

ISCELLANEOUS.

In Mexico at Last.

A confidential letter was received at San Antonio, Texas, on the 24th, dated at Brackettville, Kinney county, May 20, in which, after recounting the various atrocities and robberies committed on the borders of Texas by the Lipan and Kickapoo Indians, and the fruitless endeavors of General McKenzie, commanding Fort Clark, to prevent them, are given the particulars of a march into Mexico by our cavalry and the breaking up of a camp of Kickapoos. The writer says:

On the morning of Saturday last, 17th instant, all the available cavalry force of thearrison was ordered to equip and be ready at a moment's notice for important duties on the Rio Grande. Coaches were dispatched from headquarters to the several companies stationed on the various creeks and crossings with similar orders, which were strictly complied with and all the available forces of the 4th cavalry, numbering some 600 men, assembled at the call of their commander and proceeded under guidance of the experienced half-breed scout, Van Green, of Maverick county, and other guides, and crossed the Rio Grande, and by a forced march of eighty miles into the interior of Mexico reached the camp of Kickapoos at early dawn, having been forty-eight hours in the saddle and twenty-four hours without food or water, being compelled on the march to throw away and dispense with every utensil, accoutrement, or requisite whatever that could in any manner retard the speed of the march.

The charge was made at dawn, and the Indians, who were unprepared for the attack, made but slight resistance, and the greater portion of them attempted to flee to neighboring mountains for shelter. In the encounter there were 19 warriors killed and about an equal number wounded. Forty squaws have been captured, and some 100 horses and other property stolen by the Indians, have been recovered. The troops lost three men—one killed and the others mortally wounded.

Couriers arrived at post last night with orders for 2000 rations, the food of the company having been thrown away in order to expedite the march. The couriers report that McKenzie and troops have safely recrossed the Rio Grande with the captives and recovered property camping last night at Van Green's (the guide's) rancho.

They will probably arrive to-morrow or Wednesday. The prisoners are mostly the squaws of the Indians who cross the Nueces last month, forty strong, and who are now depreating on the lower counties. Since the affair I have learned that intense excitement prevails on the other side, and it is said that the Mexican frontier authorities are excited to the highest degree, and have assumed a very hostile attitude toward us.

Reports of this kind were even in circulation here some weeks since. A gentleman of high standing on this frontier, and who is thoroughly conversant with Mexican frontier affairs, having practised law in leading towns in the State of Coahuila, Mexico, informed me shortly after your departure that influential men of the towns of Santa Rosa, Montelva, Saragosa, Nava Morelis and San Fernando, are apprehensive of hostilities arising between the two countries, believing that the difficulties that have arisen between the inhabitants of both banks of the Rio Grande can only be settled by the arbitrament of the sword; and as evidence of the truth of this statement, the State of Coahuila has just levied on her citizens such an extraordinary tax as is only done in cases of great revolutions or threatening war.

Another gentleman of high standing in this community, a former resident of Mexico, and a man whose veracity is unimpeachable, informs me that he received a communication from an American resident of New Mexico, in which is mentioned the organization of a body of men whose object is to retaliate the damage done last fall in the raid on Villa Nueva, and the writer goes so far as to counsel the gentleman to exercise due vigilance in the care of his life and property. I mention these matters to convince you of the feeling which prevails in Mexico toward the people of the United States, and the probability of its being intensified by the last affair of the Indian camp at Santa Rosa. The supposition among frontiersmen is that it will precipitate hostilities. I will have more news for next mail. The troops and prisoners will probably arrive here to-morrow. I have since learned that the troops were fired on by the Mexicans when crossing the Rio Grande—Ez.

A prominent man who was waited on by a nominating committee at his residence to ascertain if he would accept the nomination of Lieutenant Governor, announced promptly in the affirmative, saying he felt qualified by long experience. On the committee wishing to know his experience, they were informed that it had commenced on his wedding day, and that his wife had been governor ever since—his experience being that of lieutenant.

"Do you like chickens?" asked a remarkably modest Nashville youth of his sweetie, as he was walking about two feet from her on his way to church, on Sunday night. "Certainly I do," she replied; "why do you ask such a question as that?" "Because I thought if you liked chickens, you wouldn't object to taking a wing," and he crooked his arm in an irresistible manner. Sweetie took a wing.

Merchandise, &c.

GOOD NEWS!

NEW GOODS!

Large Stock at Laird & Bell's, in Patterson!

Medical.

Fouse's Pleasant Purgative Pellets

Or Sugar-Coated, Concentrated, Root and Herbal Juice, Anti-Bilious Granules, THE "LITTLE GIANT" CATHARTIC, or Miltum in Parvo Physic.

The novelty of modern Medical, Chemical and Pharmaceutical Science. No use of any injurious or violent cathartic or purgative, but a careful application of chemical science, extract all the cathartic and other medicinal properties from the most valuable roots and herbs, concentrate them into a minute Granule, scarcely larger than a mustard seed, and ready to dissolve in the most concentrated form, such cathartic power as is embodied in any of the large pills found for sale in the drug shops. From such cathartic power, in proportion to their size, people who have not tried them are apt to suppose that they are harsh or drastic in effect, and to reject them. In fact, they are composed of the most delicate and refined of the others, and to produce a most searching and thorough, yet gently and kindly operation.
