Timely Suggestions. vest, and preparation made for the approaching season of winter and rest, the observing person will see wherein there is a difference in management. The thor-ough farmer will begin in season to pre-pare his ground—and it is well done—for sowing his grain or grass seed, and all is done in the very best manner and in good time; the seed comes up and the young plants make a good and suitable growth fields and crops less than where less pains are taken, and the plants obtain a less strong growth, are less healthy and consequently less able to resist the numerous

quently less able to reast the numerous enemies, accidents, &c., to which they are liable or subject to naturally.

His stock, instead of being allowed to lie in pasture as long as they can find anything they can pick and consume, are brought to the barn, nights, and fed there as soon as the pasture feed begins to fail, and a considerable accumulation of manuer results. Instead of depending upon as soon as the pasture feed begins to fail, and a considerable accumulation of manure results. Instead of depending upon his pasture and hay fields entirely, he has the forethought to grow soiling crops to feed when his pastures begin to fail, roots, &2, to feed in winter, when other natural green feed is unobtainable and the stock of the st green and succulent and a part dry, so large brown eyes, the broad forhead, the that instead of the system having to endure the shock of a sudden change it is gradually accustomed thereto and all the while there is a gain of weight, size and thrift. The green fodder, roots, &c., cause the dry have and follow, better pinched and hollow cheeks, and his his endurance with the dry have and follows to be the dry a new or the dry have and follows to be the dry a new or the dry have and follows to be the dry and the follows to be the dry and the follows to be the dry and the dry and the follows to be the dry and the follows the broad forhead, the mass of tangled nut-brown curls, the pinched and hollow cheeks, and his his constant. the dry hay and fodder to better relish and assimilate into the system to answer the purpose of feeding. Such is experi-ence, and we would carnestly advise all "You ca farmers, in bringing their stock into win-ter quarters, to make the change from green to dry feed gradual.

The corn, potatoes and roots are the

ter quarters, to make the change from green to dry feed gradual.

The corn, potatoes and roots are the latest crops harvested and often are negacted, but our farmer of the "period" is up to the time and secures them in advance of the inclemency of the scason. He husks and cribs his corn soon as the stalks are cured and the grain is matured; the stalks are brought to the stock-yard and stacked convenient for feeding; the stacks are put up secure against rains, wind and snow, and well thatched to shed rain, &c. The seed corn is selected, as few A long shrill whistle, and a short, perwind and snow, and well thatched to shed rain, and well-moulded.

A long shrill whistle, and a short, perof the inside husks left on, stripped down, and the ears braided in tresses by these of convenient size for handling, &c., and hung in some dry, airy loft where there will be no freezing before cured, heat dampness or other accident likely to impair with its near thanks.

"It will, lady, I will."

"I will, lady, I will."

"I will, lady, I will."

"I will you read it, Johnny?"

"I will you read it, Johnny?" necessary for well-keeping, secure from asked His love for this destitute, tender-vermin, and suitable securing, drying, &c.

His nearrose are due as soon as thorough. A month since, I made the same journey, and passed over the same railroad; hours to dry before picking up, are then and what was my surprise to see the same assorted as picked up, or all gathered into boy, taller, healthier, with the same clear, storehouse—those for seed being selected of medium size, well formed and ripened, possessing all the characteristics of the variety. If he stores them in the cellar that are not in harrels have are him in the cellar that are not in harrels have are him in the cellar that are not in harrels have are him in the cellar that are not in harrels have are him in the cellar that are not in harrels have are him in the cellar that are not in harrels have are him to the little book, and pure, clear voice!

"I have thought of you, hady; I wanted to tell you it is all owing to the little book, and pure, clear voice!

"I have thought of you, hady; I wanted to tell you it is all owing to the little book, and pure, clear voice!

"I have thought of you, hady; I wanted to tell you it is all owing to the little book, and pure, clear voice! they are put in barrels, boxes or bins, in not very large, deep bulks, three feet being deep as allowable—and the cellar is kept well ventilated, cool and dark. If they are to be marketed they are assorted as picked up and loaded into cart or harrelled—every handling increases their cost—each sort and size are kept separate, as they are picked, stored &c. Seed potatoes keep as well as any way headed up in flour barrels and set on timbers in the cellar; the barrels may be piled up or otherwise. If his roots or potatoes are buried in the ground for keeping, he selects a dry, well drained spot, excavates a trench, of size compared to the quantity they are put in barrels, boxes or bins, in Johnny?" trench, of size compared to the quantity of was gone.

to be stored, not over three feet deep—less "It is all the little book," sounds in my to be stored, not over three feet deep—less is better—fills and covers with six to eight inches of dirt, packing and smoothing off with a regular slope from the apex or ridge—the trench is best not over four slave to strong drink, hope was in the feet wide and made longer, if necessary, to be of sufficient capacity; and where closed in with a righting of the children. closed in with a whisp of straw, in the ridge or apex, to let off steam; upon the approach of freezing these may be made mothers who weep over the ruin of their

Facts in Agriculture.

Facts in Agriculture.

