Steam Ferry Boat. A new steam ferry boat is now built and will shortly take on its engine, and be put in workcondition in the pool of the Hörse-race dam at Mchoopany. It is the intention of the builder and owner, says the Tunkhannock Democrat, Mr. William Jennings, to make this miniature steamer a great convenience to the town, and especially to those who wish to cross the river t that place. This boat, if all things work well with it, could be pleasantly, if not profitably employed in the splended pool at that place as casure excursion boat. The river for several miles above, could be easily navigated by a boat of light draft. We hope it may not be made only profitable to its enterprising builder, but also a of the certainty of the election of Gen very decided convenience to the town, for whose | McCandless and Capt. A Chapter of Facts.

Space is valuable in a newspaper, and it is therefore proposed in this advertisement to condense a variety of facts, important to the public, into a small compass.— Thes facts refer to Hostetter's Stomach Bitters-wha that celebrated medicine is, and what it will do. In the first place, then, the article is a stimulant, tonic and al terative, consisting of a combination of an absolutely pure spirituous agent with the most valuable medicin veretable substances that Botanie re earch has placed at the disposal of the chemist and the physician. These is redients are compounded with great care, and in such proportions as to produce a preparation which invigorates without exciting the general system, and tones, regu-ates and controls the stomach, the bowels, the liver

and the minor secretive organs

What this great restorative will do must be gathered
from what it has done. The case of dyspepsia, or any other form of indigestion, in which it has been persistently administered without effecting a radical cure, is yet to be heard from, and the same may be said of billious disorders, intermittent fever, norvous affections, general debility, constipation, sick headache, mental disabilities to which the feeble are so subject. It purifies all the fluids of the body, including the blood, and the gentle stimulus which it imparts to the nervous sys-tem is not succeeded by the slightest reaction. This is a chapter of fact which readers, for their own sake should mark and remember.
