large, the British Government, from the first, took great pains to prevent the ex. Portation of the article, and even to limit its home sale to a supply just sufficient to the domend. Graphite is found in five per cent. A larger proportion than

This comes to market as grease. The grocer will tell you that of all your stock good butter is the most difficult to procure, and costs him most time and procure, and costs him most time and trouble to select. We know there is no good reason why this should be so. Here and there scat-tered widely apart throughout the coun-try we know farmers who make excellent butter, which would be classed first quali-tion the market and next does to there ty in the market, and next door to those are neighbors who make trash unfit for are neighbors who make trash unfit for food. On the counters of country stores may any day be seen rolls of butter most widely different in color, flavor, and text-ure. One farmer is careful and cleanly, and his wife keeps her dairy sweet and her pails and pans perfectly pure; another keeps a foul stable, milks in an unclean ly fashion, has masty feed and foul water for his cows, while his wife is equally care-less u her dairy. How can the butter in these two cases be other than widely dif-ferent in quality and value? May 14, 1873.

When a wholesale dealer is questioned Montrose, May 7, 1873.

J. H. DARNES. | G. S. BARDES. | H. G. BLANDING.

warious parts of Europe, and in North America, but of very inferior quality.— The Cumberland mines were worked only While the graphite lasted, England had a monopoly in supplying the best pencils to the world. Year after year, for a century past, the graphite deposit in England be-eame "fine by degrees and gradually less. The result was that graphic powder had to be compressed into a solid cake from which pencils could be supplied. A French variation, said to be an improve-ment, was to mix the powder with puriment, was to mix the powder with puri-fied graphite and clay, which is largely done still.

A CUBIOUS case, growing out of a breach of promise, was recently tried in Scotland. The damsel remembered that she had presented her faithless lover, a shoemaker, with shirts, cravats, butter, cheese and with shirts, cravats, butter, cheese and socks. Her gifts like her love making,al-ways took a practical turn, as is eventual-by proved, for the Scottish lady sued the shoemaker in the Sheriff's Small Debt Court of Edinburgh for \$40 the value of the practical presents. The curions trial ended in a verdict for the plaintiff, and the shoemaker was compelled to pay for shirts and cravats worn out, and eggs and butter long since eaten. butter long since eaten.

portion of the species besides the coach-men and the music teachers, and let them get used to the fascinations of the sex. THE "army worm" is trying how much

Ess long-A donkey.

ers of the roots, and death must result.

A FEMALE lawyer in Chicago has just won her first case. She combined all the elements essential to success, being only inneteen years old, of very attractive ap-pearance, just admitted to practice, and having for her client a hard working washerwoman who was compelled to suc s butcher for nonpayment of rent... Against the eloquent persussions of the young lady, the argument of the butcher's male attorney were of no avail, and the jn-ny brought in a verdict after but two min-ates deliberation, in favor of the washer-woman. Not to be behindhand with the farmers HERE is another warning for the silly daughters of wealthy parents whose hearts are so soft that they must needs fall in lors with the coachmen. A Washington Jehn lately succeeded in eloping with his employer's daughter. He married her and in three days departed for parts unknown leaving her to repent at leave is three days departed for parts unknown the rust are getting ready for business in leaving her to repent at leisnre. The part unknown the rust are getting ready for business in Illinois.
