Local objections to the Constitution. The text of the new organic law of ed. Numerous plans have been proposed The text of the new organic iaw of ed. Numerous plans have been proposed this state to be voted upon the 16th day of December seems to very generally meet the approbation of the people in this lo-cality, there being only one objective point raised thus far, so far as our knowl-rest the approbation of the text is to the second easity, there being only one one the knowl-raised thus far, so far as our knowl-edge extends and that is to the seventh engage to plant trees as a condition to Section of Art. 14th, which is as follows : SEC. 7. Three county commissioners have taken up.

and three county anditors shall be "clocted in each county where such officers are chosen, in the year one thousand eight bundred and seventy-live, and every third year thereafter; and in the election of said officers each qualified elector shall vote for no more than two persons, and the three persons having the highest number of votes shall be elected; any casual vacancy in the office of county commissioner or county auditor shall be filled by the Court of Common Pleas of the county in which such vacancy shall occur, by the appointment of an elector of the proper county who shall have vot-ed for the commissioner or auditor whose place is to be filled.

One objection seems to be that this section will give a minority representation in this county, which should not be as "to the victor belongs the spoils." If this constitution was a local affair and applied only to Susquehanna County, this might seem objectionable to partizan Republicans, but the old D-mocratic counties of York, Bucks. Berks, Centre and all others, come under this provision the same as this county. That this should meet our approbation is not at all strange for we have repeatedly advocated in the DEMOCRAT that a general law should be DEMOGRAT that a general law should be passed making a minority representation obligatory the same as upon election boards. The Commissioners B and is not like other offices, simply executive, but it its two reproductions to method is a local legislative body to a certain ex-tent, in the way of levying taxation and the principle underlying our system of government is, that taxation without representation is in opposition to true Re-publican principles. In Centre County this year, a Republican Commissioner was elected while all the other officers were Democratic by their usual majority. This grew out of a dissatisfaction of the masses

We have heard of one objection to this Section, which is very hovel to us indeed, and that is, that three unsophistocated officers would come into office at the same time as all would be elected at the same time and it would be a very difficult matter for the clerk to get them wav-wised. We, in our simplicity cannot see that the bu-suress of the Commissioners office is any more intricate than that of Steriff, Prothonotary, and other county officials, and the same objection would apply in the r man and cases. The Sheriff cannot be re-elected, and by past experience the office of Pro-thonotary is quite liable to change hands. There is no reason why three men cannot be found in this coary to take charge of the Commissioners office, without previ-ons training, as well as of the other offi-rees. If it becomes necessary that an old "rat" shall be retained in that office in order to show the new ones where the "meal chest" is, the people can remedy the defect in the constitution, by re-electing one or two of the old board, as ther is nothing in the provision restricting them from that. This seems, in our mind to do away with all these objections.

A Monitor For The Masses. Had we never seen a copy of the new Constitution, we should have a most perside and all the Sam. Joseph Legislative, Democratic "Roosters" are moving heaven and earth, almost, to defeat it. This we say is sufficient reason, without any other Protect Your Buildings!

The unparalled destruction of timber in the United States is attracting the at tention of thoughtful men from two points of view. According to a New York pa-per they are : First, that of increase in the price of this kind of building materials and secondly, because it is now ascertained that treeless countries are liable to drouths and hurricanes by which

This sad illustration is adduced to show how wrong it is more to the constable. for any one to keep intexicating bever-ages in the house. Even though the pro-prietor himself be safe from committing a excess, he can never know what in-jury he may indirectly cause to a weaker tellow-being.

Fin, Tape, and other Worms, lurk-ing in the system of so many thousands, are effectually destroyed and removed. No sys-tem of médicine, no vermifuges, no anthel-minitics, will free the system from worms like these Bitters. For Female Complaints, in young or old, married or single, at the dawn of wom-anhood or the turn of life, these Tonic Bit-ters display so decided an influence that improvement is soon perceptible. Janudice.—In all cases of jaundice, rest Janudice.—In all cases of jaundice, rest assured that your liver is not doing its work.
