Farm and Fireside.

Milch Cows and Cold Water.

The extreme sensitiveness of the mammary functions in cows to the influences of cold, fatigue, excitement, unpleasant odors, etc., is indeed surprising. We have been greatly interested in observing the effects of cold upon the milk secretion as seen in the herd of cows upon the farm.

During the summer, in hot days in July and August, the animals resorted to the Lake to drink, and after slaking their thirst, they would wade into the water and remain sometimes an hour or two with the legs immersed. This habit it was found invariably diminished the flow of milk at night, and in order to learn the extent of the diminution careful observation was made. It was ascertained that standing in the water an hour diminished the flow to the amount of 8 or 10 quarts in a herd of thirteen cows. The loss was so great that whenever they resorted to the water they were driven away to the pasture again at once. We have learned that from simply turning the herd into the yard upon a cold day in winter, and allowing them to remain fifteen minutes, the flow of milk was diminished to a serious extent, and consequently the animals are not allowed to leave the warm stable, during the entire winter, except for a brief period upon warm, sunshiny days. Water is brought directly from a well into the barn, and the drinking vessels are arraigned so that the animals have to move but a step or two to supply their wants. The nature of the water supply, and conveniences of access, are most important points in the management of milch cows. A draught of ice-cold water, taken by a cow in winter, cuts short the milk yield for the day from one to two pints. Well water drawn into vessels, and allowed to stand a few hours covered, in the warm barn, has its temperature raised several degrees, and this practice should be adopted by all thrifty farmers. It would undoubtedly pay well to slightly warm the water, but this is attended with considerable inconvenience where large herds are kept, unless steam apparatus is used. The influence of a cold current of air, and cold drinking water, upon cows in milk, is not of a transient nature; it extends for a longer period than a day or a week. Many fine animals are ruined by careless exposures every year, and self-interest and feelings of humanity should prompt all cow owners to keep diligent watch over their welfare and comfort.—*Journal of Chemistry.*

The Production of Cereals.

The statistics of the grain movement in the various western ports, during the past year, have been published, and are of little interest. At Chicago there were received 71,261,563 bushels of corn, wheat and oats, against 71,082,208 bushels in the preceding year. The increase in the quantity shipped was much more marked, the figures being 71,772,226 bushels in 1872, and 51,772,226 bushels in 1871. The total receipts of all kinds of grain at Chicago were 76,586,736 bushels in 1872, against 77,162,406 bushels in 1872, and—only 52,485,408 bushels in the previous year. The flour trade seems, however, to be declining, the receipts having fallen off nearly a million of barrels since 1869.

At Toledo, where the grain trade is comparatively new, the receipts in 1872 were 20,819,956 bushels of all kinds of grain. The flour trade increased considerably. At milwaukee 18,782,672 bushels of grain were received.

It appears therefore, that 100,000,000 bushels of grain, to say nothing of flour and other breadstuffs have passed through these three ports during the last twelve months. It is difficult to conceive so vast an amount, but one obtains from it some idea of the immensity of the nation's resources in the Mississippi Valley alone. It is a curious fact, that the prevalence of the horse distemper occasioned the falling off of more than a million bushels in the receipts of wheat at Milwaukee, the farmers having been unable to move their crops from the interior of the State.

Best Time for Painting Houses.

The best time for painting the exterior of buildings is late in autumn during the winter. Paint then applied will endure twice as long as when applied in early summer or in hot weather. In the former it dries slowly and becomes hard, like a glazed surface, not easily affected afterwards by the weather, or worn off by the beating storms. But in very hot weather in the oil in the paint soaks into the wood at once, as into a sponge, leaving the lead nearly dry and nearly ready to crumble off. This last difficulty, however, might in a measure be guarded against, though at an increase expense, by first going over the surface with raw oil. By painting in the cold weather, one annoyance might certainly be escaped, namely, the collection of small flies on the fresh paint.—*The Technologist.*

Refuse Charcoal.

