The Larm and Lireside.

Fall Care for Asparagus. Much of the value of asparagus beds depend upon the care they receive in the fall as a preparation for wintering. As early as the stalks begin to turn yellow, they should be cut, dried, and placed in a pile, and burned. Too much care cannot be taken to prevent them from falling upon the bed, becoming covered with soil, germinating in spring, as these young plants render the roots too thick in the bed, and being near the surface will make but feeble growth, and be of little if any value, but rather a detriment to the rest of the

After the removal of the stalks, cover In Texas he drew immense audiences at the bed with a coat of good fine manure, and fork it into the soil, down to the crewn of the plants. This manure, acted upon by the fall rains, will wash down among the roots, giving them the food necessary for spring growth, increasing the size and earliness of the stable.

stalks.

Just before the setting in of winter, cover the bed several inches thick with coarse stable little, to remain as a pro-tectin from frost, and by its decomposition and washing down add to the fertility of the soil. Plants that have been set but one or two years and before they come to cutting regularly may be covered with a few inches of good soil taken from the sides of the bed would injure the spreading roots. The winter covering may be stirred in Spring, the coarser straw raked off and the fine manure forked into the bed. This treatment annually will insure a good supply of early, succulent and large asparagus.—Ez.

Hand-Threshed Wheat for Sowing. S. C. Plattee, of Warner, N. H., in a communication to the New England Farmer, gives the result of an experi-ment in sowing seed threshed with a machine alongside with some threshed by hand. If his conclusions are correct, it stands the furmers in hand to be care-

There is no trouble in raising good wheat in New Hampshire if we sow good seed and sow it early. Three bushels of my seed were threshed with a flail, the my seed were threshed with a flail, the other six with a machine. From careful estimates the part of the field sown with seed threshed by hand yielding 33 per cent more to the acre than their machine-threshed being called the machine-threshed being called the machine-threshed being called the machine-threshed the machine threshed being called the machine. seed threshed by hand yields.

cent. more to the acre than the machine-threshed, being earlier, thicker, and better in every way. In threshing for seed I thresh the tops of the bundles lightly without opening. In this way I get the earliest and best kernels for seed. The late imperfect, and short heads are in the late imperfect him with a crossed late in the late has a crossed him with a through the machine and allow the threshers for what I thresh off.

Care of Tools,

worse than wasted by the agriculturalists beaux in the vestibule of a foshionable of this country in their senseless lack of Washington church to the tune of "Come care of tools. They think (or seem to the time of the will not affect it, and so both are left standing where they were last used until the next season comes, and so of nearly all the implements on the farm. All this is wrong. One of the best farmers east of the Hudson expended, ten years ago, one hundred dollars on a shed thirty-feet one hundred dollars on a shed thirty-feet plished. It consists simply in rubbing the bridge of the nose with beeswax. wagon, sled, mowing machine. ploughs, hoes, and chains, could be kept when not wagon, sied, mowing machine, ploughs, hoes, and chains, could be kept when not in use. His implements are as good now as they were then, with the exception of as they were then, with the exception of the ordinary methods the inevitable wear which their use involves, and in the opinion of the owner, the building has saved him at least twenty per cent. of its cost each year. The same roof can be many times made to cover a loft which can be used as a granary, or for some other purpose which the business done upon the farm may make ences, Mrs. Lincoln has been interviewing

well known breeder of Short Horn cattle and Leicester sheep, in the course of some remarks at his letting of the latter, touching on breeding in general, he said:

A HINT TO BREEDING.—Mr. Torr, the where she met adistinguished clairvoyant physician with whom she was 50 well pleased that she intends in a few weeks to put herself under his chargo, as she is in very poor health. some remarks at his letting of the latter, touching on breeding in general, he said:

"The way to establish uniformity of family likeness is to begin by putting the best male to the heat remale, and to put the best to the best;" secondly, "not to put opposite characters togethers, or the traits of both will be lost; but if any fresh characteristic is required to be imparted to the issue of present stock animals, this must be done by degrees, or by that discrect selection which will yield a little more wool, or size and substance, the first year, and a little more and more the second and third generations, and so the second and third generations and second and third generations, and so the second and third generations and second and third generations. As an an extremely brilliant affair. The bride was an extremely brilliant affair. The bride was an extremely brilliant affair.

sittle more wool, or size and substance, the first year, and a little more and more the second and third generations, and so on."

