UCRETIA; or the Children of the Night; by Sir

five cents.

The classic pen of the author of "Rienzi," &c.,
after having been long in abeyance, has at length
produced a work which, for artistic beauty and dramatic splendor, will doubtless be universally regarded as surpassing all his previous efforts. An intuitive perception of character seems to distinguish this
great writer, added to which he possesses on wasterly a power of delineation, united with such felicity of
illustration, that his pictures as well as his plots and
counterplots possess, in their brilliancy and freshness
an undescribable charm.

This romance reveals with life-like effect the motives and socret springs of action exhibited in the career of the heroine, whose mind, endowed with singular energy, perseverance and love of intrigue, combined with the rarest graces and excellencies of hersex, exhibits one of the most extraordinary and anomalous developements of characters ever presented
to our contemplation.
