Bought a Saddle—Samuel Black, Esq., of the Pennsylvania Railroad, bought a saddled of James H. Simons, last week. Mr. Black also purchased a pair of fine horses, from Mr. James North, of Patterson.

HOUSE AND LOT FOR SALE.—Mrs. Sarah J. Lusk offers to sell her House and Lot situated in Perryville, this county, on very reasonable terms. The house is located on the corner of Market and Third streets, nearly opposite J. B. Oke-son's store, and is in good repair. There is also a shop connected with the house, fronting on Ma ket street, suitable for any business not requiring too much room.—Any one desiring a pleasant dwelling, would do well to call and examine it and see for themselves, and learn terms.

NECK TIE SOCIABLE.—On Tuesday evening of last week a neck tie sociable was held at the residence of one of our citizens. It passed off pleasantly, and was the source of much humor to all participants. Each young gentleman drew a neck-tie from a box. The tie drawn also placed in his charge for the evening a young lady who wore a dress of the material which corresponded with the material of the tie. The SENTINEL'S devil came into the office the next morning radiant with smiles, with the little finger of his left hand directed to his neck.

INTERESTING EXPERIMENT.—An exchange says that some of our young men who go to see girls have recently adopted a new and entirely original way of obtaining kisses. They assert, on the authority of scientific writers, that the concussion produced by a kiss will cause the flame of a lamp to flicker, and easily induce the girl to try the experiment in the interest of science. The first kiss or two the parties watch the flame to see it flicker, but soon become so interested in the experiment as to let it flicker if it wants to. Hence the term "Let her flicker."

SEPARATOR DOUGHNUTS.—Peel and boil a half dozen potatoes; mash well and thin them with the water they were boiled in; run them through a colander; when cool add one tea cup full of home made yeast, and then let them rise. When the sponge is light, add 1 1/2 pints of new milk, 3/4 of a pound of butter, sufficient flour to make a stiff batter; let them rise again. When risen, put in 1 1/2 pounds of white sugar, free of lumps, break 3 eggs in 1, grate outmug, 1 tea spoonful of cinnamon and enough dough to make it a stiff as bread. When light, roll thin and fry in hot lard.—Ez.

LOOK OUT FOR COUNTERFEIT NOTES.—The public should be on the lookout for counterfeit notes of the denomination of ten dollars, on the First National Bank of Poughkeepsie, New York. We saw no less than three of them last week that had been passed upon unsuspecting parties. The face of the note presents a fair appearance and is well calculated to deceive those who are not expert in handling money, but the back is a miserable dandy. Lookout for them as there seems to be parties in Chester county who are successfully shoving them upon the community.—The American R. pub. lica.

A SHOCKING ACCIDENT—A Boy Crushed to Death by the Wheel of a Loaded Four-Horse Wagon.—Last Monday afternoon the snow melted rapidly under the pleasant sun. Water flowed in considerable volume through the gutters or drains along the streets. Near Patterson School House a number of boys of that town were engaged in the sport of damming a gutter to fullness and then tearing away the obstruction to see the rush of water. A dam was completed and broken down just as a four-horse wagon loaded with a cord of wood came along. A boy between the age of 7 and 8 years, a son of W. C. Laird, of Patterson, was there, enjoying the sport and to escape the rush of water from the broken dam, sprang aside, tripped and fell under the passing wagon, one wheel of which passed over his abdomen, injuring him so fatally that he died within 20 minutes.—The people were greatly shocked by this fearful accident, and Mr. and Mrs. Laird have the sympathy of the whole community in their sad and unexpected bereavement.

CONCERNING country newspapers the Cleveland Herald writes: "The local paper is an absolute necessity to the community where it is published. All the city papers cannot supply the place of the home paper. That should be the first love of every man and woman, for with the paper is the locality identified. The paper gives the country and town where printed much of their importance in the world, and gives in detail the local news which cannot be gained by any other source. Every day's issue of the paper is so much local history, and the rise, growth and development of the town and county can be measured and recorded only by the local newspapers that constantly is gathering its items. People do not properly appreciate their home newspaper. They measure the value of a paper too much by the number of columns it contains.—The home paper at any price is the cheapest paper one can take, for in it is found the information to be obtained from no other source.

Another thing to be taken into consideration. Every county has one or more newspapers. Hence, the circulation of each paper must be limited. There is therefore the greatest need of activity and interest on the part of people to give their own paper, vigorous and substantial support.