The refuse charcoal obtained from the rectifiers of spirits, from the railroads where wood is burned in locomotives, from old charcoal beds, ec., is a very useful material in the garden. As a mulching about fruit trees I consider it very valuable. It keeps out frost in Winter; it keeps the soil loose and moist in Summer and it does not afford a harbor for mice and insects. In the soil it assists to promote moisture in a dry season; and by its slow decay (for it does decay more rapidly than is generally supposed) it yields carbonic acid gas to plants, and greatly assists to the decomposition of vegetable and mineral matter. It is an excellent mulching for strawborries, in Winter or Summer.

THE corn crop of the West this season was enormous, and it is estimated that there is yet unshipped not less than 1,000,000,0000 bushels. England stands ready to take 75,000,000 bushels of this corn if she can get it. She also wan's 40,000,000 bushels of wheat and 200,000 tons of bacon, but there are not a sufficient number of vessels in the trade to deliver these products in time to meet her wants.

THE price of hay in the Philadelphia bay market during the months of August, September and October of the present year has been from $1.60 to $2.50 per hundred. During the corresponding months last year it sold at from $1.10 to $1.50 per hundred.

IT is a general remarks that all classes of persons are ever ready to give their opinions. The lawyers must be excepted—they sell theirs.

REVOLVING CARRIAGE GATE.

[PATENTED, OCTOBER 31, 1871.]

Is claimed by our best Judges, to meet the necessity so long felt, of a Convenient, Practical, Durable Gate, so indorsed by the highest authority in America. Is entirely different from and has many advantages over any other Gate ever before in use. Is Cheap and easily constructed and for convenience cannot fail to please all. Can be opened and closed without the operator changing his position, lifting or pulling a pound, and if desired can be easily arranged to be opened and closed without dismounting. It occupies no more ground when opened than two posts will hold gate, this making it very desirable over any other Gate to farmers and those living in Villages and Towns. Is in order every day in the year, no snow to shovel in winter. It cannot sag or get out of repair.

For further particulars address the undersigned, who will as far as possible visit the several Counties in Pennsylvania and adjoining States, for the purpose of exhibiting and introducing the same.

Farmers and enterprising men generally will do well to give this special attention, as this Gate certainly will go into general use.

Ayer's

Sarsaparilla

It would be known as one of the most effectual remedies ever discovered for cleansing the system and purifying the blood. It has stood the test of years, with a constantly growing reputation, based on its intrinsic virtues, and sustained by its remarkable cures. So mild as to be safe and beneficial to children, and yet so searching as to effectually purge out the great corruptions of the blood, such as the scrofulous and syphilitic contamination. Impurities, or diseases that have lurked in the system for years, soon yield to this powerful antidote, and disappear. Hence its wonderful cures, many of which are publicly known, of Scrofula, and all scrofulous diseases, Ulcers, Eruptions, and eruptive disorders of the skin, Tumors, Blotches, Boils, Pimples, Pustules, Sores, St. Anthony's Fire, Rose or Erysipelas, Tetter, Salt Rheum, Scald Head, Ringworm, and internal Ulcerations of the Uterus, Stomach, and Liver. It also cures other complaints, to which it would not seem especially adapted, such as Dropsy, Dyspepsia, Fits, Neuralgia, Heart Disease, Female Weakness, Debility, and Leucorrhœa, when they are manifestations of the scrofulous poisons.

It is an excellent restorer of health and strength in the Spring. By renewing the appetite and vigor of the digestive organs, it dissipates the depression and listless languor of the season. Even where no disorder appears, people feel better, and live longer, for cleansing the blood. The system moves on with renewed vigor and a new lease of life.

Hair Vigor,

For restoring to Gray Hair its natural Vitality and Color.

A dressing which is at once agreeable, healthy, and effectual for preserving the hair. *It soon restores faded or gray hair to its original color, with the gloss and freshness of youth.* Thin hair is thickened, falling hair checked, and baldness often, though not always, cured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed; but such as remain can be saved by this application, and stimulated into activity, so that a new growth of hair is produced. Instead of fouling the hair with a pasty sediment, it will keep it clean and vigorous. Its occasional use will prevent the hair from turning gray or falling off, and consequently prevent baldness. The restoration of vitality it gives to the scalp arrests and prevents the formation of dandruff, which is often so uncleanly and offensive. Free from those deleterious substances which make some preparations dangerous and injurious to the hair, the Vigor can only benefit but not harm it. If wanted merely for a HAIR DRESSING, nothing else can be found so desirable. Containing neither oil nor dye, it does not soil white cambric, and yet lasts long on the hair, giving it a rich, glossy lustre, and a grateful perfume.

