AGE NTS: 2d The juility of this invention is apparent, as better. Butter can be produced from sweat milk, or cream, than cream soured in the usual way; and by means of this Charn, a little girl or boy can perform, in five or ten minutes, what has heretofore required the labor of a woman or man for one or two hours, and sometimes half a minutes, what has necroosed the man or man for one or two hours, and sometimes hait a day.

3d. Ey simply turning a thumb screw, the whole inside dasher is taken out, leaving nothing but the Butter and milk in the plain wooden hox.

4th. It is the cheapest Churn ever invented, as the simplicity of the construction (though embodying a great philosophical principle) makes it but little to manufacture it.

5th It is a common-sense Churn, as all will admit who will examine it.

We invite the public to call and witness its operation at out-office in the Diamond, pear the Black Bear Tayern, and at J. F. Beckham's, Federal st. Allegheny.
