The War. The question is asked in the streets, will the Pennsylvania Volunteers be called out? It is our belief, judging solely from the aspect of the war, that they will. The recent battles around Monterey show decidedly the military spirit and patriotism of the Mexican soldiers; in fact, it was their brave defence of Monterey that caused Gen. Taylor to grant them such honorable terms in their capitulation. It is all a mistaken idea that the Mexican soldiery are undisciplined and cowardly and our volunteers, if called on to join in the war will find in them "foemen worthy of their steel."-It is not likely that Gen. Taylor will proceed towards the city of Mexico from Monterey, as the Crawford. distance is about eight hundred miles, and the country unfit for military operations. Leaving that city well fortified, we presume he will fall back on Matamoras and await until our squadron have taken Tampico or Vera Croz, the first Elk. named place being 312 miles, and the latter but 290 miles from the city of Mexico, with the ad-Franklin vantage of good roads. The troops can then em, bark from Matamoras to either of these points, and after being reinforced with volunteers, proceed on Jefferson to the old city of the Aztecks. Then will come the tug of war! These are merely our own conjectures concerning the plan of procedure by the Lehigh, Luzerne, government, and are worth as much perhaps as the opinions of the press elsewhere. From what McKean, appears tardiness on the part of Com. Connon, Mercer. ome have been led to believe that the castle at Vera Cruz is impregnable, which is not the fact.-If it suited the plan of operation, Columbiads could be cast of such calibre, in this city, that would, without the loss of a single man on our side, si-Perry, Philad'a City & Co. 3675 Hence any battery on the Gulf. We have no doubt but that it is the intention of our government to Pike, prosecute the war with vigor, nor will it end Schuylkill, until our troops occupy the beautiful Alameda, The descendants of the Aztecks and the Conquerors are brave, and by no means wanting in pariotism, but the fact is, the country has no govern-

ment-it never was a Republic-it never has been any thing but a military despotism, and it chan ges its rules like the changing of scenes in a drama. When Mexico cast off her allegiance to Spain, in stead of creating a Republic, she placed Iturbide on the throne, an Emperor! He was shortly afterwards assassinated; ever since, there has been nothing but pronunciamentos and revolutions-a constant quarrel between military frants for the Contact quared between military frunts for the plane of the characters and imprisoned the people of the characters and imprisoned the people it by have broken the national fairing that have inside the representative of our government.