[COMMUNICATION] MEALISTERSVILLE, Feb. 20, 1871. MR. EDITOR:—Having seen a notice in the county papers of last week's issue, that a trial of Myers & McCaulley's Band Cutter and Sheaf Conveyancer, patented Jan. 31st, 1871, would take place at the barn of S. C. Myers, in Fayette township, on Friday, the 17th inst., I took occasion to attend for the purpose of seeing whether the invention possessed any merit. When I arrived at the place designated, to my great astonishment the barn was crowded with more than a hundred people, the Separator with the improvement attached in full motion, and the sheaves, a distance of about thirty feet from the feeder, traveling up to him with hands out, as fast as he would remove them. The gazing multitude looked with wonder and surprise, and as soon as the Machine had stopped, there was one spontaneous manifestation of approval and acknowledgment of the successful operation of an invention of such vast moment, and one which bids fair to the inventors. From one to three men are saved in threshing with the Band Cutter and Conveyancer attached, and the sheaves are brought to the feeder in better shape than in the usual way. It makes no difference from what part of the barn the sheaves are to be brought, as the Conveyancer is so arranged that it can be readily attached to either side of the machine, and extended in any desired direction from it, and bring them from overhead as well as from the stack if desired. No threshing machine can be complete without this improvement, and the day cannot be far distant when it will be universally attached to not only all separators, but all small threshers.—The following testimonial was signed by nearly a hundred men who witnessed its operation and saw it deliver the sheaves to the feed from all directions, placing them on the table with hand out: We, the undersigned, citizens of Juniata county, having witnessed a trial of Myers & McCaulley's Combined Conveyancer and Band Cutter, at the barn of S. C. Myers, in Fayette township, on the 17th day of February, 1871, unhesitatingly express our high appreciation of so valuable an improvement to grain Separators and threshing machines generally, and the satisfactory manner in which it performed what is claimed for it. Having seen it attached to a grain Separator and thoroughly tried, and with the aid of one man bringing the sheaves from the east end of the barn, and then from the west, from the north side now, and then from the south, and lastly from overhead, with more precision and regularity, and delivered on the table alongside of the feeder with the band cut, than could have been done in the usual way by three men; we can cheerfully recommend this invention as a great labor saving machine, an improvement of no little importance, and that it will perform all that the patentees claim for it.

AN EYE WITNESS.

MUSICAL.—Among the thousand and one Pianos offered to the public, we scarcely know any instrument so fully uniting all the desirable qualities sought for as the Knabe Piano.—It is a matter of some difficulty and perplexity to the inexperienced persons to select a good instrument of any capacity. We too often rely upon the judgement of friends in the selection of a Piano, and are thus frequently disappointed. The only sure way, in our opinion, is to go to the best maker. For this reason, we recommend to our readers to purchase Pianos of William Knabe & Co's manufacture.—This will relieve them the vexatious necessity of waiting time in a long search. The reputation of the Knabe Pianos is an infallible guaranty of excellence. In the houses of the most accomplished and wealthy of our citizens, and in our best seminaries and colleges, these magnificent instruments may be found. Nor is this any wonder, for, in purity, depth and consistency of tone, they are unsurpassed. Their gradation of scale is so exquisitely, and, at the same time, comprehensively attuned, that they are capable of expressing every emotion of the human heart and soul. Their tone is exquisitely pure and unique, and so even, sweet and sympathetic that it inspires all that listen to it, while at the same time the action is perfectly free, and the keys rebound to the touch with such sensitiveness and intelligence, so as to speak, as to make one almost think that the mind of the manufacturer lingers in his work.

DIED. On the 24th inst., at the residence of his son, in Bourbon county, Kansas, ROBERT QUICK, aged 70 years.

The deceased was a native of Ireland and removed to America in early life. He located in Delaware township, in this county, where he resided for more than 60 years, only quitting his adopted home when old age had compelled him to abandon active business. He was the last survivor of the Episcopal congregation formerly at Thompson's, and while the church maintained its existence was always a most active member. After its dissolution he continued to practice the principles taught by its tenets, and in the course of his long life always bore an unblemished christian character. By industry and economy he accumulated quite a handsome fortune, a portion of which was always shared by the poor who were in need of assistance. He died in the faith in which he had so long lived and could with truth exclaim: There is no death! What seems so is transition! This life of mortal breath is but a suburb of the life elysian, Whose portal we call death.