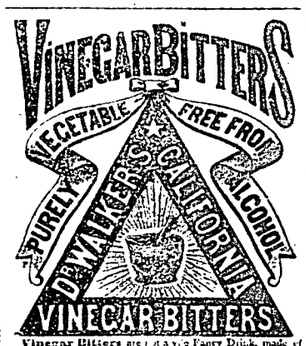
VINEGAR BITTERS



Vinegar Bitters are not a vile Fancy Drink, made of Poor Rum, Whiskey, Proof Spirits and Refuse Liquors, doctored, spiced, and sweetened to please the taste, called "Tonics," "Appetizers," "Restorers," &c., that lead the tippler on to drunkenness and ruin, but are a true Medicine, made from the pure medicinal roots and herbs of California, free from all Alcoholic Stimulants. They are the Great Blood Purifier and a Life-giving Principle, a Perfect Renovator and Invigorator of the system, carrying off all poisonous matter, and restoring the blood to a healthy condition, arousing it, refreshing and invigorating the whole system. They are easy of administration, prompt in their action, certain in their results, safe and reliable in all forms of disease.

No Person can take these Bitters according to directions, and remain long sick, provided their bones are not destroyed by mineral poison or other means, and the vital organs wasted beyond the point of repair.

Dyspepsia or Indigestion, Headache, Pain in the Shoulders, Coughs, Tightness of the Chest, Dizziness, Sour Eructations of the Stomach, Bad Taste in the Mouth, Bilious Attacks, Palpitation of the Heart, Inflammation of the Lungs, Pain in the regions of the Kidneys, and a hundred other painful symptoms are the offsprings of Dyspepsia. In this class of complaints Vinegar Bitters have shown their great curative powers in the most obstinate and intractable cases.

For Female Complaints, in young or old, married or single, at the dawn of womanhood, or the turn of life, these Tonic Bitters display so decided an influence that a marked improvement is soon perceptible.

For Inflammatory and Chronic Rheumatism and Gout, Dyspepsia, Liver, Kidney, Bladder, and Urinary Diseases, Vinegar Bitters are equally efficacious. They act upon the Liver, Stomach, Blood, which is generally the seat of disease, and by their tonic, purgative, and alterative action they cleanse all of its impurities, when you find the health of the system will follow.

They are an excellent Purgative as well as a Tonic, possessing the power of acting as a powerful purgative or tonic, as the circumstances of the case require, to thoroughly cleanse the whole system of all impurities.

Skin Diseases, Eruptions, Tetter, Salt-Rheum, Blotches, Spots, Pimples, Pustules, Boils, Carbuncles, Ringworms, Scalds, Blotches, Burns, Scurfs, Discolorations of the Skin, Humors and Diseases of the Skin, of whatever name or nature, are literally dug up and carried out of the system in a short time by the use of these Bitters. One bottle in such cases will convince the most incredulous of their curative effects.

Cleanse the Vitiated Blood whenever you find its impurities bursting through the skin in Pimples, Eruptions, or Sores; cleanse it when you find it obstructed and sluggish in the veins; cleanse it when it is foul, and your feelings will tell you when, and the health of the system will follow.

Grateful thousands proclaim Vinegar Bitters the most wonderful in their curative powers that ever sustained the sinking system.

Pin, Tape and other Worms, lurking in the system of so many thousands, are effectually destroyed and removed. For full directions, read carefully the circular around each bottle, printed in four languages, English, French, German and Spanish.

Mechanical Diseases. Persons employed in Painting and Mineral Occupations, such as Type-setters, Gold-beaters, and Miners, as they advance in life, are subject to paralysis of the Bowels. To
