The hen has scarcely set on her egg twelve hours before some lineaments of the head and body of the chicken appear. The heart may be seen to beat at the end of the second day; it has at that time somewhat the form of a horse-shoe, but no blood yet appears. At the end of two days two vessels of blood are to be distinguished, the pulsation of which is visible; one of these is the ventricle and the ible; one of these is the ventricle and the other is the root of the great artery. At the liftieth hour one auricle of the heart appears, resembling a noose folded down upon itself. The beating of the heart is first observed in the auricle, and after-ward in the ventricle, At the end of seventy hours the wings are distinguishable, and in the head two bubbles are seen for the bram, one for the bill, and two for the fore and hind part of the head.— Toward the end of the fourth day the auricles already visible draw nearer to the heart than before. The liver appears to wards the fifth day. At the end of seven hours more the lungs and the stomach become visible and four hours afterwards the intestines and long and upper jaw .-At the 144 hour two ventricles are visible, and two drops of blood instead of the single one which was seen before. The seventh day the brain Legins to have some

consistency. At the 219 hour of incuba-tion the bill opens and the flesh appears In four hours more the breast bone 1 seen. In six hours after this the ribs appear, forming from the back, and the bill is visible as well as the gall and bladder. The bill becomes green at the end of \$45 hours, and if the chicken be taken out of the 246th hour the eyes appear. At the 288th hour the ribs are perfect. At the and shuts, and at the end of the eightand shuts, and the end of the eighteenth day the first cry of the chicken is heard. It afterwards gets more strength and grows continually, till at length it is enabled to get itself free from its confine-

Varieties of Wheat.

The Reading Times has been shown by Cyrus T. Fox, Secretary of the Berks Co. Agricultural and Horticultural Society sixteen different samples of fine varietic of wheat contained in separate bottles, neatly labeled. The following is a list of the varieties, with the yield of each in bushels to the acre, and the distinctive peculiarities of each:

Lancaster Red, red bearded, - 26 Shoemaker, red, smooth, - 27 12 32 Shoemaker, red, smooth, 27
Arnold, No. 9, white, smooth, 28
Week's White, white, bearded, 31 46 Jennings, white, bearded, - 33 Old White Choff Mediterranean, 34 Way, red, bearded, - - Rogers, white, smooth, - -Dut, red. bearded, Rough and Ready, red smooth, Brittany, red, bearded.

Foltz, amber, smooth, from R L Landis, Lancaster County, 40 Foltz, from M. Keller, Lan. Co., 41 Foltz, from Eastern Experimental Farm, 42

al Farm, Clawson White Winter, a new variety, from the Department of Agriculture, Washington, D. C.
Egyptian Wheat, from A. Holtzworth

ancaster County.

It will be observed that the Foltz whea is credited with the largest yield to the acre, there being samples from three different farms, on each of which the yield was from 40 to 42 bushels to the acre. The Egyptian wheat, is a new variety, which is being sold at the rate of \$1,00 per one hundred grains, the entire stock in this country being in the hands of one man. The Clawson White Winter, is an exceedingly fine variety of white wheat which the Department of Agriculture is the classic of the control of the contro which the Department of Agriculture is desirous of introducing. The other varieties in the list were all grown on the Experimental Farm, at West Grove, Chester County, by John I. Carter, Superintendent, by whom they were exhibited at our late County Fair. The yield to the acre was obtained from careful measurements made, and the above is a correct mental of the comparative productiveness. record of the comparative productiveness of the different varieties embraced in the

Land for Grazing.

In an address before the New York State Agricultural Society, Dr. Sturtevant gare his ideas as to land adapted to grazing and dairying, as follows:—When levels or undulatings are united with rich herbage and a temperate clime, we have the natural conditions for a grazing herd.

It is well understood at present that no change can occur in an animal without an equivalent expenditure of force. The animal which has to devote a large por tion of taken food with supplying the waste of force expended in constant wanderings over a scant pasture, or an over-coming quantity in ascending hills and steep places, is at a disadvantage in stor-ing fat or increasing growth, with anoth-er animal of whom these efforts are not nug iau or increasing growth, with another animal of whom these efforts are not required. Hills check the production of fat by increasing the labors of the animal, the respiration is excited, oxygen in excess passes into the langs, and a portion of the carbon, which might otherwise become fixed in the formation of fat, uniting with the oxygen, disappears. The art

three-quarters of a pound of sugar to each pint of water, as measured at first, with enough lemon or orange peel, or maco, to impart a pleasant flavor, return to the impart a pleasant flavor, return to the kettle. When the syrup has been well skimmed, and is clear, pour boiling hot water over the apples, which must be drained from the water in which they have hitherto stood. Let them remain in the syrup until both are perfectly cold.—Then covering closely, let them simmer over a slow fire until transparent. Where all the minutize of the se directions are attended to the fruit will remain unbroken, and present a beautiful and inviting apand present a beautiful and inviting appearance.

Drugs and Medicines.

All. J. Jalker's Californic inegar Bitters are a purely Vegetable preparation, made chiefly from the native herbs found on the lower ranges of the Sierra Nevada monatains of California, the medicinal preperties of which are extracted therefrom without the use of Alcahol. The question is almost daily asked, "What is the cause of the unparalleled success of Venedas Birrens?" Our answer is, that they remove the caar? of disease, and the patient recovers his health. They are the great blood purifier and a life-giving principle, a perfect Renovator and Invigorator of the system. Never before in the history of the world has a medicine been compounded possessing the remarkable qualities of Venedas Birrens in healing the sick of overy disease man is heir to They are a gentle Purgative as well as a Tonic, relieving Congestion or Inflammation of the Liver and Visceral Organs, in Bilions Disease. art, a. dalker's California tinegar wen as a rome, reneving congestion of in-finmmation of the Liver and Visceral Organs, in Bilious Diseases.

If men will enjoy good health, let them use Vinegan Brirers as a medicine, and avoid the use of alcoholic stimulants in every form.
