Bridgewater's Longest Resident. Yesterday, June 28th, Mason S. Wilson celebrated the 73d anniversary of his birth, by receiveng at an entertainment, given by his daughter, Mrs. L. F. Fitch, a party of old gentlemen. property. This he declined to do, but Most of these, though his seniors, came into the they finally came to an agreement that he place several years after himself, as he was not should give her a note for \$5,000. Then quite a year old when his father, Stephen Wilson, came, (with his family), as the rinsr cettler within the present bounds of Bridgewater.

Since the party was composed of men whom re delight to meation with honor, we append

Narrow Gauge Railroad.

A writer in the Age gives the following comparative cost of building, and operating, wide and narrow gauge railroads. The difference in cost is great enough to attract the attention of those who are projecting railroads. The writer says, I selected the following comparative estimates of the cost of track and rolling stock superstruction for one mile of gauge, four feet, eight and a half inches:

2,640 ties, 8 feet long, 8×6, 55 cents, 825 lbs. spikes, at 4 cents, 400 sets of fish plates at \$1, Track laying, Ballast Ballast, Iron rail, 60 lb per lineal yard100 ton per mile at 70 cts 7,000 00

Rolling stock for, say twenty-five miles of road: 3 locomotives, of 26 tons cach, \$16,000, \$48,000 00 5 passenger cars, \$4,000, 20,000 00 2 mail and baggage cars, \$1,300, 2,000 00 \$1,300, 2,600 00 30 merchandise cars, \$1,000, 30,000 00 20 merchandise cars, \$800, 16,000 00

25 | 116,600 00 Or per mile for gauge 4 feet,

\$15,144 00 Superstruction for one mile of three feet gauge. 2,640 ties, 5 feet long, 6×6 at 25 cents, 528 lbs of spikes a 4 cents, 400 sets fish plates at \$1 400 00

Track laying, Ballast

8 loconotives, 12 tons each, at \$6,000 \$18,000 00
5 passenger cars, \$1,100, 5,500 00
2 mail and baggage cars, at \$300, 1,200 00
35 merchandise cars, at \$175 6,125 00
25 merchandise cars, at \$160 4,000 00

25 | 34,825 00 Or per mile for gauge 3 feet, Total,

This makes cost of track and rolling stock as follows: For a road of a gauge of 4 feet 8½ inches,
\$15,144 00 per mile.
For a road of 3 feet,
\$7,063 00 per mile.

Or a difference of \$ 8.050.00 In Wales, it is calculated that a narrow gauge road can be built and equipped for fifteen hun-

dred pounds, say seven thousand five hundred

dollars, in gold, per mile. Besides the much less cost of these roads, it is to be recollected, that they can make much sharper curves and ascend steeper grades than the roads of a wider gauge.

Insurance. The following decision of the Supreme Court on the subject of assigning insurance policies as collateral security is important both to borrow

"The Supreme Court of Pennsylvania, Mr. Justice Read delivering the opinion, has recently decided that the following condition in a policy of insurance against fire is valid and binding to wit: That the policy shall not be assignable to wit. That the policy shall not be assignable without the consent of the company expressed thereon, and that in case of assignment without such consent, whether of the whole policy or of any interest therein, the liability of the company, in virtue of said policy shall thenceforth cease. In the case in question the owner of certain premises, who had insured his property against fire, transferred his policy containing the above conditions as collateral for money loaned. After six months the creditor transferred the judgment and the policy to a third party. Neither of these assignments were submitted to or approved by the insurance company. On the expiration of the first year the original owner of the property and insurer made the annual payment of the continuance of the risk, and the buildings having been burned down, he commenced sait to recover the amount of the policy, the debies, to secure which the instrument was assigned, having first been paid off by him. It was argued that the prohibition in the policy was not intended to apply to a transfer as collateral security, but the court held that the words relied upon for this construction had no bearing, inasmuch as they referred to the mode of paying losses under approved assignments of paying losses under approved assignments when there was no actual transfer upon the property. In the terse language of Judge Read, the condition in the policy was perfectly legal, and the liability of the insurance company was discharged."

How to Keep Cool. A correspondent furnishes the London Times with the following bints, which will be found pertinent to our own chimate: In these ho days a cool apartment is a rear luxury to be had far oftener than most people suppose possible. The secret consists not in letting cool air in, for naturally all do that whenever they have the chance, but in keeping out the hot air. If the air outside a room or house be cooler than the nir inside let in by all means, but if it be hotter carefully keep it out.

