tents of the present number are as follows:

consequences, and it should be known that the great mass of pills in general use are composed of the most powerful and pritating purgatives, and act with too great a degree of violence, producing that derangement in the system that is followed by conrangement in the system that is followed by con-stigation of the bowels, indigestion and costiveness. From these facts the natural inference would be that to maintain uniform health it is necessary to correct unhealthy secretions, expel morbid humors
