We are indebted to the Country Gentleman for the following: For a good sized loaf take three quarts of Indian meal. three quarts of rye meal, one half pint prices a general assortment of of yeast, one teacup of molasses; mix into the pan in which it is to be baked and let it stand in a warm place two hours, or until it cracks open at the top; then bake slowly four hours. If a brick oven is used, all the better in, which case it should remain in the oven over night, it should remain in the oven over night. This way for Barand you will give "corn-cakes" and "corndodgers" to the pigs.

Another recipe .- Two quarts corn meal with as little boiling water as will wet it through; add one quart unboiled wheat or tye n cal, small teacup melaseas, tablespoonful salt; mix thoroughly with a spoon, thinning down the milk to the consistancy of a thin pudding; bake slowly several hours in a covered iron basin -Many persons suppose it is necessary to have rye meal for this bread, which is BOYS' READY MADE CLOTHING often difficult to obtain, the wheat Graham is fortunately kept in most of the Also, Carpets White Shirts, Fancy Over stores and is, I think, preferable,

AGE OF SHEEP - The age of sheep may be known by examining their front teeth. They are eight in number and appear, during the first year, of small save money by giving us a call before pur size. In the second year the two middle ones foll out and their place is supplied by two new teeth, which are easily distinguished, being of larger size. In Aug. 18, '69 the third year, two other small teeth, one from each side, drop out, and are replaced by two large ones. In the fourth year, Ming. Bridge Street, Midlintown, Pa. the large teeth are six in number, and only two small ones remain, one at each only two small ones remain, one at each D. W. A. Belford, and has opened out a end of the range. In the fifth year, the remaining small teeth are large. In the LARGER AND FINER ASSORTMENT OF sixth year, the whole begin to be worn. CLOTHS. and in the seventh, sometimes sooner, fall out and are broken.

common leaf tobacco, as much as the user tion. He also manufactures to order, all may think necessary, and make a strong sorts of ten, letting it boil some time, so as to get all the strength from the tobacco; then On reasonable terms. sprinkle the ten all over and about the By strict attention to business, be hopes to receive a liberal share of public patronplace where the mites are, and if the first age Give him a call and inspect his styles application is not sufficient, use in the of cutting and workmanship before going same manner a second time ; but the first time is almost always effectual

BUTTERMILK -Persons who have not been in the habit of drinking buttermilk consider it disagreeable, because it is slightly acid, in consequence of lactic acid. There is not much nourishment in buttermilk, but the lactic acid assists the digestion of any food taken with it .-The Welsh peasants almost live upon oat-cake and buttermilk. Invalids suffering from indigestion will do well to drink buttermilk at meal times

CURE FOR BOTS .- Take a ripe gourd, cut it open and take out the pulp and seeds together. To one pint of this pulp add three pints of water, and boil till the ened, falling hair checked, and baldwater is reduced to about a half pint; ness often, though not always, cured strain and add a pint of molasses. When hair where the follicles are destroyed, cool administer one half of this mixture or the glands atrophied and decayed. as a drench, repeating the dose, if nec- But such as remain can be saved for essary, after a few hours; but one dose usefulness by this application. Instead will generally cure.

HEN MANURE.—Save every ounce Its occasional use will prevent the hair you can gather. Put into barrels or from turning gray or falling off, and boxes and cover with earth, and in March next, make a compost, mixing shout these verte of good soil to enemy and soil to enemy the some preparations dangerous and the Millintown Foundry and Marchine Shop, and is prepared to manufacture articles of warious descriptions, such as Four and Six Morse-power Threshing Machines, also, about three parts of good soil to one part injurious to the hair, the Vigor can of hen manure, and leave it where the only benefit but not harm it. If wanted rain will keep it moist, till wanted for merely for a use A gill of this compost in a hill of corn, will act as a powerful fertilizer.

MILEING IN SILENCE,-At a Farmer's Club in West Cornwall, Conn., a farmer not soil white cambrie, and yet lasts observed that no talking should be allow ed while milking is going on. He said that he had discharged a man because he would interrupt the milking by talk- PRACTICAL AND ANALYTICAL CHEMISTS, ing, and in three days the increase of milk was equal to the man's weekly

Daniel H. Bartlett, of East Windso Ct. has succeeded in proving to his neighbors that it pays to raise good stock. In 1859 he purchased a thorough bred short-horned two-year old heifer for \$200. She has since had ten calves, from the sales of which he has realized a

### GROVER & BAKER'S SEWING MACHINE

The following are selected from thousands of testimonials of similar character, as expressing the reasons for the preference for the GROVER & BAKER Machines over all others.

"I like the Grover & Saker Machine, in should still want a Grover & Baker, and, hav ing a Grover & Baker, it answers the purpose of all the rest. It does a greater variety of work and it is easier to learn than any other, -Mrs. J. C. Croly (Jenny June)

"I have had several years' experience with a Grover & Baker Machine, which has given me great satisfaction. I think the Grover & Baker Machine is more easily managed, and less liable to get out of order. 1 prefer the Grover & Baker, decidedly."-Mrs. Dr. Watts, New York.

"I bave had one in my family for some two years, and from what I know of its workings, and from the testimeny of many of my friends who use the same, I can hardly see "I believe it to be the best, ail things con sidered, of any that I have known. very simple and easily learned; the sewing from the ordinary spools is a great advan-tage; the stitch is entirely reliable; it does ornamental work beautifully; it is not liable to get out of order."-Mrs. A. M. Spooner, 36

Bond Street, Brooklyn. "I am acquainted with the work of the principal machines; and I prefer the Grove-& Baker to them all, because I consider the stitch more elastic. I have work now in the house which was done nine years ago, which is still good."-Mrs. Dr. McCready, No. 43 East Twenty third Street, New York, "More than two-thirds of all the sewing

done in my family for the last two years ha been done by Grover & Baker's Machine, and He has also a large Room just opposite I never had a garment rip or need mending except those rents which frolicsome hoys will make in whole cloth. It is in my opinion by far the most valuable of any I have tried. Mrs. Henry Ward Beecher.

The Grover & Baker Sewing Machine Company manufacture both the Elastic Stitch and Lock Stitch Machines, and offer the public a choice of the best machines of both kinds, at their establishments in all the large cities, and through agencies in nearly all towns throughout the country. Price Lists and samples of sewing in both stitches furnished on application to Grover & Baker S. M. Co., 115 Market street, Harrisburg.
