representation of tennant-farmers in the accomplished officer, and a great wag, re-British House of Commons, an affirma-tion recently made as a fact to be depre-somewhat severe in his remarks on the lack of agricultural representation in a nation of independent, ihrifty, and intelligent farmers! It is not that there is the slightest difficulty in finding men of the "Yes, I know him well," replied the breadth and brains of an average Con-gress among the farmers of any individ-ual State; but farmers are isolated, and unable to combine with facility; they are ceived a letter from him, and I would wamore independent, and thus in feeling and ger you a dozen of old port that you canfact are less inclined to "crook the preg-nant hinges of the knees where [political] thrift may follow fawning;" they are comparatively single-minded and conscientious, and are therefore averse to the insincerity and sinuosity of the genus politician. While agriculture is thus unrepresented, its interests suffer. Ambitious lawyers, scheming merchants, speculators, and railroad monopolists, men-who do not represent the producing interests, and who are at best the expensive go-be-tweens on production and consumption, have an impelling personal interest in seeking legislative position, and they, "No, that's not therefore obtain it. Commerce has yearly your last chance." had its millions in subsidies, improvements of navigation, light-houses, and other aids; railroads have millions of dollars of money and of acres of land, the farmers for double dividends. Now, the farmers want very little money in appropriations in aid of agriculture, but the roar of the mess and almost a mid they do need an exemption from the mess and almost a mid the roar of the mess and almost a mid the roar propriations in aid of agriculture, out they do need an exemption from adverse legislation—statesmen understanding and exclaiming:

Summer following for wheat also affords a better opis drained, two or three alternate crops of ton can be produced for half the Onts also do well on clay lands, and often give large yields; but the tendency of the crop is rather to make the land harder than otherwise, Perhaps fall plowing for the crop, and leaving the land in a condition to be benefitted by freezing—surface drainage having been well attended to—may be an exception; at least is probable that this is the best way to grow oats on clay soils. Heavy clay soils are not adapted to corn; but a good deal of grown on clay loams.

Summer season; and that those who cat the sum or muscular, and can do more work with greater case to themselves, than those who cat fat pork. We know nothing more delicious than smoked mutton hams of the Southdown breed of Sheep. Vension itself is not superior. By smoking a portion of the flesh of a sheep, most families can dispose of the four quarters in an economical manner, before any part of it would spoil.

Ladies and Genf of-good corn is grown on clay loams. There are also many of the heavier clay lands that by under-draining and cover ing may be reduced to a loam that will not be bad for corn. It must be a pretty May, and thereonghy prepared, will not be in a condition to grow good corn. As a rule, and in sections suited to the crop, barley will answer where corn does. ### Puzzling a Doctor.

Regret is felt by the true friends of agriculture, that so few farmers should be found in the halls of legislation; and especially in Congress. DYSPEPSIA OR INDIGESTION. Head sche, Pain in the Shoulders, Coughs, Tightness of the Chest, Dirniness, Sour Fractations of the Etemach, Pad taste in the Mouth, Billous Attacks, Pulpitation of the Heart, Lidamination of the Lungs, Pain in the regions of the Etemach, and a timefred other paintiful symptoms, are the offsprings of Dyspepsia.

They invigorate the Stomach and stimulate the torpid liver and bowels, which render them of unequalited efficacy in cleansing the blood of all impurities, and imparting new life and vigor to the whole system.

FOR 5K IN DISEASES, Emptions, Tetter, fait Bheum, Biotches, Spots, Pimpies, Pertules, Dolls, Cabineles, Ring-Worms, Scald-Head, Sore Eyes, Erystipsies, Irch, Ecurith, Discoforations of the Stin, Humors and Diseases of the bkin, of whatever name or nature, are iterally dug up and carried out of the system in a short time by the use of these Distern. One bottle in such cases will convince the most increditous of their cursive officet.

Cleanse the Viliated Bood whenever you find its impurities bursting brough the skin in Pimples, Fruptions or Sores; cleanse it when you find its impurities bursting brough the skin in Pimples, Fruptions or Sores; cleanse it when you find it obstructed and singuish in the veins; cleanse it when its ford, and your feelings will tell you when. Keep the blood pure and the health of the system will follow.

FIN. TAFE and other WOLMIS, lurking in the system of so many thousands, are effectually destroyed and removed. For fall directions, rand carefully the circular around each bottle, printed in four imaging—English, Gernston, French and Spandsh.
