Sowing and Curing Corn Fodder.

Corn, planted after the first week in June, is likely to be caught by an early frost and injured. Rather than plant later than this period, it would be much better to sow it for fodder. One acresown with three bushels of corn, in drills three feet apart, and kept well cultivated, against the street of the stranger proceeded:

"Well, judge, you see the facts in the case are this: I was travelin' along with a stranger large la will yield as much feed on land of equal we make the control of the control o course this must have been on exceedingly and cum along alone, but I got to thinking rich land; but why could not any farmer make one or two acres rich enough to do this for himself? We have cut at the rate of four tons per acre, and the crop did not look well enough to satisfy us. If the god is depended at the rate of twelve weigh a pound, which they should do it the dollar i took from my partner, and five or six feet high, and as thick as one's little finger, the crop would yield nearly seven tons per acre. As soon as the bloss soon appears, the stalks should be cut up are crediled, and permitted to lie for a coup- them has the stalks are then he geth. seven tons per acre. As soon as the blossion appears, the stalks should be cut up are credied, and permitted to lie for a couple of days to wilt; they may then be gathered into small bundles, tied up, and shocked, well spread, and opened at the an important point. Corn-stalks, thus grown, will contain much sugar, and need to be perfectly well cured, or fermentation will set in and sourness and mold occur.

Judge, if you'll have me hung."

The judge told the stranger to make himself comfortable over at the hotel until he could send some men down the road to investigate the matter, and if they found the body he would call a jury and try the stranger as was desired. The dead man being found the judge summongrown, will contain much sugar, and need to investigate the matter, and if they found the body he would call a jury and try the stranger as was desired. The dead man being found the judge summongrown, will contain much sugar, and need to investigate the matter, and if they found the body he would call a jury and try the stranger as was desired. The dead man being found the body he would call a jury and try the stranger as was desired. The dead man being found the body he would call a jury and try the stranger as was desired. The dead man being found the body he would call a jury and try the stranger as was desired. The dead man being found the body he would call a jury and try the stranger as was desired. The dead man being found the body he would call a jury and try the stranger as was desired. The dead man being found the body he would call a jury and try the stranger as was desired. The dead man being found the body he would call a jury and try the stranger as was desired. The dead man being found the body he would call a jury and try the stranger as was desired. will set in and sourness and mold occur. the store they would give him a trial. When sufficiently cured, the stalks may The stranger appeared immediately foot long nailed to them, to keep them apart and make a sort of pipe. This must be set up in the center of the stack, and the stalks placed round it, bits outward. If they should be put away in a mow, two such ventilators must be provided. The top must be kept open or only lightly covered, as much damp air will escape. Such fodder will be found equal to ordinary hay; in fact, better than most hay. Cut up with a stalk-cutter, wetted, and sprinkled with a handful of meal—or corn and oats ground togeth of meal-or corn and oats ground togething cows will improve by changing to ble." such feed. Working horses may be kept in good condition on three quaris of meal the judge asked him if he wasn't satisfied, and a bushel of fodder at a feed, equally If there was anything he could do for well as on hay and grain. 'A still greater economy might be secured by steaming; but with a small stock, and on average sy," said the stranger, "but havin' the ager farms, this process is impracticable.

Memprovement of the Soil by Mechanical Means.

Tat must be evident to every one that, other things being equal, the permanently productive capacity of the soil will bear a direct proportion to its depth. By deepening the soil the cultivator can change the character of the land itself, and also alter both its physical qualities and change its chemical constitution, and thus fit it for bearing other kinds of plants than those which would be found naturally growing upon its surface; if those should be considered desirable, he can very easily increase their productive-ness. But he cannot deepen the soil with-out increasing his labor, which is the first consideration of the farmer, especially here where it bears so high a proportion compared with other countries; and in no other branch of business is the strictest economy so essential to success as in to the uninitiated. the one we are treating of. But here science comes to his aid and warrants the outlay, and suggests that, if he deepen his soil, his plants will have a wider range for their roots in search of food which hill give increased growth, that the portion of the subsoil brought to the surface which previous, perhaps hurtful properties are altered and washed out, that in times of drouth those roots can seek the grateful moisture which is being condensed from the atmosphere within its cooler depth; and he finds his account in the increased product of his crop.

The same science will suggest the frequent stirring of the soil to expose fresh particles to atmospheric influence, the use of the subsoil plow, and, where necessary, draining which has been attended with so much benefit wherever employed. Again the cultivator can improve his soil mechanically by the use of a different kind of earth from the one to be improved. Fifty loads of stiff clay to the acre, applied in the fall, to a light sand, to be ughed in the spring, and one hundred loads of sand applied to heavy clay land, and spread any time before ploughing, will be found to have very beneficial effects, and this mixing of soils, where necessary materials are not too far apart. (which very frequently is not the case) affords of the cheap means of improving the soil, especially as the operation can be carried on at such times when the hands and teams might otherwise be idle. A still further advantage attending this method is, that twenty per cent. less of manure to the acre will be attended with results in the production of a crop.-Journal of Chemistry.

