Althoughf such statements as this are frequently doubted, the investigations of medical science show that instantaneous rigidity is the occasional accompaniment of sudden and violent death, such as results from wounds of head or heart. Dr. Bridton, of Philadelphia, has studied the subject, and he relates that a man wounded in the left breast at the battle of Belmont, Missouri, captured a stray mule succeeded in mounting him, and then died; but his body retained the upright position of a living rider, and when it became necessary to take the mule for the use of a wounded man, the body was found to be so firmly and ridigly set that a certain amount of positive force was requisite to free the mule from its grasp.