A staircase window lett open during the night will often cool the passages of a house and the rooms too if the door be not shut, but it must be closed at eight or nine o'clock in the morning, or if on the sunny side at four o'clock, and the blind drawn down. The mistake people generally make is to throw open their windows at all hours of the day, no matter whether the atmosphere outside be cool or scorching.

Let us have some air, they say, and in comes

Coffee is Ready for the Table. They only and you will

be treacherous breeze—for even hot air is

and the Coffee Always Right? the treacherous breeze-for even hot air is pleasant while it is gently blowing, taking away | Axes, pleasant while it is gently blowing, many perspiration, and therby cooling the skin, but have, between the same shadows. the apartment is made warmer instead of cooler, and as soon as they move out of the draught Storer. they find their room to be more uncomfortable

HAIR VIGOR.-In common with many others we have felt a lively interest in the investigations which Dr. Ayer has been making to discover the causes of failure of more thorough and exhaustive than any ever made before. The result is now before us under the name of Ayer's Hair Vigor. We have given it a trial, and with full satisfaction. Our grey hairs have disappeared, or resumed their original color; and a visible crop of soft, silken hair has started out on a part of the scalp which was entirely bald. [Democrat, Abingdom, Va.

A Wife for 95,000.

Thomas Wright desired one belles to marry him. She said that he must first give her a mortgage on his she maraied him. They soon quarreled and ultimately separated. She sued on the note, and the referee found in her favor. The husband appealed and the Supreme Court, General Term, though

divided, affirmed the judgment. Judge Cardozo, giving the opinion of the majority, holds that the consideration of the promise of marriage, followed by the fulfillment, is sufficient, and that whatever may have been the old law, under the recent statutes-giving a wite independent rights in her property her right of action was not extinguished by her coverture. Whether her action should have been at law or on the equity side of

the Court he holds immaterial. Judge Barnard dissenting, thinks that the consideration did not arise, and there fore the contract was not completed until after the marriage, when contracts between the plaintiff and defendent would have been null .- New York Sun.

DEATH OF AN OLD TRAINER .-- As the morning express train from New York, Boston telegram, dated June 23, was passing Brighton, George Woodruff, who was walking across the track, was struck by the locomotive and instantly killed. He was the oldest trainer and driver of trotting horses in the world.— His remains will be taken to Philadelphia for interment. Deceased was the father of young Hiram Woodruff.

-Soldiers' Graves at Gettysburg. The following shows the number of graves in the Gettysburg cemetery, with he different States which they represent: New York, 868: Pennsylvania, 534: Massachusetts, 159; Ohio, 131; Maine, 104; Michigan, 171; Indiana, 80; New Jersey, 78: Wisconsin, 73: Minnesota, Vermont, 61; New Hampshire, 49; Connecticut, 22; Maryland, 22; Delaware, 15; Rhode Island, 12; West Virginia, 11: Illinois, 6; regulars, 138; unknown, 979; making an aggregate of 3575. Directly after the bat tle, thousands were removed by their friends and relatives, leaving but a comparatively small number in the cemetery

THE SALE OF PATENT MEDICINES. Has in no other country reached the enormous proportions it has assumed in the United States. This is owing to the vast vatent of territory and the comparative thinness of population, which creates the necessity for some reliable remedy, that can be applied at once in the absence of professional medical aid.

Special Aotices.

THE GREAT HOUSEHOLD REMEDY. and is relied on in every emergency by thousands of families in every section of the country. It is not a fancy drink, composed of bad whisky, flavored with aromatics, to tickle the palete and minister to a deprayed compounded extract of Rosts, Herbs and Barks, possessing great medical virtue. Its rare combinat on presents the most effectual remedy yet discovered for all discusses of the stomach, Liver, Kidneys and Bowels. Sold everywhere at One Dollar per Bottle.

THE OCNFESSIONS OF AN INVALID. DUBLISHED as a warning and for the beyont of Y young men and others, who suffer from Nervous Debility, &c., supplying the MEANS OF SELECURE. Written by one who cured himself, and sent free on

ecciving a post-paid directed envelope. ... NATHAN MAYFAIR, Brooklyn, N. Y. Brooklyn, May 17, 1871. A Few Words to the Ladies.

Many tadies, pirticularly mothers nursing, complaining of a tired, listless feeling, or complete exhaustion, on arising in the meruing. On the wife and mother deolves the responsibility of regulating the duties of the onschold. Her cares are numerous, and the mental as well as the physical powers are frequently called into requisition. She often finds her slightest occupation weary task and existence a burden, while at the same time she has no regular disease. Hostetter's Stomach Bitters, if resorted to at this period, will prove an un Bitters, if resorted to at this period, will prove an un-failing remedy for this annoying lassitude. The effects of this potent agent are soon seen in the rosy check and clastic step of the head of the family, as with restored health and renewed spirits she takes her accustomed place in the family circle. If this friend in need be regplace in the table depressing symptoms will never be complained of, and not only would lassitude not be ex-perienced, but many diseases following its advent be avoided. As a medical agent it has no equal, while It pleasing flavor and healthful off ets have made it a genpleasing havor and nearthful enters are made it agest eral favorite. It is free from all properties calculated to impair the aystem, and its operations are at once mild, soothing and efficient. A'l who have used the Bitters attest its virtues and commend it to use.

