Circular by Prof. Wickersham. The following circular has just been forwarded to the heads of the orphan schools in the

State by Professor Wickersham:

State by Professor Wickersham:

By an act of the Legislature, approved May 27, 1871, the undersigned has been entrusted with the supervision of the soldiers' orphans of the Commonwealth, with whom, from the present date, all official business appertaining thereto must be transacted.

While this delicate trust has not been sought, coming, as it is believed it does, with the good will of all concerned, it is assumed with a full sense of its importance and the most sincered desire to administer it in such a way as to sective the orphans of our dead heroes the greatest measure of good possible from a benefaction which, in the breadth of its liberality, has no parallel in the history of this orany other countries. parallel in the history of this or any other country. In this noble work I hope to have the in the management of the trust, and the sympa

The immediate attention of those interested is asked to the following special directions:

1. All clothing for the pupils in the several institutions will hereafter be furnished by the institutions will hereafter be intrinsied by in-principals or managers of the same, subject, as to its kind, quality and quantity, to the control of the superintendent. Accounts for clothing, when presented for settlement, must be accom-panied by sworn statements as to their accuracy. 2. All clothing to be purchased for the quarter commencing with the date, hereof will be substantially the same, in kind, as heretofore. Such changes as it shall be found advisable to make will be made known in time to carry them into

No exceptions can be made, under the present law, in favor of those who have been in the schools a less time than two years.

4. The vacation for the present year will commence on Friday, July 28, and continues until Friday, Septimber 8. The annual examination at the several schools will take place during the two or three weeks preceding the vacation.

5. A meeting of principals, managers, inspectors and others interested in the soldiers' orphan schools will be called at an early day at Harrisburg.

risburg.
6. The superintendent expects to be able to visit every institution in the State in which there are soldiers' orphans under instructions before the coming vacation. Having prepared in 1864, at the request of Governor Curtin, the original plan for the education and maintenance of soldiers' orphaus, after which, in their main original plan for the education and maintenance of soldiers' orphaus, after which, in their main features, all subsequent plans have been modeled, he feels not only a formal or public, but a deep personal interest in the success of the system and will do all in his power to promote it.

How to Have Early Tomatoes.

American Institute Farmers Club as follows: Do not forget to tell your agricultural friends that tomatoes on heavy soil may be obtained from four to five weeks carlier than usual, by setting the plants on the tops of sharp hills. The hills should be about fifteen inches high, and three feet in diameter at the base Water the plants only when first set, and dust the plant. and whole hill frequently with plaster. The tomato, coming from a hot and dry country, will endure a drouth that would prove fatal to less hardy plants. What it needs most is heat,

the blossom removed after settings have attained the size of marbles; but in any case the vines should be permitted to fall directly on the ground that the fruit may have the full benefit of the sun and the warmth refracted from the earth. By saving the first well formed ripe tomato for seed for several successive years, a variety may be obtained that for earliness will be far superior to the original stock,

WILBUR'S EUREKA MOWER DIRECT DRAFT. MANUFACTURED by Wilbur's Euraka Mower and Reaper Manufacturing Company, Pough-keepsie, N. Y.

Description,
The Eureka Mower has nothing in common with other ureka Mower has nothing in common with other s, except the use of the ordinary cutting appaof the cutter-bar, which is consequently directly in front of the machine.

The cutter bar is either Four Five or Six Feet long, can be set to cut any required height, and is raised by the driver to pass obstructions with perfect case.

The machine has no bevel gearing, spur gear heing need throughout. It has all the advantages of a jointed bar without its objectionable features, and readily adapts itself to the uneavenness of the ground.

It gives us pleasure to be able to state, that where the Eureka has been used it is raidily superseding the awk wardly arranged alde cut machines, and we are well aware that its growing popularity has excited much opposition.

aware that its growing popularity has excited much opposition.

We therefore ask that the farmers of the country will card against any unfavorable prejudices from the statements of interested parties, judging only of the merits of the machine from personal experience in its ore.

The bar being in front, obstacles are more readily seen and avoided than when the bar isnt one side.

The pimman works at right angles with the knife, consequently there is not the jar which is so unpeasant and objectionable in all machines where both are in the same line. It is always in the same relative position to the knife, and works equally well whatever the position of the cutter-bar. The machine can be olded, obstacles can be removed from the guards, and the bar folded without the driver getting off.

It is readily thrown out of gear by hand or foot, and in the case of the control gear.

The machine can be olied, obstacles can be removed from the guards, and the bar folded without the driver getting off.

It is readily thrown out of gear by hand or foot, and backs onto i gear.

The "Park Killen" may justly be styled the great medicine of the world, for there is no colline to backs onto i gear.

The releas absolutely no side draft. It rides very easy, and affords greater salety to the driver than any other modeline.

The horses are placed far apart, with long neck-yoke and expeny, and in noc. the mosphile is driven by the same simple in a five the same simple is a five the same simple in the same simple in driven have a same simple in the same simple in the same simple with the made. The order walks in the cleared track, outside the standing grass satisfied the tion, from which the next cut will be made. The order walks in the cleared track, outside the standing rass satisfied the same simple is gear and the properties of the grass.

Niter horses nor machine go on the ext grass, which is lett nearly standing and will eare more rapidly and were samely than when a todder is freed after a side-drive mover.

The Eurann is admirably adapted to mowing side hills and lodged grass, as in both cases advantage can be within the work the machine back and forth.

It is easily managed, and with a corresponding expenditure of power, cult a much wider swalh than any other in general than the plant Killer will contine to be, what we have skyled it, rife ones in the length of the case of the more well as for the relation of the more frorable is decorated by a families and individuals, than it has been here of home.