How to Keep Cellars Warm.

American. The experiment was tried by tanuing them until October, 1872. house, in which on several occasions vegetables have frozen, although the cellar was fortified against frost by a process known to the farmers as "banking." The walls and ceilings were pasted over with may be a very dry night. four or five thickness of old newspapers. The color of the wind curtains of the same material being pasted over the small low window on the top of the cellar. The paper was pasted to the bare joist over head, leaving an air space between them and the floor. He reports that the papers carried his roots bell-weather when the church bells are reports that the papers carried his roots through last winter, though the cellar was ringing.

Ayer's Cherry Pectoral, For Diseases of the Throat and Lungs, such as Coughs, Colds, Whooping Cough, Brenchitis, Asthma, and Consumption.

Cough, Bronchitis, Ashma, and Consumption.

Probably never before in the whole history of medicine, has anything won so widely and so deeply upon the confidence of mankind, as this excellent remedy for pulmonary complaints. Through a long series of years, and among most of the races of men it has risen higher and higher in their estimation, as it has become better known. Its uniform character and power to cure the various affections of the lungs and throat, have made it known as a rollable protector against them. While adapted to milder forms of disease and to young children, it is at the same time the most effectual remedy that can be given for incipient consumption, and the dangerous affections of the throat and lungs. As a provision against sudden attacks of Croup, it should be kept on hand in every firmily, and indeed as all are sometimes subject to colds and coughs, all should be provided with this antidote for them.

Although settled Consumption is thought incurable, still great numbers of cases where the disease seemed settled, have been completely cared, and the patient restored to sound health by the Cherry Pectoral. So complete is its mastery over the disorders of the Lungs and Throat, that the most obstinate of them yield to it. When nothing else could reach them, under the Cherry Pectoral they subside and disappear.

Singers and Public Speakers find great protection from it.

Asthme is always relieved and often wholly cured by it.

Asthme is always relieved and often wholly cared by it. Bronchitis is generally cured by taking the Bronchitis is generally cured by taking the Cherry Pectoral in small and frequent doses. For a Comph and Cold, no better remedy can be had. Take small doses three times a day and put the fect in warm water at night, until the disease is broken up.

For Influence, when it affects the threat or lungs, take the same course.

For Whooping Cough, give small doses three or four times a day.

For Crosp, give large and frequent doses until the disease is overcome.

the disease is overcome.

No family should be without the Cherry Pectoral on hand to protect them, in case of attack, from the above complaints. Its timely fire often spares the patient a great amount of suffering and risk, which he would incur by waiting until he could get other aid. Parents, keep it in your houses for the exigencies that arise. Lives dear to you may be saved by it.

may be saved by it.
So generally are its virtues known, that we need
not publish certificates of them here, or do more
than assure the public that the best qualities it over possessed are strictly maintained.

Prepared by Dr. J. C. AYER & Co., Practical and Analytical Chemists, Lowell, Mass., and sold all round the world.

Sold by Abel Turrell, and Burns & Nichols Montrose, and all druggists and dealers every-where. | Dec. 21, 1870--y

Dr C. F. BROWN'S

YOUNG AMERICAN LINIMENT

In offering this Liniment to the public, as we do in fall confidence, that it must supercede all others now in one, as an internal remedy, for the cure of all diseases is the reach of that class of needless we can safely assert, without the least fear of contradiction, that it stands unrivaled in the list of medical remedies the cure of disease. Feeling therefore that it is unnecessary to pad a research of the cure of disease. Feeling therefore that it is unnecessary to pad a research of embending wonderful in its effects, so mysteriously in hillible in its powers of relief, causing the dearful order that he belief to see, the ster you, drawn and cripped and enumatic to walk erect and rejoined soft of the public on its own merits, and claims or volcanic origin or essential oils of the Arabi an deserts; but on the contrary is what its imports, and is a rare combination of the powers of North American products.

New York, Dec. 14, 1870. This notice is to inform all dealers in proprietary medicines, that we have established a Depot in Susque-hanns county at Montrose, Pa., for the sale of Dr. C. P. Brown's Young American Liminent, and that Mr. A. BALDWIN is our agent for that purpose.

H. T. HELMBOLD'S EXTRACT BUCHU Cures diseases arising from imprudence, habits of dis-ipation, etc., in all their stages, at little expense, little or no change in diet, no inconvenience, and no exposure it causes a frequent desire, and gives strength to urinate hereby removing obstructions, preventing and curinate irictures of the Urethra, allaying path and inflammation to frequent in this class of disease, and expelling al strictures of the Ureura, and disease, and expelling all poleonous matter.

Thousands who have been the victims of incompetent persons, and who have paid heavy fees to be cured in a short time, have found they have been deceived, and that the "poison" has, by the use of "powerful as ringents," been dred up in the system, to break out in a more aggravated form, and perhaps after marriage.

