.

We therefore ask that the farmers of the country will guard sgainst any unfavorable prejudices from the statements of interested parties, judging only of the merits of the machine from personal experience in its dree. The bar being in front, obstacles are more readily seen and avoided than when the bar is at one side.

The priman works at right angles with the knife, consequently there is not the far which is so unpeasant and objectionable in all machines where both are in the same line. It is always in the same relative position to the knife, and works equally well whatever the position of the cutter-bar.

The machine can be offed, obstacles can be removed

The machine can be offed, obstacles can be removed from the guards, and the bar folded without the driver greating off.

It is removed, the removed of gear by hand or foot, and medicine of the world, for there is no region of the glob into which it has not found its way and seem larged. There is a spoutniety no ride draft. It rides very easy, and advords greater, the same of the world, for there is no clime t which it has not proved or the current and advords greater, the same of the world, for the current of the world. It is a speedy an analysis of the world of the world of the world. It is a speedy an analysis of the world of the wo

inggrass.

Nither horses nor machine go on the cut grass, which is left nearly standing and will cure more rapidly and earthly than when a tedder is used after a side-draf mower.

The Eureman is admirably adapted to mowing side hills and indyded, taken of the most favorable side of the piece or lot on taken of the most favorable side of the piece or lot on that the Pala Killer will contuct be, what we have the pala Killer will contuct be, what we have the piece or lot on that the Pala Killer will contuct be, what we have the pala Killer will contuct to be, what we have the pala Killer will contuct to be, what we have the pala Killer will contuct to be, what we have the pala Killer will contuct to be, what we have the pala Killer will contuct to be, what we have the pala Killer will contuct to be, what we have the pala Killer will contuct to be. which to work the machine back and forth.

It is easily managed, and with a corresponding expending expending of power, cuts a much wider swalk than any other in use.

re in use.

Price.

The Eureks is so simple in construction that we are enabled to offer it at a price much below other standard machines of the same capacity. OUR PRICES FOR THE COMING SEASON ARE FOR CARE
