THE SALE OF PATENT MEDICINES. Has in no other country mached the enormous propor-tions it has assumed in the United States. This is our ing to the vast vixtue of territory and the comparative thinness of population, which creates the necessity for some reliable remedy, that can be applied at once in the absence of professional medical aid. MISHLER'S GEHR BITTERS has for over ten years been

THE GREAT HOUSEHOLD REMEDY, and is relied on in every emergency by thousands of families in every section of the country. It is not a fancy drink, composed of bad whisky, flavored with are market, to tickle the plate and minister to a deprayed appetite, but is a carefully and scientifically prepared compounded extract of Roots, Herbs and Barks, possessing great medical virtue. Its rare combination presents the most effectual remedy yet discovered for all diseases of the stomach, Liver, Kidneys and Bowels. Solid everywhere at Ouo Dollar per Bottle.

A Fow Words to the Ladies.

Many ladies, particularly mothers nursing, complaining of a tired, indies recling, or complete exhaustion, on arising in the meming. On the wife and mother deolves the responsibility of regulating the duties of the onschold. Her cares are numerous, and the mental a well as the physical powers are frequently called into requisition. She often finds her slightest occupation a weary task and existence a burden, while at the same weary last and extended sounded, which at the same time she has no regular disease. Hostetter's Stomach Bitters, if resorted to at this period, will prove an un-failing remedy for this annoying lassitude. The effects of this potent agent are soon seen in the rosy check and clastic step of the head of the family, as with restored health and renewed spirits she takes her accustomed place in the family circle. If this friend in need be regularly used, those depressing symptoms will never be complained of, and not only would institude not be excomplained of, can not only would institute not be ex-perfenced, but many disenses following its advent be avoided. As a medical agent it has no equal, while its pleasing flavor and healthful effects have made it a general Liverite. It is free from all properties calculated to impair the system, and its operations are at once mild.

The "PAIN KILLER" may justly be styled the great medicine of the world, for there is no re-ion of the globe into which it has not found its way, and been largely used and highly prized. Moreover, there is no clime to which it has not proved to be well adapted for the cure med and highly prized. Moreover, there is no clime to which it has not proved to be well adapted for the cure of a considerable variety of diseases. It is a speculy and various other injuries, scale, cuts, braises, wounds and various other injuries, as well as for dysentery, distributed and bowle complaints generally, it is admirably situated for every race of men on the face of the globe.

It is a very significant tier, that notwithstanding the important of the contrary, the call for it has setadly increased form its first discovery and to no previous time in the demand for it been so great, or the quantity made been so large, as it is to discovery and to no previous time than the demand for it been so great, or the quantity made been so large, as it is to discovered as the Pain children when in higher repute, or been more generally need by families and individuals, than it has been here at home, where it was first discovered and introduced. That the Pain Killer will contain to be, what we have syled it; the many approximate to be what we have syled it; the many approximate of the providence detection.

WILBUR'S EUREKT MOWER, DIRECT DRAFT. MANUFACTURED by Wilbur's Eureka Mower and Reaper Manufacturing Company, Pough-keepsle, N. Y.

Description.

The Eureka Mower has nothing in common with other machines, except the use of the ordinary cutting appa ratus.

The wheels are large and set directly back of the ends
of the cutter-bar, which is consequently directly in front of the catter-bar, which is consequently directly in roat of the machine.

The catter bar is either Four Five or Six Feet long, can be set to cut any required height, and is raised by the driver to pass obstructions with perfect case.

The machine has no bevel genting, ryang case heing need throughout. It has all the advantages of a jointed bar without its objectionable features, and readily adapts litted to the uncavenness of the ground. It gives us phenaure to be able to state, that where the Eureks has been used it is rapidly superseding the awk awardy arranged side cut machine, and we are well aware that its growing popularity has excited much opposition.

We therefore ask that the furners of the country will want against any unfavorable prejudices from the statemant of the country will be a second or the merits. CAUTION Against Purchasing a Note given for Patent, to Peter Keck, the Ono limited Bollars, as I shall not pay it unices compelled by law. Note given May 9, 1870.

We therefore ask that the farmers of the control was ments of interested parties, judging only of the merits of the machine from perenoal expertence in its use. The bar being in front, obstacles are more readily seen and avoided than when the bar is at our side, the pittan works at right angles with the kuite, consequently there is not the jar which is so unpicasant and objectionable in all machines where both are in the same line. It is always in the same relative position to the kuite, and works equally well whatever the position of the entire-bor.

It is readily thrown out of goar by hand or foot, and backs out of gear.

There is absolutely no side draft. It rides very easy, and affords greater safety to the driver than any other machine.

The borses are placed far apart, with long neck-roke and evener, and in use, the machine is driven like a side-hill plow or a horse-rake, back and forth on the same side of the piece. One horse walke in the standing grass entirely beyond the cut, pressing it down his the opposite direction, from which the next cut will be made. The other walks in the cleared track, outside the standing that machine. In grass.

Nither horses nor machine go on the cut grass, which le left nearly standing and all curs more rapidly and corenly than when a tedder is used after a side-d raf mover.

The EURERA is admirably adapted to moving side bills and lodged grass, as in both cises advantage can be taken of the most movable side of the piece or lot on which to work the machine back and forth.

It is easily managed, and with a corresponding expenditure of power, suits a such wider except than any other in use.

Price. The Eureka is so simple in construction that we are enabled to offer it at a price much below other standard, nuachlines of the same superity. OUR PRIMES FOR THE COUNTY SEASON ARE FOR CARE, No. 1 Mower, 6 feet Cutting Bar, Mammoth Size, \$150 00 Standard Size, 125 00 Baby Size, 100 00
