Conflicting Decisions on an Important Subject. Judge Trunkey, of Venango, has decided that to entitle a citizen to vote at an election, his tax must have been paid at least one month prior thereto; and a payment for him by another must either have been authorized or ratified within the same limit of time. This is dirictly in conflict with Judge Pearson's opinion in the McPherson case, delivered shortly after last year's election, in which it was held that the ratification related back to the time of per-2 formance and adopted the act as of that date

It is hoped that the entire family will follow, and meet the fate of their drowned predecessors. It is possible that in this way we may get rid of this annoying

On Sunday last as Mr. Griffin, who resides at-Hart Lake, was passing along the shore, he discovered some clothing and at first supposed some one was in bathing. Not being able to see any one his suspicions were excited and a boat was taken and a search made around the lake, and on the opposite side of the lake from where the clothes were found the body of a man was discovered floating in the water.-The body was removed and an inquest called, which resulted in pronouncing it to be the body of Abram Croffit, and a verdict of accildertal drowning. Duplicate Railroad Passes.

Judge Ross, of Norristown, has filed as opinion in the case of Cresson vs. the Reading railroad which will be of interest to the traveling public. The plaintiff, who had lost his season ticket by theft, tendered an indemnity and demanded a ticket for the unexpired time The conditions printed upon the ticket state that if lost or mislaid it will not be replaced by the company.

The court ruled that the plaintiff, having used the ticket, was bound to acquaint himself with its conditions; that he has no right to call upon the defendant to replace the stolen ticket; that the season ticket greatly diminished the plaintiff's cost of travel and he assumed the risk of loss. As the case was framed as a test case, the court had given it careful consideration. It was the policy of the law to encourage cheap transit, and where conditions not unreasonable, not contrary to policy o law and not harsh or oppressive produce that result, they should be maintained and enforced by the courts.

Coal Oil as Kindling. Coal oil is one of the cheapest and best arti cles in the world for starting a fire. All one has to do is to pour a little of the oil on a slow burning fire and in less than a minute the oil can bursts, the contents are scattered in all diters" at the Court House, on Monday evening | rections, and there is a rousing fire all over the last, was given to a full house. Although the I house, if not all over the neighborhood. The former programme was repeated, yet it was lis. supper which is thus burned up is generally ed but the individual who r is nicely roasted, and is followed to the grave by an immense crowd of admiring and sympathising friends.

We have chronicled hundreds of such cases, and still the work goes on. The last case that has come to our knowledge is that of a twelve year old boy named Noll, who resided with his parents in Reading. His mother wanted to burry up the supper on Friday last. The boy poured coal oil in the stove. Immediately the flames shot up and the boy's clothes were on fire. He ran for his life, and his frightened mother collowed after. Twice she caught him and twice he got away. Finally when he could run no longer, the fire is put out and the roasted body carried into the house. He died on Saturday morning.
Rachel White, a colored woman who resided

in Coatesville, had been away from home at work, and when she returned some found her fire had nearly gone out. She took her coal oil can and poured some of the fluid upon the fire, which caused an explosion, and enwrapped her in one sheet of flame, from which she died in a few hours.—Ex.

We are dependent in so many ways on our

domestic unimals that the condition of our hay crop is hardly second to that of grain. Early, in the season the drouth was very threatening, and the price of hay advanced considerably on the strength of it. Fortunately, it came on us so early that a much greater breadth of corn than usual was put in near all the great centres where hay is in demand, with an especial view to curing the herbage as fodder; and this alone by lessening the deniand for hay, would have kept the price down. But an additional aid ed to retreat until after dark .- Towanda Argus. came in the late rains, which not only helped the pastures, so that there need be no pressure on the dried material till late in the season, but in the meadows gave a chance in many cases for a heavy second mowing. But beyond all this it turns out that the first or main crop is by no means as poor as was anticipated.

In Kentucky, indeed, the average is higher. than usual some figures putting the hay crop of that State as much as ien per cent. greater than usual. As this is one of the States where the hay crop is one of the most important, the full crop will have an influence on the general orice all round.

