### REVOLUTION! REVOLUTION!

American Tanning Company FREY, FARNSWORTH & CO. Col., E. FREY, of West Virginia, Pres't. L. S. FARNSWORTH, Secretary. GEO. STADTMILLER, Indiana county, General Agent.

A splendid opportunity for a secure and moderate investment of capital is now offered by this Company to Tanners and Capitalists of large as well as moderate means, as the Company is now prepared, after a successful test of Hickel's improved system of tan-cary within this State, Tennessee, Texas, Ovegon, Utah, New Mexico and Nevada, in the shape of rights for Districts, Counties, Towns or for individual use of said improved sys-tem secured to Sanford A. Hickel, Esq., by Letters Patent dated November 7th, 1835, and granted for seventeen years, and by said S. A. Hickel, Esq., legally transferred to this Company for this and the other State and Territories mentioned.

The successful workings of this great disble Clothes Crash, Nankeens, Drillings, covery has been demonstrated in every in-&c., Finey and Plain Cassimeres, Sati. stance, wherever fully and thoroughly tested. and has given and new gives general and universal satisfaction, both as to quality of leather and the saving in part of the former expensive material bark, as can be seen by the attached sertificates. This is the only symtem ever introduced which is warranted as to its virtue by the proprietors.
We warrant to manufacture Solo Leather

in Ninety days, Harness Leather in Fifty days Bridle Leather in Forty days, Upper Leather in Thirty-Five days, Kipp Leather in Thirty days, Calfskin in Twenty to Twenty-Five

We warrant to save one-third in heavy, and one half of the back formerly used in light stock, making neavier leather than can be manufactured with back alone. A superior mality of leather is also warranted to be ande under this system.

No alterations are necessary or required in the yard or in the manner of manufacture, but a great saving of labor is attained by not being required to "lay away," and this eather being scoured with great case.

The great virtue of this discovery consists in the lessoning to one-half the expense of tanning by the use of a purely vegetable matter, in conjunction with tan bark, which can be at any time, in all scasons, and at any place secured at the limited cost of not more than twenty-five cents to a hundred hiller.
This system having been but recently dis-

covered and patented, November, 1865, has not been very extensively introduced as yet, the commencement leaving been made by this Company, with the Patentes in this State in May, 1860, and is row successfully used in the following places, reference to which is made, viz; Greene county, Pa.
