Manuring Corn in the Hill.

The question how to retain the tertility of the soil, and make our crops pay best, bridal party arrived in the city and put is one of the most important that could up at one of our hotels. The bride was what crop would pay best wrthout any; names were registered in the usual way reference to retaining the fertility of the soil? but we are learning of late that the registering in the identity of the bride. most profitable crops are not, in all cases, these that will bring the most money, and return nothing to the sell that produced them.

The question, will it pay to manure corn in the hill with barn-yard manure. at the rate of from eight to ten loads per acre. depends very much upon the amount of manure at hand, and the labor to apply it with. That manure may be applied to other crops with less labor. we all admit, but will it serve the object in

question? We claim it will.

The wheat cipp is one in our experience that is suffering most from exhaustion of soil, both in quality and quantity. As you say, the farmer seeks the most profitable returns from the manure, and weadmit he will best secure this end with manuring in the bill, the question arises shall we divide the manure among the sensi we divide the minure among the several crops, leaving none for the grass, or shall we apply it to all the crops to be followed by grass? The wheat crop, in our experience, is the most important and elephant in the lottery, scarce-knew what remunerative where probably cultivated and manuren, and is also a good crop to

seed with.

In order more fully to apply out ideas of the importance of the grass crop, we quote the German adage: "No grass, no "Me, Saiah; but mer quote the German adage: "No grass, no stock; no stock, no manure; no manure, no crops." Then in order to scure a good "catch" of grass, it is apparent that we should apply our fertilizers to that crop with which we expect to seed. Our experience in manuring in the hill is, that it produces a very luxurient growth of stalks, does not ear in proportion. I have not had experience in foriegn fertilizers, but should think them, if what they are represented to be worthy of trial. We never use any compost of barn-yard manure for corn, for the reason that we hardly obtained enough to secure the wheat and grass crops. We use a compound of equal quantity of wood ashes, plaster, and air-slaked lime, costing from eight to ten dollars per ton, at the rate of "Blast me if, I did! I found her eight to ten dollars per ton, at the rate of five bushels per acre, applied to the hill immediately after planting. This gives it a good start, and this is the main point to success. Drugs and Medicines.

Dr. J. Walker's California Vinegar Bitters are a purely Vegetable preparation, made chiefly from the native herbs found on the lower ranges of the Sierra Novada mountains of California, the medicinal properties of which are extracted therefrom without the use of Alcohol. The question is almost daily asked, "What is the cause of the unparalleled success of Vinegas Bitters?" Our answer is, that they remove the cause of disease, and the patient recovers his health. They are the great blood purifier and a life-giving principle, a perfect Renovator and Invigorator of the system. Nover before in the history of the world has a medicine been compounded possessing the remarkable qualities of Vinegas Bitters in healing the sick of every disease man is heir to. They are a gentle Purgative as well as a Tonic, relieving Congestion or Infammation of the Liver and Visceral Organs, in Bilious Diseases. Dr. J. Walker's California Vinegar in Bilious Discases.

If men will enjoy good health, let

them use Vinegan Bitters as a medicine, and avoid the use of alcoholic stimulants in every form.

No Person can take these Bitters NO Ferson can take these bitters according to directions, and remain long unwell, provided their bones are not destroyed by mineral poison or other means, and vital organs wasted beyond repair.

Grateful Thousands proclaim Vinegab Bitters the most wonderful Invigorant that ever sustained the sinking system.

In their treatment, a purgative, exerting a powerful influence upon these various organs, is essentially necessary. There is no cathartic for the purpose equal to Dr. J. Walker's Vinegar Birreis, as they will speedily remove the dark-colored viscid matter with which the bowels are loaded, at the same time stimulating the secretions of the liver, and generally rectoring the healthy functions of the digestive organs. MAKES THE WEAK STRONG.

The Peruvian Syrup, a Protected Solution of the Protoxide of Iron, is so combined as to have the character of an aliment, as easily digested and assimilated with the blood as the simplest food. It increases the quantity of Nature's Own Vitalizing Agent, Iron in the blood, and cures "a thousand ills," simply by Toning up, Iwigorating and Vitalizing the System. The enriched and vitalized blood permeates every part of the body, repairing danages and waste, searching out morbid sceretions, and leaving nothing for disease to feed upon.

This is the secret of the wonderful success of this remedy incuring Dyspepsia, Liver Complaint, Dropsy, Chronic Diar-

plaint, Dropsy, Chronic Diar-rhœa, Boils, Nervous Affections, Chills and Fevers, Humors, Loss of Constitutional Vigor, Diseases of the Kidneys and Diseases of the Kidneys and Bladder, Female Complaints, and all diseases originating in a bad state of the blood, or accompanied by debility or a low state of the system. Being free from Alcohol, in any form, its energizing effects are not followed by corresponding reaction, but are permanent, infusing strength, vigor, and new life into all parts of the system, and building up an Iron Constitution.

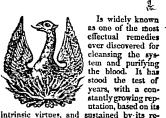

Thousands have been changed by the use of this remedy, from weak, sickly, suffering creatures, to strong, healthy, and happy men and women; and invalids cannot reasonably hesitate to give it a triat.

stantly growing reputation, based on its intrinsic virtues, and sustained by its remarkable cures. So mild as to be safe and heneficial to children, and yet so cearching as to effectually purge out the great corruptions of the blood, such as the scrofulous and syphilitic contamination. Impurities, or diseases that have lurked in the system for years, soon yield to this powerful antidote, and disappear. Hence its wonderful cures, many of which are publicly known, of Scrofula, and all scrofulous diseasea, Ulcers, Eruptions, and cruptive disorders of the skin, Tumors, Blotches, Boils, Pimples, Pustules, Sores, St. Anthony's Fire, Rose or Ervsipelas, Tetter, Salt Rheum, Scald Head, Ringworm, and internal Ulcerations of the Uterus, Stomach, and Liver. It also cures other complaints, to which it would not seem especially adapted, such as Dropsy, Dyspepsia, Fits, Neuralgia, Heart Disease, Female Weakness, Deblity, and Leucorrhæa, when they are manifestations of the serofulous poisons.

It is an excellent restorer of health and strength in the Spring. By renewing the appetite and vigor of the digestive organs, it dissipates the depression and listless languor of the season. Even where no disorder appears, people feel better, and live longer, for cleansing the blood. The system moves on with renewed vigor and a new lease of life.
