What are commonly called city farmera often fall into the error of believing that manure pays at any price. They have not the ripe experience which early and constant practice at farming gives them. Absorbed in mercantile pursuit, while owning a farm in the country, they have enough knowledge of culture to understand that it does not pay to cultivate poor land, and hence "John" is instruct -- a full minute or a spare moment?" for itself. But it does not. We can the 27th ult. point to suborban farms of this class A sheriff in Arkansas recently asked ciple, which, so far as profits are concern- lows on which he was to be executed. ed, have been failures, and which the owners eventually gave up in disgust.

But suburban farmers are not the only ones who make mistakes of this kind .-The practical man, inured to farming from his infancy, knows as well as the other that he cannot get good crops from machine in an lowa paper mill the other poor soil, but he knows what hard work is, and what the wear and tear of horses and implements comes to. Hence he will not buy stable manure at any price; government will immediately take vigor but he does nearly the same thing on special fertilizers; and many a good farmer, especially in Delaware and Maryland, has ruined himself as effectually in those has in stable manure.

best methods of making, sowing and ap oxoited and proposed marriage. manure; but there are numberless farms stage, but no one was seriously injured. falls far short of the answer which the mer rain. manure question requires. Then we are It is stated that Dr Shoeppe has aban these matters every farmer knows of .- at law than by will. They either are not worth the labor giv- A man in Missouri is seeking a divorce

better meets the general want than propor green manning-that is, the sacrificing of one crop for the benefit of the land We have in our eye a case in point. A. is a farmer who well understands the value of having his soil rich in order to yield profitable crops. From a three acre tract of grass this spring he made four and a half tons of hay-noth. jured. ing to brag about, but then it was a dry season. But later the warm rains came, and the second crop grew, so that it became a question whether it would pay to mow it again. It is proposed to put it in corn next spring, and with A's ideas of of farming it will need a heavy coat of manure, much of which he will buy. His first impression was to let it rot on was worth. We think he made a mistake in this decision. The cost of cut. the order of his going, went. ting and curing this was certainly not. The stay of the Chinese in Spring stuff at this.
