E. B. HAWLEY & CO., Editors.

Wednesday, June 25, 1873.

THERE is nothing like plain English or speaking. Butler says Brownlow is an-old-fool, and Brownlow retaliates by saving that better men than Butler have been hanged.

Some of our exchanges are complaining because Grant's salary is so highbeing \$137 a day. Well freights are high, tariffs are high, taxes are high and Grant himself is high pretty often, according to the temperance people. Altogether these are high old times.

In a letter from Florida Mrs. Harriet Beecher Stowe says: "With suitable instruction, alligators may vet be seen in the Legislature. They certainly would not be more grasping and voracious than many in the situation; and there is a fine onenness about their manner of doing things that is prepossessing."

THE Washington Capital gives a sad account of the Americans sent out from America to fill places in the Japanese Government, and mentions the case of Mr. E. Peshine Smith, who called on the Peruvian Minister in a state of intoxication, improperly attired, and accompanied by a Japanese girl in men's clothes.

THE New York Sun takes a disrespectful journal to task for saying that John A. Bingham the Credit Mobilier and back the mission to which he has been oppointed by Grant namely, blatherskite. This fications and among them is a capacity to just to all our foreign ministers.

WE have been told repeatedly by stump speakers and others that this is (or was) the best government the sun ever shone npon," and now the present administration has given us another view of the matter, that it is the easiest government te run the world ever saw. It requires only one man to run it, as Secretary Fish is to-day the only person connected with the executive department that remains at Washington. Poor Ulysses is obliged to go to Long Branch to recuperate his func tions, so as to be able to draw double salary. It is a very heavy draft for so "cheap a hoss."

An exchange, on the strength of special telegram to the effect that Grant and family have moved to Long Branch, indulges in the following neat satire:-"Since the adjournment of Congress Mr. Grant has been visiting east and west, and until Congress meets he will tarry by the sea side. Some very mean people have grumbled at the doubling of the President's salary by the back pay bill, but they ought to know that an Administration cannot be run at Long Branch for less than double the money that is required to run it at Washington, where all of Mr. Grant's predecessors in office were foolish enough to remain the year round attending to their duties. There is reason in everything."

General Grant is the wickedest man connected with the salary grab. It was wholly concocted to cover his scheme for a doubling of his already more than sufficient pay. If he had been doing a losing business at \$25,000 a year during his first term, he well understood it before he first term, he well understood it before he laid his plans for a second nomination, and should not have entered the campaign; but it is absurd to suppose his salaries were insufficient for his legitimate necessities, comforts and even luxuries as President of the United States. ries as President of the United States their representatives in the lowest and of men and confounding right with He committed a gross breach of faith the highest caucuses, and as keen an eye in the people in signing the bill which on the election of judges as on that of of view—the view point of the average in the committed a gross breach of faith the highest caucuses, and as keen an eye of view—the view point of the average in the lowest and wrong. A "Protective" Tariff.

Our next issue of the DEMOCRAT will be subject to the postage embargo, which our subscribers will understand is five cents per quarter, or ten cents for six is only subjected to this small sum of so many cents, we are mulcted by this law in more than that number of dollars each quarter, for postage on our exchanges.-This may be classed, emphatically, as a legitimate outgrowth of that "important local issue" a high protective tariff which our neighbor, of the Montrose Republican says he has descanted upon with such in dependence, force and talent, and we are not desirous of accusing him of misrepresentation. The object of this law would seem to be to centralize into the hands of the metropolitan journals a monopoly, to the detriment of the country press, and known before in the history of our young

The Modocs.

SAN FRANCISCO, June 13 .-- A dispatch from Boyle's Camp, June 11, states that the captive Modocs are to be taken to Fort Klamath, where the Commission will sit to try them. Some of the wounded troops have already been sent. It is generally thought that Bogus Charley, Hooker Jim, Steamboat Frank, and Shacknasty Jim, having volunteered aid to capture Jack, will escape punishment. Those noted for murder will be forwarded to Alcatraz. Jackson's troops will start for Kalmath this evening for the re-

Ayer's Hair Vigor,

once agreeable healthy, and effectual preserving the hair. It soon restores faded or gray hair to its original gloss and freshness of youth. Thin hair is thickened, falling hair checked,

and baldness often, though not always, cured by its use. Nothing can restore the hair where the follicles are dethe nair where the folicies are destroyed, or the glands atrophied and decayed; but such as remain can be saved by this application, and stimulated into activity, so that a new growth of hair is produced. Instead of fooling the hair with a pasty sediment, it will keen it clean and vicescent. ment, it will keep it clean and vigorous. Its occasional use will prevent the hair from turning gray or falling off, and consequently prevent baldness. The restoration of vitality it gives to the scalp arrests and prevents the forma-tion of dandruff, which is often so uncleanly and offensive. Free from those deleterious substances which make some preparations dangerous and injurious to the hair, the Vigor can only bonefit but not harm it. If wanted merely for a HAIR DRESSING, nothing else can be found so desirable. Containing neither oil nor dye, it does not soil white cambric, and yet lasts long on the hair, giving it a rich, glossy lustre, and a grateful perfume.
