had each been taught at a plain school or at home. Of the fifty-six signers twenty-five had studied the institutions of Great Britain while sojourning in that country. All had something to loose if the struggle should result in failure to them. Many of them were very wealthy, and, with very few exceptions, all of them was blessed with a comparable structure of the structure of

Thirty-four of the siguers were lawyers thirteen were planters or farmers, nine were merchants, five were physicians, two on grass land at any season of the year were mechanics, one was a clergyman, but spring; for if drawn out in the Sum-one a mason and one surveyor. The mer it is hable to dry np and a good deal

that "the anmals of the world can present no political body, the lives of whose under consideration, as many farmers are ent no political body, the lives for whose members, minutely traced, exhibit so much of the zeal of the patriot, dignified and chastened by the virtues of the believing it to be as profitably done at that the head of Navigation."—

A. R. BULLARD is constantly receiving large additions to biselock of GROUERIES AND PROVISION at his old stand at the head of Navigation, where are

# -0-

Through the kindness of the Superinfintendent, Mr. Weedon, I was permitted to witness the mode of transmitting and receiving messages through the cable, and initiated into the secret. An operator sits at a table in the room very slightly darkened by curtains. On his left hand stands a little instrument named the "reflecting galvanometer," the invention of Sir Wilham Thompson, without which Atlantic telegraphy would be slow progress, not exceeding two or three words per minute, instead of eighteen or twenty the present rate. The delicate instrument consists of a tiny magnet and a small mirror swinging on a silk thread, the 'two together weighing but a few grains. The electric current, passing along the cable from Valencia, deflects the magnet to and fro. The mirror reflects a spot of light on to a scale in a series of the action of the atmosphere, frost and sun, for some months before seeding is done, which is necessary to obtain a growth of grass. Spots where knolls have been leveled in Summer may be seeded the following March successfully. If the land is stiff clay, give a coating of loamy soil before applying the seed; by a little care the alluvial portion just beneath the sod of the mound may be saved for this purpose.

Stones should never be piled upon a mendow; they are unsightly and always in the way; haul them off, and they can be put to use; pile where you will never have to run around or move them again.—Ohio Farmer.

How To Dross Sheep.

Many of our country vesders who kill [Extract from a New Foundland Letter.] the magnet to and fro. The mirror re

The little swinging magnet follows every change in the current; and every change great or small, produces a corresponding oscilliation of the spot of light on the scale. A code of signals is absorption, by the meat, of the grass from the spot of light are made to indicate the letters of the alphabet. When receiving therefore, absorbed by the flesh. As soon The little swinging magnet follows evthey represent.

### A Terrible Imprisonment.

Alloway Kirk, the scene of Burns's Tam O'Shanter" is described as a lonely place, in the midst of which is a small collery, a mere outlying patch of the Scottish coal field. In this colliery happened one of the most remarkable instances of tenacity of life that has ever occurred. In the churchyard of the neighboring town of Daily, the curious visitor will find a tombstone with this restricts. visitor will find a tombstone with this

quietly expired on the evening of No-vembeu 3, aged 66 years."

The evidence of such survival is incontestable. Brown was working in the pit when the fimbers began to give way.—
The other workmen fled, but he coolly returned for his jacket, saying it was a new one, and he could not afford to lose it. That was the last seen of him for twenty-three days, when he were testable. Brown was working in the pit when the first was a new one, and he could not afford to lose it. That was the last seen of him for twenty-three days, when he were testable in the pit when the first was a last year, yielded nearly two hundred and fitty millions of bushels, a considerable in it. That was the last seen of nim for twenty-three days, when he was rescued. He was then mere skin and bone, and had upon him the death-like chillness of a corpse. Fungus had spread over him as though he had been a rotten log.