A great deal of hay is exported from Maine, and is sent in boats south to points all'along the coast. And here, also, a drop is reported rather above the average. There is, however, debelency in most of the other shipping States, but with the aids before noted, we do not think prices will rule much it any above the usual average.

With accommodations for less than six hun dred prisoners, there are now in the Penitentiary more than seven hundred, thus compelling the violation of a law which requires the eparate confinement of convicts, in some two to three hundred instances, and in aggravation of this condition of affairs some of the interior county judges are sending to the already unlawfully crowded and over crowded cells prisoners convicted of larcenies of the pettlest val-

It would also furni pleasing entertainment for the citizens at very little expense. Said Society might be composed of President, Vice President, Secretary, Treasurer Committee on Programme and Contributors. When the Contributors shall have practiced

reading their selections till they think it will do to read them in public, let the Committee put those selections in their proper places in the Programme. Let the frequency of holding the public meetings be governed mainly by the amount and interest of the Contributors. While the one rowed with all her might the other two paddled, thus somewhat increasing their speed : but the deer was slowly gaining on them, and knowing they could not reach the shore before being overta-ken, they ceased rowing to prepare for the inevitable battle.

When the deer, snorting and plunging had den Eagle and Mortar. reached to within a few feet of the boat, it stopped for a moment. Then it made a sudden plunge, and as its head struck the side of the boat the brave girls brought down their raised paddles upon it with such force as to drive it under water. The girls again raised their only weapons, and as the head rose to the surface they again brought their paddles to bear upon it with the same result. When the deer again raised from the water it

seemed to realize that this was to be a death struggle, and its eyes gleamed like balls of fire. It made a lunge, and threw its fore feet over the side of the boat, near the oar locks. This learly capsized the clumsy craft, and threw Maggie Jordan, the oldest of the three, into the water; but as she tell she caught the edge of the boat, and was hauled in by one of her companions. BUTTER. Receipts last six days......20,676 pkgs There is a fair sprinkling of dairies arriving : some very fine sold yesterday for 82c., but today it would be difficult to obtain above 31c .-Selections of firkins sell fairly to the local trade but good to prime lots are accumulating a trithen only in a small way. Western butter is arriving freely, and though choice is in fair request, still buyers can generally obtain what they want at a concession of about 1c. from

late current prices.

CHRESE. Receipts last six days...... 55,419 boxes The attendance of buyers this morning was very light, and shipments will probably be smaller than any week since the season fairly commenced. Late yesterday afternoon one or two shippers were in the market and purchased several lines of good useful cheese at the surprisingly low figure of 9c. Unless prices are put to about 8 @ 9c. there is no such thing as forcing sales. Advices from England are very untavorable. The Englishmen are scared they think America is full of cheese and that it will be forced upon them soon in such quantities that it will have to be given away, and consequently none of them dare buy any stock ahead at never so low prices.

EGGS. The receipts are a trifle more free and with a continued light demand prices are weak .-State and Pend. @ 21 c

Binghamtou, April 28, 1875.—tf. WHAT IS

It is a liquid Linament for House and stable use. A valuable combination, discovered by a celebrated Englishchomist and horse-farrier. Was introduced in the United States in the year 1856, and since that time, by its great success, in the cure of diseases, it has won for itself that world wide reputation it so richly deserves, and now stands at the head of all linaments unrivalled.

AS A FAMILY MEDICINE.

It has already gained the confidence and admiration of thousands of households for its many cures of discases were external applications are of so much importance. It is especially admired as a family remedy for tis peculiar chemical combination, possesing no harsh ingredients, [like tincture of Cayenne or red-pepper, of which cheap and valuess Linimonts are largely composed,] which increase instead of diminish the inflamation, making it by nature a speedy cure for RHEUMATISM, HEADACHE, SORE THROAT, COLIC, COUGHS, CHOLERA, TOOTHACHE, BRUISES, SPRAINS, LUMBAGO, CRAMPE, COLDS, CHILLS, FROST, TIO DOLOB.
