More Radical Thieves.

The debt of the District of Columbia, instead of being only \$9,000,000, as asserted a short time ago, is \$17,000,000, and will soon be \$25,000,000, as the im provements already under way will con sume \$8,000,000. Gov. Cooke and the Board of Public Works are said, on good authority, to have determined to resign their positions when Congress meets, as they cannot administer such finances --An administration journal, published at the Capital, wants the Government to assume part of the debt, and moralizes as

"No sane man will admit that the taxable property of this district can bear the burden of a debt of \$25,000,000, as it will reach this figure before we get through, and at the same time carry on the present system of government. Our only hope is for Concress either to assume ole or at least one-half of our deb and in the future to assume the expenses of the District over and above what is realized by a tax of \$1.50 per \$100 on taxable property. This the people could bear without sacrifice, and would be a fair proportion of what they should be be wiped out, or, it the people are to gov-ern, let all the officers be elected, and not humbug us with this miserable farce with which we are afflicted at present, which from its very origin has been the source ot profligacy and expense largely; in excess of the expenditures of many of the State governments of the country. This is a subject entirely in the hands of the people, and, if they move with the proper spirit, the remedy can be easily reached, it rumored, and in fact semi-officially announced, that the Governor and Board of meeting of Congress giving as an excuse that they are tired of the job, or in other words, that the old ship has more freight than she can carry, and that the best thing that can be done under the circumstances is to souttle her and let her

We solemnly declare that we believe the large majority of the people of Philadelphia have long desired a fair election law, and that it has been again and again baffled in one branch of the Legislature by the representatives of the Philadelphia "Ring" because its overthrow was certain. tain in any honest election. "Immediately after this election, the infamous law of 1868 was gassed, and though promptly declared to be unconstitu'ional by the Supreme Court, the majority of the Judges was soon altered by the transfer of Judge Strong to the Federal Bench, and the fraudulent law was set on its legs again, in 1869. Since that time a Philadelphia election has been a farce, which many true Democrats have been reluctant to countenance by playing a part in it. We have heard it paying a part in it. We have heard it gravely proposed by men of bigh intelligence and character, that the local Democratic party should refuse to participate any longer in city elections held under the Frandulent Election law; that we should not seem to admit by voting, that there is an election. But we have a since hobby. duty to perform as a part of the Democ-

racy of Pennsylvania.

If there is no active vigilance, no watching from any quarter in the election we shall see as in last November—the whole business given over helplessly to the "Ring" cheats who will, if necessary, good candidates, and present real issues to the people, if we in Philadelphia are doing nothing, or worse than nothing to effectually watch and check and curb the gross enormities of fraud, which "Ring" election officers, and repeaters, emboldened by impunity, can perpetrate under the frandulent. Singular Murderons Weapon

A man was hanged the other day at Sau Francisco for murder with a venpon of a peculiart; dangerous and for a long time mysterious nature. This is a samilab, formed by filling an ell skin with sand. When this instrument was first brought into use the authorities were greatly puzzled by deaths, apparently from violence, yet no marks could be ound on the outside of the body burgular was foully captured with a sand club in his possession made out of an eel skin stuffed with sand. Being closely questioned, he explained its use. When the victim is struck, for instance, on the head, he drops in sensible and soon dies from congestion of the brain. Often the skull suffers no injury from the stroke, and if the person struck recovers sensibility he gradually relapses into a condition of idiocy. Sometimes a man struck in the body will be knocked down by the pecu liar force of the blow and feel no imme diate results from it. In a few weeks, however, the flesh will begin to mortify under the line of the blow and rot down

to the bone. Heller, the celebrated planist, is supposed to have met his death in Mexico from a stroke of this diabolical weap-

THE ! EAR AND TEAR OF LIFE. The cares, anxieties and misfortunes of life have as much to do with shortening it as disease. They are in fact the source of many ailments and physical disabilities. Nervous weakness, dyspesia, affections of the liver, disturbanances of the bowels, headache, hypochondria and monomania are among these distressing fruits. It is, therefore, of great importance that persons whose minds are oppressed with heavy busitiess responsibilities, or harassed by family troubles or sycied by speculation or resident troubles, or excited by speculation, or perplexed by a multiplicity of enterprises, or in any war or a manufactor of enterprises, or in any way overtaxed or overworked, should keep up their stamina by the daily use of a whole-one tonic.