All threads his bair and bristly beard All through his hair and bristly beard the white fongoid growth had crept, and the unearthly sight was one never to be

The postal card manufacturers at Springfield Mass, are now shipping between seven and eight thousand postal cards daily, and will soon increase the number to one million. There is an ample supply of paper on hand to turn out a million and a quarter daily, and of better quality than formerly. The estimate of the Postmaster General was that about one hundred millions of cards would be purchased this year. Up to date, less than three months since they were issued over fifty millions have been ordered, and the probabilities are that the consumption this year will be double the estimate. Thus far none of the small towns in the country have been supplied, it being as much as the Department could do to sat-

### The Farmer.

### Work After Harvest.

We will again mention to farmers that

It is often the case that fields do not SUGAR, TEA, COFFEE, Twenty-seven of the signers had been regularly graduated in college, or about one-half. Twenty others had recived an academic education, and the remainder little observation at harvest fime will dehad each been taught at a plain school or termine the matter, for there are no bet

were mechanics, one was a clergyman, one a mason and one surveyor. The youngest member of Congress when the Declaration was signed (Rutledge) was twenty-seven years of age; the oldest one (Dr. Franklin) was seventy. Forty-two of the fifty-six were between thirty and fifty years of age; the average age of all was forty-three years and ten months.

Not one of the signers ever fell from that high estate to which that great act had elevated him. It has been well said that "the anmals of the world can pressible to grow it is soon to the surface in the Spring grass where the fall benefit is received. This matter is that "the anmals of the world can pressible to grow it is soon covered, and the warm rains wash it down around the roots of the grass where the full benefit is received. This matter is that "the anmals of the world can pressible to grow it is soon covered, and the warm rains wash it down around the roots of the grass where the full benefit is received. This matter is that "the anmals of the world can pressible to grow it is soon covered, and the warm rains wash it down around the roots of the grass where the full benefit is received. This matter is that "the anmals of the world can pressible to dry np and a good deal of its fertilizing elements be carried away in the sum out in the Sum, mer it is lable to dry np and a good deal of its fertilizing elements be carried away in the sum out in the Sum, agood that of the young of the world can prossible to grow it is soon to the surface in the Spring of the world and spread upon the surface in the Spring of the world can pressible to grow it is soon to the sum of the sum out in the Sum, agood the sum out in the Sum, and a good deal of its fertilizing elements be carried away in the sum out in the Sum, and a good deal of its fertilizing elements be carried away in the sum out in the Sum, and the sum out in the Sum, and a good deal of its fertilizing elements be carried away in the sum out in the Sum, and a good deal of its feather out in the Sum, and a good deal

"—Harper's Magazino for August. time as at any other.

Now is a good time to level down knolls and mounds and fill up uneven spots.—
The advantage in doing the work now lies in exposing the soil which is laid bare to the action of the atmosphere, frost and sun, for some months before seeding is

flects a spot of light on to a scale in a box placed in the operator's right hand where by its oscillations, the spot of light indicates the slight movements of azine for dressing a sheep: the magnet which are too small to It may be of interest to some of our country readers to learn how to dress

the spot of light are made to indicate the letters of the alphabet. When receiving a message from Valcacia, the operator watches the movement of the little slight speck, which keeps dancing about over the scale on his right. To his practiced eye cach movement of the spot of light represents a letter of the alphabet. Seemingly fantastic motions are spelling out the intelligence which the pulsings of the electric currents are transmitting between the two hemispheres. It is truly marvelous to note how rapidly the experienced operator disentangled the irregular oscillations of the little speck of light into the letters and words which they represent.

In the carcass cools, cannot escape, and is, therefore, absorbed by the flesh. As soon as the animal is dead, let the hide be slit up from the brisket to the tail, and to the knees by a quick motion of a sharp-pointed knile inserted beneath the skin. Strip the skin from the belly and the ribs and legs, so that it will be out of the way of the intestines. Then open the sheep immediately, and disembowel it. All this ough to be the work of about one min-mediately, and disembowel it. All this ough to be the work of about one min-mediately, and disembowel it. All this ough to be the work of about one min-mediately, and disembowel it. All this ough to be the work of about one min-mediately, and disembowel it. All this ough to be the work of about one min-mediately, and disembowel it. All this ough to be the work of about one min-mediately, and disembowel it. All this ough to be the work of about one min-mediately, and disembowel it. All this ough to be the work of about one min-mediately, and disembowel it. All this ough to be the work of about one min-mediately, and disembowel it. All this ough to be the work of about one min-mediately, and disembowel it. All this ough to be the work of about one min-mediately, and disembowel it. All this ough to be the work of about one min-mediately, and disembowel it. All this ough to be the work of about one min-mediately, and disembow be killed by thrusting a sharp knife through the neck, back of the windpipe, without touching it, however, but cutting the arteries; and as soon as the knife is inserted it should be twisted round as if

