Harford November 3d, 1875.

Bees.

The California Agriculturist says that there are two million beehives in the United States, each hive yielding a little over twenty-two pounds of honey in a year. The average price at which honey is sold is estimated at twenty-five cents a pound, from which it appears that bees paying their own board, present us with a revenue of about eight million dollars a year.

It may be said, that they give a pound of pure honey to every man, woman or child in the United States. The Agriculturist estimates the profits on the sale of surplus honey at from fifty to two hundred per cent. on the capital invested But all bees are not as well educated as those of California.

The honey that comes to us from California, when not cut up and bottled, is contained in little square wooden frames, probably six by six inches, in which the bees deposit it ready for transportation.—The upper side of the otherwise flat frame is made of a thin piece of wood shaped like a V. The bees begin building on the lower point of the V, and are thus made to keep their wax structure in the middle of the frame.

After the honey has been deposited the frames may be packed closely together, and each layer is kept separate from the others by the projecting sides of the frame. California honey usually reaches Eastern markets in this way, but for retail sale is taken from the frames and packed in glass bottles or jars.

The Furniture.

The following receipt will restore the original polish of furniture, especially in the case of such articles as pianos, fancy tables, cabinets, etc., which will become tarnished by use:

Make a polish by putting half an ounce of shellac, the same quantity of gum lac, and a quarter of an ounce of sandarac into a pint of spirits of wine.—Put them all together in a stone bottle, near the fire, shaking it very often. As soon as the gums are dissolved it is ready for use. Then take a roller of woolen rags—soft old broadcloth will do nicely—put a little of the polish on it, also a few drops of linseed oil. Rub the surface to be polished with this, going round and round, over a small space at a time, until it begins to be quite smooth. Then finish by a second rubbing with spirits of wine and more of the polish. Furniture thus treated will have a brilliant luster equal to new.

To Select Meat.

It is always important to know how to choose meat in buying. Ox beef should be of fine grain or fiber, the flesh or lean of a bright red color and firm; the fat white, and distributed throughout the lean; it should not be yellow or semi-fluid. If the meat is entirely lean it will be though and its nutritive power low.—Veal is dry if fresh. It should be close grained. If the meat is moist and flabby it is stale. Mutton should be of a clear deep pink tint; firm and with a liberal supply of fat. Fine weather mutton may be recognized by the presence of a small mass of fat on the upper part of the leg. It is more nutritous than ordinary mutton, and the darker its tint the finer its flavor. Pork should be of a pale pink tint, and the fat very firm. If it is soft or if the fat is yellow the meat is bad. If it is semi-fluid the animal has probably been feed on flesh.

Quince Preserves.

Peel and core the quinces; simmer the pealings and cores in just water enough to cover them till they are done; then strain and use the same water to boil the quinces in, part at a time till they are soft. Take them out on a colander to drain, and into the kettle put pound for pound of sugar, and boil till the syrup is made. In this stew the quinces half an hour, take them out, boil down the syrup until it is thick, and strain it over the fruit through a fine sieve. The same quantity of apples as of quinces may be taken, and when the preserve is made it will not be easy to tell one from the other.

To Preserve Tomatoes.

Scald ripe fruit with boiling water, and then peel the tomatoes. Stew in a preserving kettle till the whole mass is reduced to a soft pulp. Put glass or stoneware vessels in cold water and heat it till it boils.

Fill the hot vessel with the hot fruit and seal them up air tight. When you prepare them for the table heat them thoroughly and season to taste.

Miscellaneous.

VEGETINE

—WILL CURE—

SCROFULA,

Scrofula Humor.

Vegetine will eradicate from the system every taint of Scrofulous Humor. It has permanently cured thousands in Boston and vicinity who had been long and painful sufferers.

Cancer, Cancerous Humor.

The marvelous effect of Vegetine in case of Cancer and Cancerous Humor challenges the most profound attention of the medical faculty, many of whom are prescribing Vegetine to their patients.

Canker.

Vegetine has never failed to cure the most inflexible case of Canker.

Mercurial Diseases.

The Vegetine meets with wonderful success in the cure of this class of diseases.

Pain in the Bones.

In this complaint the Vegetine is the great remedy, as it removes from the system the producing cause.

Salt Rheum.

Tetter, Salt Rheum, Scald head, &c., will certainly yield to the great alterative effects of Vegetine.

Erysipelas.

Vegetine has never failed to cure the most inveterate case of Erysipelas.

Pimples and Humors of the Face.

Reason should teach us that a blotchy, rough or pimpled skin depends entirely upon an internal cause and no outward application can ever cure the defect.—Vegetine is the great blood purifier.

Tumors and Ulcers.

Are caused by an impure state of the blood. Cleanse the blood thoroughly with Vegetine, and these complaints will disappear.

Catarrh.

For this complaint the only substantial benefit can be obtained through the blood. Vegetine is the great blood purifier.

Constipation.

Vegetine does not act as a cathartic to deliterate the bowels, but cleanses all the organs, enabling each to perform the functions revolving upon them.

Piles.

Vegetine has restored to health who have been long and painful sufferers.

Dyspepsia.

If Vegetine is taken regularly, according to directions, a certain and speedy cure will follow its use.

Faintness at the Stomach.

Vegetine is not a stimulating bitters which creates a fictitious appetite, but a gentle tonic, which assists nature to restore the stomach to a healthy action.

Weakness.

Vegetine acts directly upon the causes of these complaints. It invigorates and strengthens the whole system, acts upon the secretive organs and allays inflammation.

General Debility.

In this complaint the good effects of the Vegetine are realized immediately after commencing to take it; as debility denotes deficiency of the blood, and Vegetine acts directly upon the blood.

MANHOOD HOW LOST, HOW RESTORED! Price, in a sealed envelope, only six cents.

Just published, a new edition of DR. CULVERWELL'S CELEBRATED ESSAY on the radical cure (without medicine) of Spermatorrhœa or Seminal Weakness, Involuntary Seminal Losses, Impotency, Mental and Physical Incapacity, Impediments to Marriage, etc.; also Consumption, Epilepsy and Fits, induced by self-indulgence or sexual extravagance, &c.

The celebrated author, in this admirable Essay, clearly demonstrates, from a thirty years' successful practice that the alarming consequences of self-abuse may be radically cured without the dangerous use of internal medicine or the application of the knife: pointing out a mode of cure at one simple, certain, and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately, and radically.

☞ This lecture should be in the hands of every man in the land.

Sent under seal, in a plain envelope, to any address, Post paid, on receipt of six cents or two post stamps. Address the Publishers,
