GREELY ON CARPET BAGGERS. Our cotemporary of the Montrose Republican expended nearly two columns in an attempt to prove that the editor of vile patent double extracted nostrums, the Binghamton Republican had got his head turned by his late trip on the editorial excursion to the South, and charges him with foul heresy to the Radical doctrine of Ku-Kluxism, in a late editorial in which he presents the facts which Democratic Journals have been presenting ever since the close of the war, which is that the South only ask an impartial and constitutional administration of the government, and an equal and fair representation. When they surrendered at Richmond they accepted the results of the war. It seems to be perfectly fatal to the Radical bubbles of "Southern treason" for editors to go among the Southern people. It perforates them so completely that it lets all the wind out of them. Here is and set him down in Texas, right among following seems to be what Greeley knows extensively quoted by the Montrose Republican, and fenatics of the same ilk. at a reception tendered him in New York

The affair proceeded pleasantly till shortly after 10 o'clock, when some of the visitors were taken ill quite suddenly, and had to be removed.

almost beyond description. Up to Saturday at noon 147 persons had undergone agonies worse almost than, death, and a rounded number of others were becoming ill. The effects were certainly those of poi relcting, vomiting and purging, attended plentiful. with cramps. The pulse became so weakas to be scarcely preceptible, while the extremities were cold, and the muscles and nerves greatly contracted. In many cases the sufferers were afflicted with tom

porary paralysis, losing all power over their limbs. Almost all of them underwent a relapse, from which some of them may never recover. Various theories as

to the cause of the poisoning are afloatmany contending that the death-dealing substance was in the cake, while others believe that some malicious mischiefmaker poured croton oil into some of the eatables. The most probable theory is that the cause of the loccurrence was the ice-cream. The cream was secured by Mrs. York, and given to a confectioner to freeze. In performing the work, the confectioner used a copper refrigerator, lined with tin. On Friday the refrigerator was examined, when a greasy substance was found on the sides-nudoubtedly verdigris. The confectioner had no idea, probes from Lebanon say that Vallandigham ably; that the refrigerator had not been was vomiting, which was regarded as an properly cleaned, for he partook of the ice-cream himself, and became sick .-Dubuque Tel., June 5.