UNDERDRAINING LAND—Its Effect.
—Experiments in underdraining land were made in Scotland last year for the purpose of determining the effect on the temperature of the soil, compared with that in the same vicinity which was not drained. The result was that the draining raised the temperature 1.5 degrees, equal to a removal of the land from one hundred and fifty miles south. This is an important considera-

hundred to one hundred and fitty miles south. This is an important consideration connected with compact, heavy soils, whose retentiveness of water renders them cold and comparatizely incert with respect to vegetation. Draining land involves considerable expense, but its increased preductiveness soon repays this, besides assuring increased profits for the future.

FEEDING CATILE IN THE FALL—Not a few farmers, fearing the long winter, fail to begin to feed their cattle, until the time to do so is far over past. Such a

Flunkeyism and Clothes.

time to do so is far over past Such a course is nuwise for two reasons. The pastures and meadows are eaten into the earth, leaving no protection for the winter, which all plants need, and, what is worse, cattle that begin the season poor require more food to take them through than those in good order, and the suppose saving of a few hundred pounds of hay in the fall involves the feeding of an equal, if not larger quantity, m order to regain in March and April what is lost in November. We suggest that the very day cattle fail to fill themselves from the fields they have hay or corn stalks to supply the deficiency.

LIBERALITY IN FARMING.—In this art, and almost in this art alone, "it is the liberal hand which maketh rich."

Liberality in providing utensils is the saving both of time and labor. The more perfect his instruments the more profitable are they.

So also is it with his working cattle and his stock. The most perfect in their kinds, are ever the most perfect his industry upon the finance of the production of the production of man's successful his industry upon the finance of the production of man's successful his industry upon the finance of the production of the produ

Ayer's Sarsaparilla

Is widely known as one of the most effectual remedies ever discovered for cleansing the system and purifying the blood. It has stood the test of years, with a constantly growing reputation, based on its insic virtues, and sustained by its re-

intrinsio virtues, and sustained by its ro-markable cures. So mild as to be safe and beneficial to children, and yet so scarching as to effectually pure out the great cor-ruptions of the blood, such as the scrofulous as to effectually purge out the great corruptions of the blood, such as the scrofulous
and syphilitic contamination. Impurities,
or diseases that have furked in the system
for years, soon yield to this powerful antidote, and disappear. Hence its wonderful
cures, many of which are publicly known,
of Scrofula, and all scrofulous diseases,
Ulcers, Eruptions, and eruptive disorders of the skin, Tumors, Blotches,
Boils, Pimples, Pustules, Sores, St.
Anthony's Fire, Rose or Erysipolas, Tetter, Salt Rheum, Scald
Head, Ringworm, and internal Ulcerations of the Uterus, Stomach,
and Liver. It also cures other complaints, to which it would not seem especially adapted, such as Dropsy, Dyspepsia, Fits, Neuralgia, Heart Disease,
Female Weakness, Debility, and
Leucorrhœa, when they are manifestations of the scrofulous poisons.

It is an excellent restorer of health and
strength in the Spring. By renewing the
appetite and vigor of the digestive organs,
it dissipates the depression and listless languor of the season. Even where no disorder
appears, people feel better, and live longer,
for cleansing the blood. The system moves
on with renewed vigor and a new leaso of
life.