Send two three cent stamps to Proctor Brother for a "Treatisic on the Human linir." The information tains is worth \$500 00 to any person.

The "PAN KILLER" may justly be styled the great medicine of the world, for there is no rection of the globe into which it has not found its way, and been inred; med and highly prized. Moreover, there is no clime to which it has not proved to be well adapted for the cure of a considerable variety of disenses. It is a speedy and variety of forburns, sends, crize, bruisses, wounds and various other infuries, as well as for dysentery, disprises, and bovel complicate generally. It is admirably situated for every race of men on the control of the globe. It is a very significant fact, that not withstanding the long period of years that the "Pain KIHO" has been belong period of years that the "Pain KIHO" has been before the world, it has never lost one whit of its monniar. It is a very significant fact, that notwinstanting the long period of years that the "Pain Killer" has been before the world, it has never lost one whit of its popularity, but on the contarty, the call for it has steadily increased from its first discovery, and to no previous time has the demand for it been so freat, or the quantity made been so large; as it is to-day.

Another significant fact is, that nowhere has the Pain Killer ever been in higher repute, or been mere generally used by Lumilies and individuals, than it has been here at home, where it was first discovered and introduced That the Pain Killer will contuct to be, what we have styled it, the real real respective of the world, there cannot be the shutlow of a doubt. -Providence Advertiser.

WILBUR'S EUREKA MOWER,

DIRECT DRAFT.

MANUFACTURED by Wilbur's Eareka Mower and Reaper Manufacturing Company, Pough-keepsie, N. P. Description,
The Eureka Mower has nothing in common with other archines, except the use of the ordinary cutting appa-

The wheels are large and set directly back of the ends of the cutter-bar, which is consequently directly in front of the cutter-bar, which is consequently directly in front of the machine. The cutter bar is either Four Five or Six Footlong, can be set to cut any required height, and is raised by the driver to pass obstructions with perfect case. The machine bar', no bere' graing, spur gear helip used throughout. It has all the advantages of belointed bar without its objectionable features, and readily adapts itself to the uneavenness of the ground.

It gives us pleasure to be able to state, that where the Eureka has been used it is raidily superseding the awk wardly arranged side cut machines, and we are well aware that its growing popularity has excited much opposition.

wardly arranged side cin machine, and we are due to appear that its growing popularity has excited much opposition.

We therefore ask that the farmers of the country will guard against any nufavorable perjudices from the statements of interested parties, judging only of the merits of the machine from personal experience in its use. The har being in front, obstacles are more randly seen and wooked than when the bar istat one side. The pinnan works at right angles with the knife, consequently there is not the far which is so unpeasant and objectionable in all machities where both are in the same line. It is slways in the same relative position to the knife, and works equally well whatever the position of the cetter-bar.

The machine can be olied, obstacles can be removed from the guards, and the bar folded without the driver getting off.

It is readily thrown out of gear by hand or foot, and backs out of gear.

There is absolutely no side draft. It rides very easy, and affords greater salety to the driver that any other machine.

The horses are placed far apart, with long necks, odds. machine.

The horses are placed far apart, with long neck-yoke and evener, and in use, the machine is driven like a side-hill plow or a horse-rake, tack and forth on the sathe side of the piece. One horse walks in the standing grass entirely beyond the cut, pressing it down in the opposite direction, from which the next cut will be made. The other walks in the cleared track, outside the stand-log reass. Ing grass. Nither horses nor machine go on the cut grass, which is left nearly stancing and will cute more rapidly and eatenly than when a tedder is used after a side-d rai

mover there's is admirably adapted to moving side thils and lodged grass, as in both cases advantage can up taken of the most favorable side of the piece or lot on which to work the machine back and forth.

It is easily managed, and with a corresponding expenditure of power, cut a much wider swath than any other than the property of the managed of the swath than any other than the property of the much wider swath than any other than the property of the much wider swath than any other than the property of the much wider swath than any other than the property of the pro The Estekn is so simple in construction that we are enabled to offer it at a price much below other stundard unachines of the same capacity.

Our shaces role that coming existent are role cast.
