## THE GOLDEN BINGLET.

Here is a little golden tress, Of soft unbrailled , hair, Tha all that's left of loveliness That once was thought so fair; And yet, though time hath dimm'd oh all beside hath fled, I hold it here, a link between My spirit and the dead.

Yes, from this shining ringlet still A mornful memory springs, That melis my heart, and sends a thrill Through all its trembling strings, I think of her, the loved, the wept, Upon whose forchead fair, For eighteen years, like sunshine, slept This golden curl of hair.

Oh, sunny tress, the joyous brow, With all thy sister tresses, now Lies cold within the grave,-That eye no more is gay; Of all her beauties thou art left A solitary ray.

Four years have passed, this very moor Since last we fondly met Four, years and yet it seems to soon. To let the heart, forget-Too soon to let that lovely face From our sad thoughts depart, And to another give the place. She held within the heart

Her memory still within my mind Retains its sweetest power; It is the perfime left behind, To whisper of the flower Each blossom, that in moments m, that in moments gond Bound up this sonny curl, Recalls the form, the look, the tone Of that eachanting girl.

Her step was like an Aerial rain "Over beds of violets flung; Her: toice the prelude to a strain, Before the congis sung; Her life, 'twas like a half blown flower, Closed ere the shades of even, Her death the dawn, the blushing hour That opes the gates of Heaven.

A single tress I how slight a thing To sway such magic art, And bid each soft remembrance spring Like blossoms in the heart It leads me back to days of old-To her I loved so long, Whose locks outshond pellucid gold, Whose lips o'erflowed with song.

Since then, I've heard a thousand lays From lips as sweet as hers; Yer when I strove to give them praise. I only gave them tears; I could not bear, amid the throng Where just and laughter rung; To hear another sing the song That trembled on her tong

Was laid on the table for furth before the Mercantile Library Association of this city, is reported to have said.

On motion of John Boyle, resolved, that this Society adjourn to meet at Perrysville, in Ro n Saturday, the 3d day of February, 10 o'clock A. M.; and adjourn from there to me at the church at the mouth of Deer Creek, in In diana township, on Saturday, the 3d of February at 10 o'clock, A. M.

They have more constitutional energy and vigor than we have. Like their borses they have met-tle and bottom. Pluck is the National character-CAPT. THOMAS S. HART'S ADDRESS. • Well, my brother farmers, you are well ac-quainted, I think, with the cause of our meeting. We have met here to investigate a subject that we all feel more or less deeply interested in-that is the subject of agriculture, in all its various branches. It is a subject that we ought to have American's is labial. London and England now are in full growth .turned our attention to years ago; and we should now be reaping the benefits of the improvements now be reaping the benefits of the improvements we could then have made in it. I am sorry to say that it is a subject that we have too long ne-glected; and it is high time that we should fully Musaum is not subject that we have too long ne-glected; and it is high time that we should fully Museum is not yet arranged; London University arouse our attention to it, as we are certainly far behind the times as regards agricultural science is growing as rapidly as one of our mushroom Western Colleges. Everything in England beto kens life. To be sure the Englisman does not in this county. If we look, for instance, west ward, into some of the newly settled regions, we ward, into some of the newly settled regions, we build custles and abbeys, but what the nineteeth will see that they are generally in advance of us build custles and abbeys, but what the nineteeth in their setteethural nursuits, and the only cause century demand, he builds, docks, wharves, ware in their agricultural pursuits; and the only cause I can assign for it is, the farmers of those regions, houses, &c., without number. The land and climate are favorable to the production of good men. Mr. Emerson said that in his addresses while in or at least the greater part of them, have emigrated from the Eastern States, where they had been brought up under the influence of agricultural England he had been accostomed to erase those scieties, and have become acquainted with all the passages which he had written and, spoken so of ten here touching the feebleness and sickly aspect trne principles of improvement, which have placed of poor mortals, such an effect had the fine physithem in advance of us. Does it not behoove u que of the Englishman produced upon him. In all that the Englishman does, even to the noise of then, to use our utmost efforts toward improv ment in our agricultural operations, so that we may place ourselves on an equal footing with the formers of other portions of our happy country? The subject that we have before us, is one of vast clearing his throat, he gives evidence of strengt It is not the land for faint hearts. One thing is very noticeable among the peop importance, not only to ourselves, but to the com and that is their total neglect of each other. Each duty of every good citizen—no matter what his he pleases, and his neighbor pays no attention to

Abomer great inducement, to it is to endewor to promote improvement, is that the all wise and bountiful Creator has placed under our control; portions of our mother Earth, from which we have not only derived our being; but from which we

in which columns her age is found. Add together the first columns, and the sum will be her age. derive all the sustenance which keeps that being in existence. How important it is then, my Suppose for example, she says that she finds he age in the 1st, 2d, and 5th columns. Then the brother farmers, for us to cherish and nouri aln of our existence. I consider the set addition of 1, 2, and 16. (the first numbers of said columns.) gives 19 for her age. one of agriculture one of the most profound and one of the most beautiful that exists; and one, which, if well studied, has a tendency to improve the human mind, and to establish the pure virtues. The ogriculturalist has displayed befor him all the most beautiful works and operati of his divine Creator-how thankful he ought t be then, that he is placed in that proud and re--11 +11sponsible position, and how incumbent it is upon him, then, to aid and assist Nature in increasing 14 15 12 her productions. I would ask you if there is upo Earth a more honorable or beautiful professio 18 17 . 19 than that of a practical agriculturalist. He may be justly styled one of Nature's noblemen. If you 22 23

be justly styled one of Nature's nonlemen. If you examine, for instance, into the professions of the great and leading men of our country, you will find that the largest class of them consist of agricultu-ralists. I will ask you again; if there is a more hoporable station in the world than that of being a practical American farmer. He is certoinly one of the most independent beings in existence; and is he not fully aware of the proud p 37 ition that he is placed in ? Is he not fully aware that the existence of the whole human family lependent upon the exertions of himself and co esques. Suppose, for instance, that the broughout the world should enter into a combi

nation to suspend all farming operations even for one short year, what would be the result ' Why, the human mind can hardly conceive or realize the ernation that would ensue. Famine, desold death, would be the end-every other pro

ufacturers to co-operate manfully with us, as the interests of the plough, the loom, and the anvil are so closely connected that they ought to go hand in hand together. My brother farmers, I a

fifty Democrats of the House to stand together upon this great question of Bank Reform.

Our better feelings will always lead us to side with The cotton conspirators have but one arguthe weak and oppressed, although they may be somement-one idea-which serves as a text for all their times wrong, and transgressing the law. In some States, one man can be held by another as property, the rights and interests of those who labor; and that according to law; yet, if I found a slave running is, to assert the monstrous falschoods that we are away from his master, and on his way to a free State would be the last to inform on him ; nor do I know. I would be the last to inform on him; nor do I know an advocate of riots, because we are in layer of the beart might so operate on the hand as to make it almost involuntarily search for a quarter, to poor, the weak and the helpless, get more heads to assist them through with their warefare against lahelp him on his way; and yet this would be all contrary to law.

A Voice from Westmoreland.

That sterling Democratic journal, the Greens urgh Argus, contains the following article in relaion to the "bold, palpable and aggravated" con spiracy, which has been entered into by some of the roprietors of the cotton factories and their friends,

minhle-
