A Joke.

It is an ancient joke upon allonathic treat ment to say that a sickly patient will soon be unable to speak in hot weather by reason of the rise of the mercury in his system, which, Subscribe for the Montrose Democrat, getting up to his throat, would choke him. The Markets.

Financial. The condition of the money market is not materially changed: The relations between supply and demand remain the same as they have been for several months. The disbursements on the 1st proximo will throw upon the market many millions of dollars that cannot be profitably put out. There is, therefore, no reasonable probability of an advance in rates at present. With the opening of the new year may come a revival in trade and some lively speculation, but even these chances for the better would scarcely employ the surplus of loanable funds figure named for call on loans on call is five per cent. Strictly first-class two-named paper, drawn at 60@90 days, rule at 5@6 per cent; single named paper at 6@7 per cent. First class three to four months' paper, with good collateral, is quoted at 5@6 per cent the samprehar acter of paper on government able per cent. For lower grades of paper higher
