American Tanning Company FREY, FARTSWORTH & CO.

L. S. FARNSWORTH, Secretary. GEO. STADTMILLER, Indiana county, General Agent.

A splendid opportunity for a secure and moderate investment of capital is now offered by this Company to Tanners and Capitalists of large as well as moderate means, as the Company is now prepared, after a successful test of Hickel's improved system of tanning in several counties in this State and adjoining States, to offer for sale some terri tory within this State, Tennessee, Texas, Oregon, Utah, New Mexico and Nevada, in the hape of rights for Districts, Counties, Towns or for individual use of said improved system secured to Sanford A. Bickel, Esq., by Letters Patent dated November 7th, 1865, and granted for seventeen years, and by said S. A. Hickel, Esq., legally transferred to this Company for this and the other State and Territories mentioned.

The successful workings of this great discovery has been demonstrated in every instance, wherever fully and thoroughly tested, and has given and new gives general and universal satisfaction, both as to quality of leather and the saving in part of the former expensive material-bark, as can be seen by the attached certificates. This is the only tem ever introduced which is warranted ac to its virtue by the proprietors.

We warrant to manufacture Sole Leather in Ninety days, Harness Leather in Fifty days Bridle Leather in Forty days, Upper Leather in Thirty-Five days, Kipp Leather in Thirty days, Calfskin in Twenty to Twenty-Five days, Sheepskin in Two to Three days. We warrant to save one-third in heavy, and

one-half of the back formerly used in light stock, making heavier leather than can be manufactured with bark alone. A superior quality of leather is also warranted to be made under this system. No alterations are necessary or required in

the yard or in the manner of manufacture, but a great saving of labor is attained by not being required to "lay away," and this leather being scoured with great ease. The great virtue of this discovery consists in the lessoning to one-half the expense of

tanning by the use of a purely vegetable matter, in conjunction with tan bark, which can be at any time, in all seasons, and at any place secured at the limited cost of act more than twenty-five cents to a hundred hides This system having been but recently discovered and patented, November, 1865, has not been very extensively introduced as yet,

the commencement having been made by this Company, with the Patentes in this State in May, 1866, and is row successfully used in the following places, reference to which is made, viz: Greene county, Pa.—N. Newman, Harrington & Co., Washington, Pa. -S. Smith, J. Weber and others: Favette county, Pa.-T. Verson, J. Emory, Daning & Bro., Indiana, Pa. - George Stadtmiller, West moreland county, Pa .- J.
