How to Catch Rats.

tys' urg Stir & Sentinel.

One of the pests of the farmer is rats To keep them within endurable bounds is somewhat a difficult task, for a rat is as curning as a fox, and as hard to catch; but there is such a thing as suit the times. working strategy on it. A rat never digs a hole unless it has some protection to begin with, say a stone, a stick of NEW BOOT & SHOE SHOP wood, or anything else that makes an an gle with the ground; a cellar wall it likes best. If a rat is chased in a cellar BRIDGE STREET, MIFFLINTOWN, FURS, WOOD AND WILLOW-WARE, and in or other room, it will run round the wall, a box or barrel, or either article, within terial, all kinds of four inches of the wall, and in that open BOOTS, SHOES AND GAITERS, space set a trap, without anything to Lide it. The rat in following the wall GENTS', LADIES AND CHILDREN. will get into the trap rather than go around the barrel. When it is caught, smoke the trap with a piece of burning of all kinds, for men, women and children paper, shift your barrel to another place and set the trap as before.

It is said that if a man hides where crows frequent, and they see him go there, they will stay away until they see him leave. If two men hide and one leaves, the crows will go back to the one that is left; and this is because a crow WAGON MANUFACTORY cannot count. Thus with the rat; there is something in the combination of the wall, the trap and the barrel that it does SAMUEL H. ROLLMAN respectfully an not seem to understand .- Cor Germantown Telegraph.

AN EXPERIMENT IN FEEDING HOR-SES .- The London Omnibus Company WAGONS OF ALL KINDS, use six thousand horses. To economize From a Four horse Farm Wagon to a Onein feed is an important matter, and has led to several tests, the result of which is recorded, as follows: To each of three thousand of their horses they gave a daily allowance of ground oats sixteen Grain and Lumber Taken in Collars and Cuffs, and a general assortment pounds, ground hay seven and one half pounds, and cut straw one and one-eighth pounds-the hay and straw being cut by turning out superior work, he hopes to into pieces about balf an inch long, and merit and receive a large share of public well mixed up with oats in a little water, patronage. and so making twenty-six pounds of Good Oak Plank Wanted. food for each horse. And to each of the other three thousand horses they gave a daily allowance of whole or unbruised oats nineteen pounds, and uncut or whole THE undersigned hereby respectfully inhay and straw thirteen pounds, without Patterson that his wagen will visit each of any water, in our old fashioned way, these towns on TUESDAY, THURSDAY and making thirty two pounds of this food SATURDAY mornings of each week, when they can be supplied with for each horse. And what was the result? Why it was soon discovered that the horse which was fed on the twentysix pounds of ground oats remained in as during the summer season, and also PORK good condition, and could perform as and SAUSAGE in season. I purpose furmuch work, and do just as well, too, as morning, and Veal and Mutton every Thursthe horse did which consumed thirty-two day morning. Give me your patronage, and pounds of food as aforesaid, thus show- will guarantee to sell as good meat as the country can produce, and as cheap as any ing a saving of six pounds of food per other butcher in the county day in favor of bruised oats and cut hay and straw, which, if valued at five cents per horse per day, amounted to a saving BROCKERHOFF HOUSE, of the neat little sum of \$300 per day .-Turf & Field