USE IBLIMBOLD'S EXTRACT BUCHU for all affections and diseases of the Urinary Organs, whether existing in Male or Female, from whatever cause originating, and no matter of how long standing. Price, One Boliar and Fifty Cents per Bottle.

L

HENRY T. HEMBOLD'S IMPROVED ROSE WASH. IENRY T. HEMBOLD'S IMPROVED ROSE WASH.
cannot be surpassed as a Faco Wash, and will be found
the only specific remedy in every species of Cutameous
Affection. It specify radicates Pimples, Spots,
Scrobutic Drynnes, Indurations of the Cutameous Membrane, etc., dispels Redness ard Incipient Inflammation,
Hives, Rash, Moth Patches, Drynnes of Scalp or Skin,
Frost Bites, and all purposes for which Saives or Ointments are used; restores the skin to a state of purity
and softness, and intures continued healthy action to
its vessels, on which depends the agreeable clearness
and vivarity of complexion so much sought and ad
mired. But however valuable as a remedy for existing
defects of the skin, H. T. Hembolt's Rose Wash has
long sustained its principle claim to unbounded patronage, by possessing qualities which render it a toflet appendage of the most Ruperiative and congenial charater, combining in an elegant formula prominent requisites, safety and efficacy—the invariable accompaniments of its use as a Prescrvative and liferesher of the
complexion. It is ac excellent Lotion for diseases of a
Syphilitle Nature, and as an injection for diseases of a
Syphilitle Nature, and as an injection for diseases of a

A GREAT MEDICAL DISCOVERY Dr. WALKEE'S CLLIFORNIA VINEGAR BITTERS

THRY ARE NOT A VILE FANCY DRINK, gade of Poor Russ, Whiskey, Proof Spirits and Refuse Liquors doctored, spiced and sweet-end to please the isste, called "Doics," "Appeti-ers," "Restorers," ac., that lead the tippler on to ers," * Restorers," &c., that lead the tippler on to frenkenness and rein, but are a true Medicine, made from the Native Roots and Herbs of California, free from all Alcoholic Stimminnts. They are the GREAT BLOOD PUBLIFIER and A LIFE GIVING PRINCIPLE a perfect Renovator and Invigorator of the System, carrying off all poisonous matter and restoring the blood to a healthy condition. Fo person can take these Bitters according to direc-tion and cremain long unwell.

tion and remain long unwell.

\$100 will be given for an incurable case, provided
the bones are not destroyed by mineral poison or
other means, and the vital organs wasted beyond the

point of repair.
For Inflammatory and Chronic Rhenma-For Inflammatory and Chronic Rheuma-tism and Gout, Dyspepsin, or Indigestios, Billous, Remistent and intermittent Fovora Bladder, these Bitters have been most successful. Buch Diseases are caused by Vitiated Blood, which is generally produced by derangement of the Digestive Organs. DYSPEPSIA OR INDIGESTION, Read gebs, Fain in the Shoulders, Coughs, Tightness of the

DYSPEPSIA OR INDIGESTION, Read sche, Pain in the Shoulders, Coughs, Tightness of the Chest, Dixsniess, Sour Errectations of the Stomach, Bad taste in the Mouth, Billous Attacks, Palpitation of the Heart, Inflammation of the Lungs, Pain in the regions of the Kidneys, and a hundred other painful symptoms, are the offsprings of Dyspopsia. They invigorate the Stomach and stimulate the torpiditiver and bowels, which render them of unequalited efficacy in cleaning it he blood of all impurities, and imparting now life and vigor to the whole system. FOR SKIN DISKASES, Eraptions, Tetter, Sali Rheum, Blotches, Spots, Pimples, Pustules, Bolls, Carbuncles, Ring-Worms, Scald-Head, Sore Eyes, Eyrspelas, Itch, Securit, Discovariations of the Skin, Humors and Discasce of the bkin, of whatever name or nature, are literally dug up and carried out of the system in a short time by the use of thece Bitters. One bottle in such cases will convince the most incredulous of their curative effect.

Cienne the Vitiated Blood whenever you find its impurities bursting irrough the skin in Primples, Eraptices.

Cicense the Villard Blood whenever you man is impurities bursting brough the skin in Fimples, Eruptions or Sores; cleanse it when you find it obstructed and stuggish in the veins; cleanse it when it is fort, and your faelings will tell you when. Keep the blood pure and the health of the system will follow.

PIN, TAPE and other WORMS, lurking in the system of so many thousands, are effectually destroy-

system of so many thousands, are effectually destroy-ed and removed. For full directions, read carefully the circular around each bottle, printed in four lan-guages—English, German, French and Spanish. J. WALKER, Proprietor. R. H. McDONALD & CO., Druggists and Gen. Agents. San Francisco, Cal., and 21 and 31 Commerce Street, New York.
