Crape on Doors.

Some people give themselves the trouble of inquiring into the origin of the custom of placing crape on the door of a house where there has been a recent death.

It is a custom of recent introduction. It has originally had its origin in the ancient heraldic customs of the Anglo-Saxon race.

At that early period Hatched or armorial ensigns were placed in front of houses where the nobility and gentry died.

These heraldic devices were of various shapes and contained the family arms, quartered and colored with sable, in such a manner that the spectator at a glance could tell what branch of the family was dead.

The Railroad Calamity Bill.

The Supreme Court of this State, on Monday decided, in the case of the Central Railroad Company of New Jersey vs. Cooke, that the limitation of \$5,000 for personal injury to passengers was unconstitutional.

The Company took a writ of error and pleaded the statute before the Supreme Court, and the ruling of Judge Harding and the judgment were affirmed.

The case arose before the adoption of the new constitution, which now prohibits any such limitation of damages by the legislative authority.
