THE KIDNEYS.
The Kidneys are two in number, situated at the upper part of the loins, surrounded by fat, and consisting of three parts, viz: the Anterior, the Interior, and the Exterior.
The anterior absorbs. Interior consists of tissues or veins, which serve as a deposit for the urine and convey it to the exterior. The exterior is a conductor also, retransferring in a single tub, and called the Ureter. The ureters are connected with the bladder.
The bladder is composed of various coverings or tissues, divided into parts, viz: the Upper, the Lower, the Nervous, and the Muscular. The upper expels the lower retains. Many have a desire to urinate without the ability to retain. This frequently occurs in children.
To cure these affections, we must bring into action the muscles, which are engaged in their various functions. If they are neglected, Gravel or Dropsy may ensue.
The reader must also be made aware, that however slight may be the attack, it is sure to affect the bodily health and mental powers, as our flesh and blood are supported from these sources.

Medical.
THE GRAVEL.
The gravel causes from neglect of improper treatment of the kidneys. These organs being weak, the water is not expelled from the bladder but allowed to remain; it becomes feverish, and sediment forms. It is from this deposit that the stone is formed, and gravel ensues.
Pain occurring in the loins is indicative of the above diseases. They occur to persons disposed to acid stomach and chalybeate concretions.

Medical.
DROPSY.
Dropsy is a collection of water in some parts of the body, and bears different names, according to the parts affected, viz: when generally diffused over the body, it is called Anasarca, when of the abdomen, Ascites; when of the chest, Hydrothorax.

TREATMENT.
Helmbold's highly concentrated compound Extract Buchu is decidedly one of the best remedies for diseases of the bladder, kidneys, Gravel, dropsical swellings, rheumatism, and gonyorrheal affections. Under this head we have among Iguaria, or difficult and pain in passing water, Sanny Secretion, or small and frequent discharge of water; Strangury, or stopping of water; Hematuria, or bloody urine; Gout and Rheumatism of the kidneys, without any change in quantity, but in color, or dark water. It was always highly recommended by the late Dr. Physick, in these affections.
This medicine increases the power of digestion, and excites the absorbents into healthy exercise by which the watery or calcareous depositions, and all unnatural enlargements, as well as pain and inflammation, are reduced and it is taken by men, women and children. Directions for use and diet accompany.

PHILADELPHIA, Pa., Feb. 1867.
DEAR SIR—I have been suffering for upwards of twenty years, with gravel, bladder and kidney affection, during which time I have used various medical preparations, and been under the treatment of the most eminent Physicians, experiencing but little relief.
Having seen your preparation extensively advertised, I consulted with my family physician in regard to using your Extract Buchu.
I did this because I had used all kinds of abstract remedies, and had found them worthless, and some quite injurious. In fact I departed of ever getting well, and determined to use no remedies hereafter unless I knew of the ingredients. It was this that prompted me to use your remedy. Any advertisement that was composed of buchu, cubeb, and juniper berries, it occurred to me and my physician, after an examination of the article, and consulting again with the druggist, I concluded to try it. I commenced its use about eight months ago, at which time I was confined to my room. From the first bottle I was astonished and gratified at the beneficial effect, and after using it three weeks, was able to walk out. I felt much like writing you a full statement of my case at the time, but thought my improvement might only be temporary, and therefore concluded to defer, and see if it would effect a perfect cure knowing that it would be of greater value to you, and more satisfactory to me.
I am now able to report that a cure is effected after using the remedy for five months.
I have not used any now for three months, and feel as well in all respects as I ever did. Your Buchu being devoid of any unpleasant taste and odor, a tonic and invigorator of the system, I do not mean to be without it whenever occasion may require its use in such affections.

PHILADELPHIA, Pa., Feb. 1867.
DEAR SIR—I have been suffering for upwards of twenty years, with gravel, bladder and kidney affection, during which time I have used various medical preparations, and been under the treatment of the most eminent Physicians, experiencing but little relief.
Having seen your preparation extensively advertised, I consulted with my family physician in regard to using your Extract Buchu.
I did this because I had used all kinds of abstract remedies, and had found them worthless, and some quite injurious. In fact I departed of ever getting well, and determined to use no remedies hereafter unless I knew of the ingredients. It was this that prompted me to use your remedy. Any advertisement that was composed of buchu, cubeb, and juniper berries, it occurred to me and my physician, after an examination of the article, and consulting again with the druggist, I concluded to try it. I commenced its use about eight months ago, at which time I was confined to my room. From the first bottle I was astonished and gratified at the beneficial effect, and after using it three weeks, was able to walk out. I felt much like writing you a full statement of my case at the time, but thought my improvement might only be temporary, and therefore concluded to defer, and see if it would effect a perfect cure knowing that it would be of greater value to you, and more satisfactory to me.
I am now able to report that a cure is effected after using the remedy for five months.
I have not used any now for three months, and feel as well in all respects as I ever did. Your Buchu being devoid of any unpleasant taste and odor, a tonic and invigorator of the system, I do not mean to be without it whenever occasion may require its use in such affections.
M. M. MCCORMICK.
Should any doubt Mr. McCormick's statement, he refers to the following gentlemen:
