alle raite. deci9 IJF: A cough should never be neglecited. It may np-pear trifling: and unworthy the nitention at first, but it will not remain stationary long: it may progress slow at first, and its augmentation may searcely percectible; yet when it once seizes the lungs, all the older parts of the body will be sympathetically affected, and a confirm-ed Consumption and premature death will be the inevi-able result. A little ears would save many a life, and he timely use of a proper remedy might have arrested many a consumption. But many persons have an invin-cible repugnance to: taking any medicine, and rather than use the meths towards arresting a disease; simply because the remedy may not be a pleasant one, would raffer and languishier a long time, before they would re-sort to the aid of medicine. B: A. Pahnestock & Co's Cough Balsam has a great advantage in this respect over many other Cough prepa-rations, as its pleasant tase permits it tobe need without inconvenience. Bat its value as Balsam consistin the specimess of its cure. We have known some of the most desperate cooge, some of which had been running on for a considerable length of time, yield almost imme-diaely to its power.
