S. MORRIS & CO'S BLACK WRITING INK, For

Steel or Quill Pens, and the Copying Press.—This Ink
is the result of the experiments of several years, devoted
to the manufacture, on an extensive scale; of an article
suited to all the purposes of the consumer. The perfection of this Writing Ink cousists in the following properties: "PICINITY—in which property it will be found to
surpass all previous preparations. It will flow with perfect freedom, either from quill or steel pens, and is entirely
free from any corrosive qualities. Color.—The color
of this article is a rich, beautiful blue black.

IDT-All good black Ink, from its uccessary chemical
constitution, requires exposure to the air to impart a degcolor. It must not therefore, be expected; that the moment the bottle is oped, the Ink will be found to be a je
black. The first appearance will be pale; but after exposure to the chemical action of the atmosphere, either
on paper or in the inkstand, it will assume a brilliant black. AMES MCKENNA, Auct.
