Original Tale. We have had on hand for some days past, a very

the following, which states very truly one of the quick and powerful a change in the government and the profits of the establishment. What is called the pauper labor of Europe is already infer or to our future prospects of Krance. The doctrines of the Communists and Socialists of that country may be altogether impracticable; their arguments may be merely abstractions; and, instead of being enlightened and profound philosophers, they may be fand the government, and direct the policy of the nation, the superior comfort, education, intelligence, and the government, and direct the policy of the nation, the superior comfort, education, intelligence, and there tendency; and compared them with heretofore popular ideas of government; with that care and attention which gives to opinion? We think they have not. We know but

atripping us, in efforts to establish a more perfect system of government. Our own government we look upon as one of the most harmonious and beautiful designs, ever put into operation by man: and notwithstanding this, it was looked upon by many of the most profound men of the last century, as containing the seeds of its own inevitable destruction. Those who have conteaded for its administration upon the most simple and liberal principles—the principles most in accordance with the views of its framers-have been denounced as jacobins, as demagagues, and political imposters; and yet, notwithstanding all the detrac-

injusters; and jet, notwithstanding all the detraction and mirrogressimation that has been uttered against tism, the people have sustained it as any assume that the properties are sustained its and assume that the people have sustained its and assume that the people of the District. Whenever any such measures in a perfect the people of the District will ask for the imaphitudinal most absorbed from the people of the District will ask for the imaphitudinal paper, in relation to the "San Calotter, for "Paris Mob." We have already said that Mr. People have a strict of the people of the District will ask for the people their fellow-beings. The extract below, gives a fair general idea of one of the great aims of the which animate them, or by their yearning after all that is good and true, seems to have become the property of this class; and you will behold in these property of this class; and you will behold in these property of this class; and you will be counterneces.

these very maintenance and of 1845 will not be a mere political claptrap—not a mere change of one master for another; but that the new rulers, called to the stage of history, will seriunity occupy themselves with the great problem of the age—immediate and urging in Europe, but equally mayoidable in this country—the organization of
labor, on a fair, equilable, fust and philosophical basis.
That problem must be solved sooner or later, and it
slows no ordinary degree of moral courage, to venture upon its solution at a timo when the social elements are out of joint—when the coercive power of

The idea that labor, the price of it, is to be regulated, not only in regard to capital, but also with a view to the physical and moral condition of the laborer, forces itself upon the present organization of socie-

The skill, energy and industry, the interest and pride in success, the vigilance and perseverance, that will be manifested by our intelligent workingmen under such a system, will far more than refund to capital such reasonable participation in its profits, and enable such American establishments to supply all the nations of the world. The introduction of this system will be voluntary, because it is most just and beneficial to all partices. It is the participation of all our people in the government, that is one great cause of our orosperity; and the participation of our workingmen in the profits of our industrial establishments would exhibit similar results. Mr. CAMERON—I rise merely to defend my own State that great State which I have the hoper to bidly conceiving or expressing them. I quote from his last Treasury Report, page 24.

"The energetic American freeman can and does perform far more effective labor in a day than what is called by the restrictionists the pauper labor of Europe; and, therefore, the employer here can Prymore for a day's toil to our workingmen. Measured by the day, the wages here may be higher than in Europe; but, measured by the work done on that day, there is but little difference. And when all our capitalists (as some already have) shalt find it to be their true interest, in addition to the wages paid to the American workmen, to allow him voluntarily, because it augments the profits of capital, a fair interest in those profits, and elevate him to the rank of a partner in the concern, we may then defy all competition. This is the same principle, illustrated by uniform experience, proving that he who rents his farm, builds his house, sails his ships, or conducts any other business upon shares, realizes the largest return, and that he who works by the job produces more in the same time than the laborer whose wages are paid by the day.
