R. C. BROWNING. 347 Broadway, N.Y

The Long Looked For-Come at Last THE CELEBRATED Florence Sewing Machine.

This machine is the most perrect instrument to execute any kind of sewing now done by machinery in the world. It is simple and pertect in its mechanical construction. The tood may be reversed at any point desired without stopping, which is a great adramage

in fashening the end of series. It makes FOUR DIFFERENT STITCHES, Lock, Knot, Dauble Lock, Dauble Knot, each stitch perfect and alike on both }

change from one stitch to another with- which lark within the system or curst out ant stopping the maching.

Its stitches cannot be excelled for firmness, clasticity durability and beauty of finish. by many compounds of Suraporties, that difficulty experienced in sewing across promised much and did nothing: but they

decay. The scrofulous contamination is va-riously caused by mercurial disease, low living, disordered digestion from unhealthy food, impure air, flith and filthy habits, the depressing vices, and, above all, by the venezeal infection. Whatever he its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children." The diseases it originates take various names, according to the organs it attacks. In the lungs, Scröfala produces undersities, and finally Consumption; in the glands, swellings which supparate and be-come alcerous sores; in the stomach and howels, decaugements which produce indigestion, dyspersia, and liver complaints; on the skin, erupive and cataneous affections. These, all having the same origin, require the same remedy, tiz., purification and invigora-tion of the block. Furify the blood, and these dangerous distempers have you. With feeble, foul, or corrupted blood, you cannot have health; with that "life of the ficsh" healthy, you cannot have screfulous disease.

Ayer's Sarsapatilla

Er

is compounded from the most effectual antidotes that medical science has discovered for this afflicting distension, and for the cure of the disorders it entails. That it is far supe-rior to any other remedy yet devised, is known by all she have given it a trial. That it does combine virtues truly extraordinary in their effect upon this class of complaints, is indisputably proven by the creat multitude of publicly known and remarkable creas it has made of the following diseases: King's Evil, or Glandular Swellings, Tumors, Eruptions, Pimples, Blotches and Sores. sipelas, Rose or St. Anthony's Fire. Salt Rheum, Scald Head, Coughs from tuberculous deposits in the lungs, White Swellings, Debility, Dropsy, Neuralgia, Dyspepsia or Indigestion, Syphilis and Syphilitic Infections, Mercurial Diseases, Female Weaknesses, and, indeed, the whole-series of complaints that arise from impurity of the blood. Minute reports of individual cases may be found in Aven's American ALMANAC, which is furnished to the druggists for gratitious distribution, wherein may be learned the directions for its use, and some of the remarkable cures which it has made when all other remedies had failed to afford relief.1 Those cases are parposely taken from all sections of the country, in order that every reader may have access to some one who can speak to him of its benefits from personal experience. Scrofula depresaes the vital energies, and thus leaves its victims far more subject to disease and its faint results than are healthy constitutions. Hence it tends to shorten, and does greatly shorten, the average duration of human life. The vest importance of these considerations has led us to spend years in perfecting a redieds which is adequate to its cure. This we now offer to the public under the name of Area. SARSAPARILLA, although it is composed ingrements, some of which exceed the best of Saraparalla in alterative power. By its aid you may protect yourself from the suffering and danger of these disorders. Purge out the foul corruptions that not and fester and vigorous health will follow. By its pecu-liar virtues this remark stimulates the vital sides of the fabric. Lar virtues this remark stimulaues the virtal functions, and thus expets the distempers
