Extracts from Macaulay's History of England. Character of William Penn. The Quakers had a powerful and zealous advoate at court. Though, as a class, they mixed with the world, and shunned politics as a pursuit dangerous to their spiritual interests, one of them, widely distinguished from the test by birth and ne, lived in the highest circles, and had constant access to the royal ear. This was the cele-brated William Penn. His father had held great naval commands, had been a commissioner of the ducated, and been designed for the profession of econciled to his family, and had succeeded in obhe was permitted, during many years, to profess close of the late reign he had obtained, in salistac- from a poor boy and a journeyman, to an indeion of an old debt to him from the crown, the rant of an immanco this truct, then peopled only by Indian hunters, olony was still in its infancy when James nounted the throne.

Between James and Penn there had long been a familiar acquaintance. The Quaker now became a courtier and almost a favorite. He was every day summoned from the gallery into the closet, and sometimes had long audiences while neers were kept waiting in the ante chambers. It was noised abroad that he had more real power to help and hurt, than many nobles who filled high offices. He was soon surrounded by flatterers and suppliants. His house at Kensington was sometime thronged, at his hour of rising, by more than two aundred suitors. He paid dear, however, for this seeming prosperity. Even his own sect looked him, and requited his services with ohlo. quy. He was loudly accused of being a papist, nay, a Jesuit. Some affirmed that he had educated at St. Omer's, and others that he had been ordained at Rome. These calumnies, indeed could find credit only with the undiscerning mul-

titude; but with these columnies were mingled ccusations much better founded. To speak the whole truth concerning Penn is a ask which requires some courage, for he is rather is and hostile sects have agreed in canonizing England is proud of his name. A great wealth across the Atlantic regards him with a reverence similar to that which the Athenians felt for Thesis, and the Romans for Quirinians. The respectable society of which he was a tion to see elevated to the same platform in society,
member, honors him as an apostle. By pious on which his employer stands. In order that this now "held to law" to answer to serious charges men of other persuasions he is generally regarded may be accomplished, he must have leisure to culas a bright pattern of Christian virtue. Meantivate the intellect, which God her area him and a virtue work of Riddle's share for while, admirers of a very different sort have sounded his praises. The French philosophers of the eighies, in consideration of his contempt for priests, and of his cosmopolitan benevo-lence, impartially extended to all races and to all lence, impartially extended to all races and to all creeds. His name has thus become throughout

all civilized countries, a synomyn for probity and Nor is this high reputation altogether unmerited. Penn was without doubt a man of eminent virtres. He had a strong sense of religious duty, and a fervent desire to promote the happiness of his day, common even among men of enlarged tion. He hoped for an ameliorating change in their minds; and as the proprietor and legislator of a tion. He hoped for an ameliorating change in their province, which being almost uninhabited when it condition. His enthusiasm for one great principle sometimes impelled him to violate other great principle sometimes impelled him to violate other great principle sometimes which he ought to have held sucred. Nor was his integrity altogether proof against the temptations to which it was exposed in that splendid and politic, but deeply corrupted society in which he now mingled. This preparation, it is rumored, is indicative of a purpose on the part of France, in favor of the Pope. These vessels are capable of carrying 7,000 to 10,000 men. At the latest moment no orders had been received for the sailing of the expedition, and the design, it is thought, in some quarters, has been probably abandoned. An uneasy feeling, however, exists, and it is certain that 400,000 muskets have been ordered, from the manufacturers at St. Etienne. The main cause of apprehension is felt to be in the state of the French finances. It is estimated that
