While this wise policy was to be maintained towards France, now suddenly transferred from a monarchy into a repub-lic, all our sympathies are naturally enlisted on the side of a great people, who, imitating our example, have resolved to be free. That such sympathy should exist on the part of the people of the United States with the friends of free government in every part of the world, and especially in France, is not remarkable. Mr. HARPER:—
From the premises that I have laid down, it is necessarily inferrable, that every man, who derives from among the citizens of Pittsburgh, the means of his support, is bound to contribute, as lar as his own necessities and requirements are concerned, to the support of those who are aiding him in his efforts to abtain wealth, or to add to the amount of that which he has already acquired. The owner of real estate receives his rents from the merchant, the mechanic, the artisan, the laborer bution, the functions of government would corse.— They are thus bound to sustain each other, because, without this reciprocity, the burthen of government would fall very unequally. Admitting that there is ommunity would be bound to pay for the regar pro-ection and security of the other; and no right thinking man would tolerate for a moment such a doc It may be very naturally concluded, then, that, rhile we have merchants, mechanics, artizans, &c

among us, who are willing to sell us as good arti-cles, and render us as faithful services, and on as good terms—all circumstances taken into the ac-count—as we can procure, or have rendered elsewhere; we are guilty of practising towards them, plain and palpable injustice; if we procure elsewhere what we may wish to purchase, or employ others to do for us what they can do. This is not all. Every owner of real estate, who obtains from abroad, articles which he can procure here, is not only doing a direct injury to the city—to whose natural advantages, perhaps even more than his own exertions, he is indebted for his wealth; but Late from California.
