disorders, which were aggravated by the scroinlons contamination until
they were painfully afflicting, have been radically
cured in such great numbers in almost every section of the country, that the public scarcely need to
be informed of its virtues or uses.

Scrofalous poison is one of the most destructive
enemies of our race. Often, this unseen and unfelt
tenant of the organism undermines the constitution,
and invites the attack of enfeebling or fatal diseases,
without excitting a suspicion of its presence. Again,
it seems to breed infection throughout the body, and
then, on some favorable occasion, rapidly develop
into one or other of its hideous forms, either on the
surface or among the vitals. In the latter, tubercles may be suddenly deposited in the lungs or
heart, or tumors formed in the liver, or it shows
its presence by eruptions on the skin, or foul ulcerations on some part of the body. Hence the occasional use of a bottle of this Scarsaparilla is advisable, even when no active symptoms of disease
appear. Persons afflicted with the following complaints generally find immediate relief, and, at
length, cure, by the use of this Scarsaparilla is advisable forms of Scarofulous disease. Also in the
more concealed forms, as Dyspepsia, Dropsy,
Sore Eyes, Sore Ears, and other eruptions or
visible forms of Scarofulous disease. Also in the
more concealed forms, as Dyspepsia, Dropsy,
Beart Disease, Fits, Epilepsy, Neuralgia,
and the various Ulcerous affections of the muscular and nervous systems.

Syphilis or Fenercal and Mercurial Diseases
are cured by it, though a long time is required for
subduing these obstinate maladies by any medicine.
But long continued use of this medicine will cure
the complaint. Leucorrhan or Whites, Uterrine
Ulcerations, and Female Diseases, are commonly soon relieved and ultimately cured by it,
purifying and invigorating effect. Minute Directions for each case are found in our Alumanac, supplied gratis. Rheumatism and Gout, when
caused by accumulations of extr aug 18, 1869-y. JUNIATA HOTEL. MIFFLINTOWN, JUNIATA CO., PA.

SIMON B. ALBRIGHT, Proprietor. mation of the Liver, and Jaundice, when arising, as they often do, from the rankling poisons in the blood. This SARSAPARILLA is a great restorer for the strength and vigor of the system. Those who are Languid and Listless, Despondent, Steepless, and troubled with Nervous Apprehensions or Fears, or any of the sfections symptomatic of Weakness, will find immediate relief and convincing evidence of its restorative power upon trial. Rooms large and comfortable—the Table supplied with the best the market affords— Stabling large and excellent—Bar constantly supplied with the choicest wines and liquors -no pains will be spared to please guests.

Charges moderate. A liberal share of public patronage is solicited. [may17, '71 [mny17, '71 BROCKERHOFF HOUSE. J. C AYER & CO., Lowell, Mas

FARM AND HOUSEHOLD.

THE BORERS. The beetle of this grub-worm comes out at night, first in the mouth of may, and deposits her eggs in the butt of the tree. The worm lives nearly three years before it becomes a beetle. In the fall of the third year it cats a hole into the heart of the tree; then forming an angle it bores to the back ; then it fills up that part of the hole last made with its woodcuttings, and lives there sungly till spring when it turns to a beetle to produce other worms. To day there is an effectual preventive. Alkaline washes-soft soap is sufficiently high to apply the soap

The e is another Lorer -the flat Lend which is recentric in its operations and more injurious in this state than the oth er. I curs the book in various forms and enters the wood. They operate on the apple, pear, quince, cak, and soft maple-nearly all kinds of shade trees.

be used as in the other case. This worm matures in one year-the assortment of most marked difference between them. The soap should be applied whith higher This department we flatter ourselves to be in this case. Sorp suds will do.

Poer Petatocs. Half the people who est potators to day will find them cutting like a piece of Lar soap, and not much agreeable to the taste. The fault according to a lady

writer in the Household, is not in the

tabers, but in the cook. She says she

never has any but dry menly potatoes on Ler table un lab s is her m "urop ra d' of preparation: If old, I pure them and let them remain in cald water several hours. When time to cook I put them in a kettle of boiling water "saft as brine." When they are toiled sufficiently, I run off the water and set the kettle on the fire till the steam Las all dried out. Prepare in this way. +ld pointoes are delicious and wholesome. New potatoes need not be pared, nor need they remain in cold water. Wash them

thoroughly, and if there are any rough places out them off. I place them in boiling salted water, and when done always pour the water off and place them over the fire again. BLACE KNOT .- One of the papers read at the last regular meeting of the Albany Institute, discussed the nature and treat ment of "black knot" on plum and cherry trees. After citing authorities, some of which hold to the theory that the knot is caused by insects, and others that it is a fungua. Professor Peak appealed his own observation to prove it to be the latter. He holds, however, contrary to the opinion hitherto supported, that the fungus is a growth of much more than a year, so that instead of ripening in the June after its first appearance, it

does not ripen until the succeeding Jan usry or June. The remedy proposed. consists in united action on the part of the fruit-growers in pruning off the "hnot" wherever found, so as to prevent the further spread of it, and the month of November is considered the best time. for the old crop has already made its appearance in the swelling of the sap-wood, where the fungu- resides. VALUE OF Edus.-During the war many experiments were made by medical men and others interested in the sub ject, to see in how small compass the most nutriment could be got; and after all the experiments of physicians, physiologists, patent rights men, savans, and investigators on scientific subjects, they all had to knock under (to use an expres-

sive though vulgar phrase) to an old hen or a young one either-for it was found that an egg contained a greater amount of nutriment, or life preserving food in the compass it occupies than of any other known substance. True, there are esscuces of meats, etc., that by combination with other articles may be as powerfal, but alone, the egg is the most nutritions. There is more life-sustaining element to a single egg than twenty times to butk in bread or food of that kind. At Paris, Ky., a week ago four prisoners in the jail, by means of a sharp

nail, loosened the bricks in the ceiling of the cell, and made a bole large enough to crawl into the space between the ceiling and roof, They discovered a small trap door opening into the hall up stairs. Decending through this by means of a blanket tied together, two of them gained entrance into a vacant room, and were assisting each other down to the ground by means of their blankets when discovered by the jailer, who charged on them en dishabille, with revolver in hand, and drove all back but one, who had gained the ground and made good his escape before being discovered

On Saturday a week a stage driver be

tween Stockton and Jenny Lind, Cal.,

Faw a man in a chaperell, and recognized

him as one of the recent stage robbers

An armed party pursued bim. A des-

parate fight ensued. The robber was

shot three times, mortally wounded and

taken prisoner. He admits to being engaged in two recent stage robberies.
