OBSERVATIONS ON THE WEATHER. The following tabular statement of the temperature, &c., from the City of Merico to this city, was, kindly furnished us by a citizen of Massachusetts, (Mr. D. S. Horr,) who was with the United States'. Siege Train, during the whold of Gen. Scoute campaign in Merico; and who has kept a journal of this. observations, together with the state of the weather, &c., during the entire time, until his return to the ing Delegates to the State Convention, to be held at United States. This gentleman was also a member of the first American expedition from the City of Harrisburgh on the Suth instant. Mexico to the celebrated volcano of Popocatepell ; and the second member of that expedition who reached its summit, and performed the difficult and dangerous task of looking into the crater of that nountain,-Lt. STONE, of the Ordnance, being the first to accomplish this feat. In addition to the tabular statement, this gentleman has also furnished us with the result of his observations on the top of that celebrated mountain, which are as follows :----

On the 10th of April, 1848, at 10 o'clock, A. M., in the shade of the body, the thermometer stood 209 above zero; at 2 o'clock, r. s., at the extreme verge of vegetation, in the shade, it stood at 57°; at the same place at sunrise the next morning, it stood at 30°; at the village of Ameea, on the plain at the foot of the mountain, at sunset on the 11th, it stood at 54°. In making the 2 o'clock observations, great cure was taken to prevent either the direct or reflected rays of the sun from striking the thermometer. These statements of meteorological facts, will, undoubtedly, prove highly interesting to all who have been engaged in making obsorvations in relation to the weather in different parts of our country; and they certainly show a most wonderful atmospheric change at many points, between suurise and 2h. P. at, and again from this hour till sunset. Covering so many degrees of latitude, the observations will be

the more gratifying to the curious in these matters :--. Aleteorological Observations Taken on the Boute trom the City of Mexico to Pittsburgh. SUN RISE. Place of Observation TWO O'CLOCK, P. M. Place of Observation
