Otherwise, large chips may be cleaved from the corners of the stone, which should be kept flush and true. Now, that the periphery is turned off true, let the drawing knife, the broad-axe and other larger tools be ground first; and aim always to keep the periphery a trife higher in the middle, by holding large tools near the side, rather than in the middle. When one is grinding small tools, it is always more convenient to hold them near the middle of the periphery. If every bungler is allowed to grind his meat at and pick-ax, his grab-

middle of May in the Northern and water for domestic uses. Remember Western States. When the surface is this. - Exchange. the size of the sun. The many startling of plants, then if the insects destroy some, there will be still enough left. The most reliable kind for field culture is the true Flat Dutch. It has a short is the true Flat Dutch. It has a short of a superior quality for culinary purposes. Of the Savoys, the kind known as the Drumhead, when true to name is the best, it grows a large head, with the leaves very much crumpled, and the leaves very much crumpled, and the leaves very much crumpled, and the same of continual and, the white of one egg, and then stir into the filour, etc., turn into a buttered pudding dish and bake half an hour in a quick oven.

As a sauce for the above, beat to gether the yolk of one egg, a teacupful of sugar, and half a teacup of meited butter. To this add half a teacupful of sugar, and half a teacupful of butter. To this add half a teacupful of sugar, and half a teacupful of butter. To this add half a teacupful of sugar, and half a teacupful of sugar, and half a teacupful of sugar. The half wash the leaves very much crumpled, and keeps well through the Winter. Red Dutch and Cauliflower seed may be diameter of the solar ork, as measured.

To Make Green Pickles.—A corres-

sure thing every year, and brings cash the influence of the solar spots them- to, it will be better than the old process. -perhaps not much, but will keep selves, years and years and not spoil if you can afford to hold. Wool grewing requires but little hired help, and you are free from these strikes that wheat harvests will always have. The work is done when we have pleasant weather and there is no absolute pressure. Sheep will increase the fertility of the land, clear out weeds, briars, dock,—everything. Wheat harvest may find you in the shade. Josh Billings said of flies, 'Darn, a fly;' if he had been a farmer 'Darn, a fly;' if he had been a farmer' is from these strikes that wheat harvests out of arsenic and copper. It is either identical with the pigment known as Scheele's green in the stablespoonful of shortening must be melted in half a cup of hot water in which a teaspoonful of soda has been dissolved. Add three cups of flour, a little ginger, and salt. Mix all these ingredients together, and bake in a shallow pan.

CAPTAIN BOTISWELL—speaking of his host's daughter, who has been pressing the gentlemen to select partners—"Here comes the little whipper-in!" Daughter —who has heard the remark with a courtesy—"To Her Majesty's hounds!" Employer to New Clerk: "Well, Smilles, have you posted the ledger?" New Clerk: "Yeth, thir! I've posted the ledger: but lor, thir, it wath too afford to hold. Wool growing requires Paris Green. - Paris green is a com- culated for manufacturers for market.
