The Long Looked For—Come at Last!

THE CELEBRATED

Florence Sewing Machine.

This machine is the most perfect instrument to execute any kind of sewing now done by machinery in the world. It is simple and perfect in its mechanical construction. The feed may be reversed at any point desired without stopping, which is a great advantage in fastening the end of seams.

It makes FOUR DIFFERENT STITCHES, Lock, Knot, Double Lock, Double Knot, each stitch perfect and alike on both sides of the fabric.

Operators can select any stitch they want and change from one stitch to another without stopping the machine.

Its stitches cannot be excelled for firmness, elasticity durability and beauty of finish. No difficulty experienced in sewing across thick seams.

Sews light and heavy fabrics with equal facility. It will Braid, Tuck, Quilt, Cord, hem, Fell, Bind, Gather, and do all kinds of Sewing required by families and manufacturers. The work will feed either to the right or left, without stopping the machine.

The most inexperienced find no difficulty in using it.

It is thoroughly practical and easily understood. It has no springs to get out of order, and will last a lifetime.

It runs easily, and almost noiseless. It is the most rapid sewer in the world; making five stitches to each revolution.

It uses the same size thread on both sides of the fabric.

It folds no dresses, all its mackinens being on top of the table.

Every machine is warranted to give entire satisfaction, and to do all that is claimed for it.

Miss CARRIE E. STANTON is the agent for this machine. By calling at her residence on Main Street, Millintown, one of these machines can be seen in operation.

Fisk's Patent Metallic Burial Cases.

FOR ordinary Internments, depositing in Vaults and transportation they have no rival. They are made of the most imperishable materials, and are enameled inside and out to prevent rust and the exterior has a FINE ROSEWOOD FINISH. When properly cemented, the remains of the deceased, are free from irritation of water, or depositions of vermin. They may without offense odor be kept as long as desired—thus obviating the necessity of hasty burials. Their long and successful use and the approbation given them renders unnecessary any extended notice of their valuable advantages.