Practical and Analytical Chemists. SOLD BY ALL DRUGGISTS EVERYWHERE.

appearance. A. A. Hayes, M.D., State Assayer of Massachusetts, says, "The constituents are pure, and carefully selected for excellent quality; and I consider it the BEST PREPA-EATION for its intended purposes." Sold by all Druggists, and Dealers in Medicines, Price One Dollar.

Buckingham's Dye. FOR THE WHISKERS.

As our Renewer in many cases requires too long a time, and too ch care, to restore gray or faded Whiskers, we have prepared this dye, in one preparation; which will quickly and effectually accomplish this result. It is easily applied, and produces a color which will neither rub nor wash off. Sold by all Druggists. Price Fifty Cents. Manufactured by R. P. HALL, & CO., NASHUA, N.H.

PREPARED BY Dr. J. C. AYER & CO., Lowell, Mass.,

Every year increases the popularity of this valuable Hair Preparation; which is due to merit alone. We can assure our old patrons that it is kept fully up to its high standard; and it is the only reliable and perfected preparation for restoring Gaussian ed preparation for restoring Gnar OR FADED HAIR to its youthful color, making it soft, lustrous, and silken. The scalp, by its use, becomes white and clean. It removes all eruptions and dandruff, and, by its tonic properties, prevents the hair from falling out, as it stimulates and nourishes the hair-glands. By its use, the hair grows thicker and stronger. In baldness, it restores the capillary glands to their normal vigor, and will create a new growth, except in extreme old age. It is the most eco-nomical HAIR DRESSING ever used, as it requires fewer applications, and gives the hair a splendid, glossy

Sold by Abel Turrell, and Burns & Nichols, Montrose, and all druggists and dealers every-where. | Dec. 21, 1870—y

AVINEGAR BITTERS\

Bitters.

Mechanical Diseases. Persons engaged in Paints and Minerals, such as Piumbers, Tyre-setters, Gold-beaters, and Miners, as they advance in life, with be subject to paralysis of the Bowels. To guard against this take a dose of WALE-CHARLES BITTERS more or twice a week, as YAFC-

complaints, Dr. WALKER'S VINEGAR DITTERS, which are purely vegetable, and may be asked price to the most delicate, are a sovereign and speedy remedy.

Dr. Walker's California Vinegar Hitters act on all these cases in a similar meaner. By purifying the Blood they remove the cause, and by resolving away the effects of the inflammation (the tubercular deposits) the allected The properties of Dr. Walker's Vinegas Bitters are Apericut, Diaphoretic and Cammative, Nintnitous, Lazarive, Dioretic, Sedative, Counter-Irriant. Sudorific, Alterative, and Anti-Bilous.

The Apericut and mild Laxative properties of Dr. Walkers's Vinegas Bitters, and southing properties protect the humors of the fances. Their Sedative properties alizy pain in the nervous system, stomach, and howels, either from inflammation, wind, colic, camps, etc. Their Counter-Irriant inhoence extends throughout the system. Their Did in the nervous system, stomach, and howels, either from inflammation, wind, colic, camps, etc. Their Counter-Irriant inhoence extends throughout the system. Their Did in the nervous system, stomach, and howels, either from inflammation, wind, colic, camps, etc. Their Counter-Irriant inhoence extends throughout the system. Their Diuretic properties act on the Kidneys, correcting and regulating properties act on the Kidneys, correcting and regulating properties act on the Kidneys, correcting and regulating the flow of onine, Their Anti-Ullious properties at the section of his, and to distanges through the bilary duck, section of his, and the distanges through the bilary duck, server for the properties of the Counter-Private of the Counter-Private

has been experienced by minureau to nontands, and nontrols of thousands more are asking for the same relief.

Directious.—Take of the Bitters on going to bed at night from a half to one and one-half wine-glassfall. Est good nourishing food, such as beefstack, notion chop, venion, roast beef, and vergetasies, and take out-door exercise. They are composed of purely vegetable ingredients, and contain no smith.
