A. A. MASON & CO.

No. 60 Market street, Pittsburgh, Pa.,

DEG leave must respectfully to announce to their numerous patrons and the public that they, in consequence of contemplating a change in their business, propose opening the whole of their extensive Warehouse,
including all their Wholesale Rooms.) for retailing, and
will continue open until the first of February, commencing on New Year's Day, 1849. Our whole stock, comprising one of the most censive and varied assortments
of FANCY AND STAPLE DRY GOODS ever exhibited
in the Western country, will be offered at lower prices
than ever before known. Upwards of fifty housand dollars of our stock has been recently purchased, the great
er portion of which are foreign Goods, received at New
York by late European arrivals, which, from the lateness
of the season, as well as the well known pressure in the
money market, were sold at immense sacrifices at the
public sales, at rates varying from twenty-five to fifty per
cent, less than similar goods brought the first of the season. We therefore confidently believe introur prices for
the time above mentioned will be found to be even lower
than any Eastern wholesale rates
We anxiously invite all persons to visit our establishment, whether they purchase or not, and test the trath of
the above—assuring them that they will incur no obligation thereby, but confer a favor upon the proprietors.— GOLD: AREOMETER .- We had an invitation to visit LEE, (successor to Murray & Lrg.) Gold Washers.

H. Farry has invented a machine for washing Gold, for which he has made application for a patent. They are now offered for sale at the Warehouse of PARRY, SCOTT & Co., No. 103 Wood st., Pittsburgh.

Adventurers to California are invited to call and examine these labor-saving machines. They are simple in their construction, easily transported on the back of meles or horses, weighing eighty pounds each, and can be put in operation in half an hour. They cam be filled with provisions. It is the opinion of those who have seen the trial of one of these machines of smallest size, that two men will wash the mineral from 150 bushels of sand or earth in a day, without the loss of a particle of the mineral. They can be inserted and worked by water or mule power, if expedient. The operators work without going into the water or being exposed to water, and consequently without endangering their health. They will require but a small stream of water, and can be used the whole season, and can be put into operation where there is aot sufficient water to wash in the usual way.

Price of smallest size 83S. Orders from abroad, accompanied by cash, will be premptly filed.
