FOR SALE. A SIX HORSE POWER ENGINE, with Governors, Boiler and Mud Boiler, all complete. For full particulars address ROBERT MCINTIRE, Peru Mills, Juniata Co., Pa.

Select Story. A WIFE ROASTED ALIVE. A FEARFUL TRAGEDY AT LINN, MASS. A Husband Charged with Throwing Kerosene Over His Wife and then Setting Her on Fire. BOSTON, Nov. 18.—One of the most brutal and inhuman tragedies which ever horrified any community was enacted at Linn last night, and is to-day the leading topic of conversation in that city.

AN OREGON ROMANCE. The Oregon Bulletin tells this romantic story: Twenty-five years ago a young couple residing in the State of New Hampshire met, loved and determined to marry. Like other human beings, they had passions, and they parted in anger. The young man moved into another part of the country, where he met another woman, whom he married.— A few years later he returned to the Pacific coast, and in time became a citizen of Oregon. The young woman fitted herself for the occupation of a teacher and went to Iowa, where she engaged in teaching school.

A WILD WOMAN. Gebhartsville, Somerset county, Pa., claims the sensation of the week. It has a genuine, simon pure, wild woman, almost as was Eve after the fall, for she wears only an apron of leaves, sandals of bark, and a necklace of tea-berries.— Swift as a doe, people have rarely been able to see her features distinctly in her visits to the neighboring farm houses and outskirts of the village; yet those who have seen her declare that she is far from uncanny in person and countenance. Her oval face is set with keen black eyes, and framed in long masses of flowing black hair; and with her tall, slender figure, she has the air of the Queen of the forests. Like most women, she has a great dread of men, and bounds away over fences and fields whenever one attempts to approach her. Yet she is consistent, and avoids in like manner the great familiarity with women.

SUFFERINGS AT SEA. A Dreadful Story of Shipwreck, Starvation and Death—A Humane Captain's Action. On Thursday, October 19, at eight A. M., a sail was discovered by the wheelman on the steamer "Moosa Taylor". The vessel lay directly in the steamer's track and appeared to be disabled, having but one mast standing and only her lower topmast set, running before a fresh southeast wind. On approaching her, it appeared to be a brig, water-logged, with her mainmast carried away, apparently deserted, no persons appearing in sight on board. A sail spread over the fore-castle and a tent rigged in the foretop-cross-trees, showed that the crew had occupied these places for some time. At every lurch the sea made a clear breach over the vessel from stem to stern. To all appearance it was a wreck which had long been water-logged and her crew taken off by some passing vessel. Her stern was broken away, the bulwarks on both sides gone and her sails flying from the foremast in rags.

General Hardee has been instructed in the Florida farmers in a system of tactics to be employed against vegetable-eating insects, which is, naturally enough, concussion of gunpowder or other explosives. He cleared his garden of the curculio by touching off two pounds of powder, the shock killing every insect within a considerable radius.