Proof. Samuel W. Johnson, of Connections, in a late lecture presented some very interesting auguestions which some twenty interesting auguestions which some proposed which is a late lecture presented some proposed whose attention we have often anged the absolute necessity of understanding some simple parts which lie at the foundation of all good bushandry. One of these is that the land, like the animal creation, requires to be fed to keep it up to its full ability to give forth its powers of production. The nature of food and plants or the soil to applications to the plants or the soil for the plants or the soil for the mistake which would be made of furnishing to the horse the food of man, and vice versa.

To understand aright the freatment of the soil Proof. Samuel W. Johnson, of Con-

atmosphere the necessary supply of ni-

trogen.
"The process for making soil fertile thousand years; To the progressive, thorough, practical farmer, the successive season brings its peculiar daties; so also to all, whether they are of progressive order or those who follow in the "ruts," and in the fall of the year, when crops are to be harvested, stock to be brought up from pasture to the barn, grain and seed to be sown for future harvest, and preparation made for the approaching season of winter and rest, the

crop. They act upon the soil to make avalable what was dormant before. Salt affects the minerals of soil, as as olvent, more powerfully than water, and liberates potash, lime. magnesia, or other

matter that was before its application. Proof. Johnson affirms that farm crops time; the seed comes up and the young plants make a good and suitable growth before winter sets in and as a consequence; they come out in spring strong, ready to commence an early growth. Insects and other enemies, or accidents, trouble such fields and crops less than where less pains stirring the soil and exposure of it to the atmosphere will place it in a condition to receive the free nitric acid from the atmosphere for the benefit of the land, and at the same time renders soluble matter in the earth not available. Balt. Amer.

Our Boys and Girls. The Little Book.

are dependent entirely upon the dry feed voice so low and musical, its clear, pure laid in store for their provision. In tones mellow as a flute, and tender as onchanging from green pasture to dry win-ter feed the change is gradual, a part up hallowed memories. One look at the

Is claimed by our best Judges, to meet the necessity to long felt, of a Convenient, Practical, Purable Gate, so indowed by the hishest authority in America, annitrely different from and has many advantages over any other Gate ever invented. Is Cheap and early constructed and for convenience cannot fall to please all. Can be opened and closed without the opporator changing his position, lifting or pulling a pound, and if desirned and be easily arranged to be opened and closed without on the satisfarmany of the convenience in the properties of the pr

O into general use, GEO. S. MACKEY, Proprietor-Micholson, Wyoming Co., Pa

Every year increases the popularity of this valuable Hair Preparation; which is due to merit alone. We can assure our old patrons that it is kept fully up to its high standard; and it is the only reliable and perfect-ed preparation for restoring GRAY OR FADED HARB to its youthful color, on FADED HAR to its youthin color, making it soft, lustrous, and silken. The scalp, by its use, becomes white and clean. It removes all eruptions and dandruff, and, by its tonic properties, prevents the hair from falling out, as it stimulates and nourishes the hair stands. By its use the hoir out, as it stimulates and nourishes the hair-glands. By its use, the hair grows thicker and stronger. In baldness, it restores the capillary glands to their normal vigor, and will create a new growth, except in extreme old age. It is the most eco-nomical HAIR DRESSING ever used, as it requires fewer applications. as it requires fewer applications, and gives the hair a splendid, glossy appearance. A. A. Hayes, M.D., State Assayer of Massachusetts, says, "The constituents are pure, and carefully selected for excellent quality; and I consider it the BEST PREPA-BATION for its intended purposes."

Sold by all Drugglets, and Dealers in Medicines.

Price One Dollar.

Buckingham's Dye.

FOR THE WHISKERS.
As our Renewer in many cases requires too long a time, and too much care, to restore gray or faded Whiskers, we have prepared this dye, in one preparation; which will quickly and effectually accomplish this result. It is easily applied, and produces a color which will neither rub nor wash off. Sold by all Druggists. Price Fifty Cents. Manufactured by R. P. HALL, & CO., NASHUA, N.H.

Ayer's Sarsaparilla

Is widely known as one of the most effectual remedies ever discovered for

as one of the most effectual remedies ever discovered for cleansing the system and purifying the blood. It has stood the test of years, with a constantly growing reputation, based on its intrinsic virtues, and sustained by its remarkable cures. So mild as to be safe and beneficial to children, and yet so searching as to effectually purge out the great corruptions of the blood, such as the scrofulous and syphilitic contamination. Impurities, or diseases that have lurked in the system for years, soon yield to this powerful antidota, and disappear. Hence its wonderful cures, many of which are publicly known, of Scrofula, and all scrofulous diseases, Ulcers, Eruptions, and cruptive disorders of the skin, Tumors, Blotches, Boils, Pimples, Pustules, Sores, St. Anthony's Fire, Rose or Erysiposins, Tetter, Sait Rheum, Scaid Head, Hingworm, and internal Ulcerations of the Uterus, Stomneh, and Liver. It also cures other complaints to which it would not soon especially adapted, such as Dropsy, Dyspepsia, Fits, Neuralgia, Heart Disease, Female Wealmess, Dechility, and Leucorrheen, when they are manifestations of the scraftlous poisons.

It is an excellent restorer of health and strength in the Spring. By renowing the appetite and vigor of the digestive organs, it dissipates the depression and listless languor of the season. Even where no disorder appears, people feel better, and live longer, for cleaning the blood. The system moves on with renewed vigor and a new lease of life.
