have also been awarded these Mackines at the exhibitions of London, Paris, Dublin, Linz, Besancon, Bayonne, St. Dizier, Chalons, and they have een furnished, by special command, to the Empress of France, Empress of Austria,

Empress of Russid, Empress of Brazil, Queen of Spain, and Queen of Bacaria.

The GROVER & BAKER Elastic-Stitch Sawing Machines are superior to all others for the following reasons:

1. They sew with two threads direct from the spect, and require no rewinding, 2. They are more easily understood and used, and less liable to derangement than oth

er machines. 8. They are capable of executing perfectle, without change of adjustment, a much great er variety of work than other machines. 4. The stitch made by these machines is much more firm, clastic, and durable, especi ally upon arricles which require to be washed and ironed, than any other stitch-

the most plumb and beautiful in use, and retains this plumpness and beauty even upon articles frequently washed and ironed until they are worn out.

6. The structure of the seam is such that, though it be cut or broken at intervals of only a few stitches, it will neither open, run, nor ravel, but remains firm and durable,

7. Untike other machines, these fasten both ends of the seam by their own operation 8. With these machines, while silk is used upon the right or face side of the seam, cotton may be used upon the other side without lessening the strength or durability of the prices. seam. This can be done on no other machine, and is a great saving upon all articles stitch-

el or made up with sirk.

9. These machines, in addition to their perior merits as instruments for sewing, by a Lain's Tan Yard, in Millin. Tanners' and change of adjustment, easily learned and practised, execute the most beautiful and permanent embroidery and ornamental work.

REVOLUTION! REVOLUTION!

American Tanning Company FREY, FARNSWORTH & CO.

COL. E. FREY, of West Virginia, Pres't. L. S. FARNSWORTH, Secretary. GEO. STADTMILLER, Indiana county, General Agent.

A splendid opportunity for a secure and moderate investment of capital is now offered by this Company to Tanners and Capitalists of large as well as moderate means, as the Company is now prepared, after a successful test of Hickel's improved system of tan ning in several counties in this State and adjoining States, to offer for rale some territary within this State, Tennessee, Texas, Oregon, Ctah, New Mexico and Nevada, in the shape of rights for Districts, Counties, Towns or for individual use of said improved sys-tem secured to Sanford A. Hickel, Esq., by Letters Patent dated November 7th, 1865, and granted for seventeen years, and by said S. A. Hickel, Esq., legally transferred to this Company for this and the other State and Territories mentioned.

The successful workings of this great dis-

covery has been demonstrated in every instance, wherever fully and thoroughly tested, and has given and now gives general and universal satisfaction, both as to quality of leather and the saving in part of the former expensive material-bark, as can be seen by the attached certificates. This is the only sys-

tem ever introduced which is warranted as to its virtue by the proprietors. We warrant to manufacture Sale Leather in Ninety days, Harness Leather in Fifty days Briefle Leather in Forty days. Upper Leather in Thirty-Five days, Kipp Leather in Thirty days, Calishin in Twenty to Twenty-Five days, Sheepskin in Two to Three days.

We warrant to save one third in heavy, and one half of the back formerly used in light stock, making heavier leather than can be manufactured with bark alone. A superlor quality of leather is also warranted to be ande under this system. No alterations are necessary or required in

the varil or in the manner of mnaufacture, but a great raying of labor is attained by not being required to "hy away," and this leather being secured with great case. The great virtue of this discovery consists

In the lessoning to one-half the expense of tunning by the use of a purely regetable matter, in conjuction with tun bark, which un be at any time, in all seasons, and at any lace secured at the limited cost of not more han twenty-five cents to a hundred hiles.

than twenty-five cents to a hundred bites.

This system having been but recently discovered and patented. November, 18:15, has not been very extensively introduced as yet, the commencement having been made by this Company, with the Patenter in this State in May, 18:1, and is now successfully used in the following places, reference to that have been successfully and in the following places, reference to the control of the c which is made, viz: Greene county, Pa.—N.