Rural Home gives the following remedy for heaves in horses: Give once daily a visitor will find a tombstone with this inscription: "In memory of John Brown collier. He was inclosed in Kilgrammie coal pit by a portion of it having fallen in, October 8, 1835, and was taken out alive and in full possession of his mental faculties, October 31, having been twenty-three days in utter seclusion from the world, and without a particle of food.—He lived for three days after, having quietly expired on the evening of No-It should be continued, if necessary, un-til a pound of acid is given. We suppose it will only cure recent cases, and not

THE wheat crop of the United States, last year, yielded nearly two hundred and fitty millions of bushels, a considerable increase over 1871, when the yield was not quite two hundred and thirty one millions. Pannsulania years are was the All through his hair and bristly beard the white fongoid growth had crept, and the unearthly sight was one never to be forgotten. Yet he was sensible, conversed freely, as stated, three days.

The postal card mannfacturers at Lest year's wheat growing. He was something the ninth state in the order of wheat growing. Pennsylvania's yield being exceeded by Ohio, Michigan, Indiana, Illinois, Wisconsin, Minnesota, Jowa and California.

tion this year will be double the estimate, three to three and one-half years old, as the was at two and one-half and we are satisfied that many horses are permanent-ly injured by too hard work and improper The New York Star says the devil's the animal is five years old, is equal to three in its old age.

Drugs and Medicines.

Every year increases the popularity of this valuable Hair Preparation; which is due to merit alone. We can assure our old patrons that it is can assure our old patrons that it is kept fully up to its high standard; and it is the only reliable and perfect-ed preparation for restoring GRAY OR FADED HARR to its youthful color, on Fader Haft to its youthul color, making it soft, lustrous, and silken. The scalp, by its use, becomes white and clean. It removes all eruptions and dandruff, and, by its tonic properties, prevents the hair from falling out, as it stimulates and nourishes the heir slands. By its use the heir the hair-glands. By its use, the hair grows thicker and stronger. In baldness, it restores the capillary glands to their normal vigor, and will create a new growth, except in extreme old age. It is the most economical HATE DRESSING ever used, nomical HAIR DRESSING ever used, as it requires fewer applications, and gives the hair a splendid, glossy appearance. A. A. Hayes, M.D., State Assayer of Massachusetts, says, "The constituents are pure, and carefully selected for excellent quality; and I consider it the BEST PREFA-HATION for its intended purposes." Sold by all Druggists, and Dealers in Medicines, Price One Dellar.

# Buckingham's Dye.

FOR THE WHISKERS. As our Renewer in many cases requires too long a time, and too much care, to restore gray or faded Whiskers, we have prepared this dye, in one preparation; which will quickly and effectually accomplish this result. It is easily applied, and produces a color which will neither rub nor wash off. Sold by all Druggists. Price Fifty Cents.

# Sarsaparilla

Is widely known as one of the most effectual remedies over discovered for cleansing the system and purifying the blood. It has stood the test of years, with a constantly growing reputation, based on its intrinsic virtues, and sustained by its remarkable cures. So mild as to be safe and beneficial to children, and yet so searching as to effectually purge out the great corruptions of the blood, such as the scrolulous and syphilitic contamination. Impurities, or diseases that have lurked in the system for years, soon yield to this powerful antidoto, and disappear. Hence its wonderful cures, many of which are publicly known, of Scroffula, and all scrolulous diseases, Ulcers, Eruptions, and eruptive disorders of the skin, Tumors, Blotches, Boils, Pimples, Pustules, Sores, St. Anthony's Fire, Rose or Eryalpolas, Tetter, Staft Rheum, Scald Hend, Ringworm, and internal Ulcerations of the Uterus, Stomach, and Liver. It also cures other complaints, to which it would not seem especially adapted, such as Dropsy, Dyspopaia, Fits, Neuralgia, Henrt Disease, Female Wenkness, Debility, and Leucorrheen, when they are manifestations of the scrofulous poisons.

It is an excellent restorer of health and strength in the Spring. By renewing the appetite and vigor of the digestive organs, it dissipates the depression and listless languour of the season. Even where no disorder appears, people feel better, and live longer, for cleansing the blood. The system moves on with renewed vigor and a now lease of life.
